Dear Customer,

13-Aug-2020

SRA Soldering Products hereby gives official notification that the products listed in this Notice are being rendered Obsolete.

Obsolete SKU's:

- AOSP4000
- AON-1310

Where possible, we have identified recommended replacements based on the best available and closest substitute from our active product line. The recommended alternate may not be the best for all applications as specific physical or performance parameters may be more critical than others in a particular application. For this reason, it is recommended that you speak with our local sales representative to determine if another model may be more appropriate.

Obsolete SKU	Replacement SKU(S)
AOSP4000	SP1800
AON-1310	AON-1320; AON-1315
