Discontinuation of FPS-H and FPBAG-H

Dear Valued Phihong Customer:

As you should have been informed in December 2020, the Australian/New Zealand safety approval for PSA10F-050-R, PSA10F-050(P)-R, PSA10F-050Q-R, PSA10F-050Q(D)-R, and PSA10F-050Q(S)-R will be expiring soon (July 13, 2021). The PSA10F models are the last of the F series adapters, including the PSA03F-050Q1-R, PSA05F-050QAL6-H and PSA05F-050QAL6D-H, to have valid Australian/New Zealand safety approvals. That the last of the F series' Australian/New Zealand safety approval is expiring and the regulatory agencies will no longer accept the FPS-H clips, the FPS-H clip and the FPBAG-H will be discontinued. Phihong will no longer accept new builds of either the FPS-H or the FPBAG-H and all orders will be from Phihong USA stock or current open orders with the factory.

Phihong will be introducing the FPBAG1-H, that contains the FPE-H and FPK-H clips, to replace the FPBAG-H. Pricing for the FPBAG1-H will be released soon on a new price list.

Thank you for your understanding.

Sincerely,

Thomas Chin
Sr. Marketing Manager
Phihong USA Corp.
