## **Notice of Production Discontinuation: GHA,MHA,GXL series**

This is to announce the discontinuation of our high temperature series GHA, MHA and GXL.

Despite our long continuous effort, we unfortunately have not been able to come to any significant solution to the raw material supply issue that has been a major challenge for us with these series.

In order to avoid causing any inconvenience such as parts' shortages later, we concluded that it is after all for the benefit of our customer that we discontinue the production of these series so that customers can start looking for other options as soon as possible.

We would highly appreciate your kind understanding in the situation and the decision we made. Should you have any questions or concerns, please do not hesitate to contact our sales staff for further explanation. Thank you very much in advance for your kind understanding.

### **I. Series that are being discontinued:**

<b>Series</b>	<b>Terminal type</b>	<b>Case size (DxL)</b>
GHA	Through hole	All case sizes
MHA	Surface mount	All case sizes
GXL	Through hole	12.5x20mm to 16x31.5mm

### **II. Production discontinuation background:**

Unfortunately, the compounding agent for the sealing rubber of the GHA, MHA, GXL series stopped being produced. Although we are trying to develop a substitute rubber, development time takes too long.

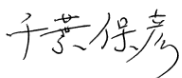

### **III. Production discontinuation schedule**

Last order: Not acceptable

We would like to make a schedule on a case by case basis.

Very truly yours,

Nippon Chemi-con Corporation  
Sales Headquarters, Sales Planning Dept.  
Dept. Manager
