1. Introduction

Effective immediately the NL-SW-LTE-QBG96 and NL-SW-LTE-QBG96-B Skywire modems are NRND, not recommended for new design, and for supply chain support the customers must migrate to the NL-SW-LTE-QBG95-B.

This NL-SW-LTE-QBG95-B is in volume production. Contact your supply partner for order placement. For commercial questions please contact sales@nimbelink.com For technical support contact NimbeLink's product support team at product.support@nimbelink.com.

To receive continued supply, NimbeLink recommends that customers immediately begin testing and plan to transition to the NL-SW-LTE-QBG95-B. This is now the recommended modem for long-term production. The NL-SW-LTE-QBG96 and NL-SW-LTE-QBG96-B will still be available but listed as NRND. Lead-time is at this time not available from the manufacturer.

2. Migration Overview

All new orders should use part number NL-SW-LTE-QBG95-B

The NL-SW-LTE-QBG96 and NL-SW-LTE-QBG96-B migration guide to the NL-SW-LTE-QBG95-B is found here:

https://nimbelink.com/Documentation/Skywire/4G LTE Cat M1 Quectel/1002637_NL-SW-LTE-QBG9x Migration Guide.pdf

The NL-SW-LTE-QBG96 or the NL-SW-LTE-QBG96-B devices are not planned for EOL. The reason for this required change is supply chain availability of the underlying BG96 module.
