Date	April 2014

The –G2 suffix is regarding standard temperature (T85) Global D4 switches. There has been a plastic material change used for the switch housing; PET to PA6. As a result, the color is now Black. The button color for all part numbers with D41-D45 prefixes is harmonized into black, but the plastic material is unchanged. This does NOT apply to existing high-temperature (T125) rated switches, which will remain White in color. The –G2 suffix will however apply to all new/special T125 part numbers.

Kind regards,

Mike McElhone
