

NO: SW-084
DATE: June 2010

PRODUCT: B3F Tactile Switches
TYPE: Material Change Notice

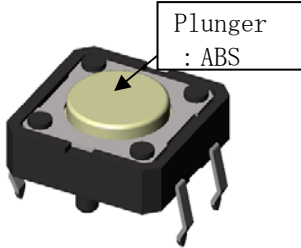

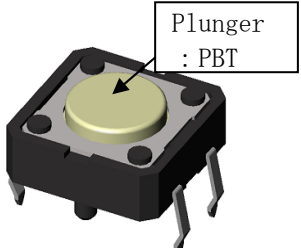

B3F (12 x 12mm): Notice of Tactile Switch Plunger Material Change

Effective as of **July 2010** production, plunger materials will change for the B3F-4000 and B3F-5000 series (refer to the following list for specific products impacted). This measure was taken in order to *improve* heat resistance tolerance of the plunger at current soldering conditions.

Note: neither soldering condition nor product specification change.

**** Sales teams should communicate this change with their OEM's and CEM's promptly.**

[Changes]

Before the change	After the change
Material of plunger: ABS resin 	Material of plunger : PBT resin 

[Details of applicable model]
