TE Connectivity

Product Change Notification: E-21-002561

PCN Date: 04-MAR-21

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description: SOCKET ASSY, 2-35mm, CRIMP

Description of Changes

To increase the retention of the retaining spring on the socket, the inner diameter of the retaining spring and the outer diameter of the socket were both reduced for -4 and -5 to create a tighter fit between the spring and the socket and the height of the retention tines on the spring were increased accordingly to maintain the proper location of the tip of the retention tines on the spring were increased accordingly to maintain the proper location of the tip of the retention tines on the spring were increased accordingly to maintain the proper location of the tip of the retention tines with respect to the ledge in the housing that these tines make contact with. For -1 and -2, only the width of socket shoulder shown as dimension K in customer drawing is changed.

Reason for Changes:	
	ase the retention of the retaining spring on the socket to eliminate the possibility of the retaining spring from becoming ensure that all the locking tines on the retaining spring deploy properly in the housing after the socket is inserted into
