Announcement of impact by fire at Asahi Kasei Microdevices
Nobeoka Plant

Dear Sir/Madam

A fire broke out at the Asahi Kasei Microdevices Nobeoka Plant, which manufactured parts for Tamura current sensor products. We supposed that delivery of Tamura current sensor will be impacted significantly. We apologize for the inconvenience caused, please consider other alternative products instead.

Thank you very much for your understanding and support.

1. Model name

LA01M, LA01P, LA02P, LA03P, LA04P Series products

2. Background

Above series are OEM-supplied by Asahi Kasei Microdevices.

Due to the fire at Asahi Kasei Microdevices Nobeoka factory in October 2020, the supply of the above products is supposed to be suspended for long period of time. (We are waiting for more details from AKM.)

3. Countermeasure

From now on, we will stop accepting new orders.

Please confirm with sales staffs whether the ordered products can be delivered on time or not.

4. Request

As stated in the attached notification, please consider changing to an alternative product. Some of Tamura in-house manufactured products have the similar input /

output specifications. However, depending on the conditions of usage, we may offer alternative products from other companies those also suggested by Asahi Kasei Microdevices. Please contact our sales staff for details.

If you have any concerns or questions about the matter above, please do not hesitate to contact our sales for details.

Sincerely Yours
