Sites Affected:

onsemi Sites

None

External Foundry/Subcon Sites

Diodes, Maine, United States

Description and Purpose:

onsemi would like to inform out customers of the qualification of our FS50 Technology into the 8" Diodes, Maine, US FAB Foundry. This technology was processed out of our 6" foundry Macronix (MXIC) in Taiwan. MXIC announced it will discontinue this technology, thus necessitating the transfer.

While the typical language of the FPCN is to wait 90 days until shipments of first material, as there is no inventory of MXIC wafer, die, assembly WIP or finished goods either at onsemi or at our distributors, there will be no waiting period for approval or rejection of the PCN and deliveries will start immediately. If a customer does not wish to receive product from the new wafer FAB, they should take action to cancel or push out all future orders. onsemi can no longer provide material from the original MXIC FAB site. Customers should work with their local sales contacts to cancel or push orders as needed.
