Communication Product Solutions

PELTOR™

# Announcing the Try, Then Buy Program from 3M

## The Challenge: Maximizing Productivity While Reducing the Risk of Accidents

Noisy workplace environments create unique challenges for workers and supervisors. When team members can't communicate easily with each other, productivity can be compromised. The risk of accidents could also rise due to the inability of team members to distinguish environmental sounds and warning signals.

## The Solution: The Try, Then Buy Program from 3M

Now there's an easy way to identify what solution can help your organization be more productive while helping to reduce the risk of accidents. With the Try, Then Buy program from 3M, you can evaluate a 3M™ Peltor™ High Noise Communication Solution\* before you make a purchase. Learn how communication can be easier, safer and more productive in your work environment.

### Here's How the Program Works:

1. Register for the program by calling 1-800-665-2942 ext. 3, or by signing up at [3M.com/Try-ThenBuy](http://3M.com/Try-ThenBuy).
2. You will be contacted for details regarding your workplace communication challenges. After a potential solution\* has been identified, we will arrange for product(s) to be shipped to your location for evaluation and use in an on-site product trial.
3. The evaluation period will last one week and will be offered with no obligation to purchase. After the evaluation period is complete, 3M will follow up with you to obtain your feedback and determine next steps.

\*Products available for trial include:

3M™ Peltor™ LiteCom™ Pro II Headset Radio  
3M™ Peltor™ MT Series Two-Way Headset  
3M™ Peltor™ HT Series Listen-Only Headset

3M™ Peltor™ PowerCom™ BRS-UHF Two-Way Headset Radio  
3M™ Peltor™ DECT-COM II™ Duplex Radio Intercom System
