Product Change Notification

Type: Advanced Product Change Notification
 Product Change Notification

Date: July 13, 2022

PCN Number:

PCN-22-01

Subject:

ADT002-10E Rotation Sensor

Description of changes:

The ADT002-10E will continue to be available with the following changes:

- FAULT sensor functionality has been removed.
- The max. Angular Hysteresis specification has been increased from 6° to 8°.

NVE part numbers affected:

ADT002-10E and corresponding T&R versions.

Last buy date: May 2022

Last ship date: May 2022

Reason for the changes:

- Lack of customer interest in FAULT sensor functionality.
- Unmanageable yield with existing Angular Hysteresis specification.
- Possible output jitter with existing Angular Hysteresis specification.

Replacement Parts:

ADT001-10E retains the FAULT sensor functionality but has more Angular Hysteresis.
