<b>DATE ISSUED:</b>	January 11 <sup>th</sup> 2023	<b>TRACKING NUMBER:</b>	4134968
<b>ISSUED BY:</b>	Sierra Wireless Product Management		
<b>PRODUCTS AFFECTED:</b>	RC7630, RC7630-1		
<b>SKUS AFFECTED:</b>	1104812, 1104743, 1104912, 1104924, 1104813, 1104742		
<b>BULLETIN:</b>	New SKU Introduction, Deprecation of SKUs		
<b>URGENCY:</b>	Normal		
<b>FOR DISTRIBUTION TO:</b>	Sierra Wireless Distribution and RC7630 Customers		

**Summary**

Sierra Wireless is discontinuing the affected SKUs listed in this Product Bulletin, which include a Sierra Wireless Ready-to-Connect (“R2C”) eSIM. Corresponding new SKUs will be available *without* Sierra Wireless R2C eSIM.

The eSIM is currently provided on certain SKUs to give the option for customers to use Sierra Wireless Smart Connectivity without the need of an external SIM. Customers wishing to subscribe to the Sierra Wireless’ Smart Connectivity service can use external Sierra SIMs, or discuss the possibility of ordering a SKU with eSIM with their account manager. Setup of new SKUs with Sierra Wireless R2C Rich Profile eSIMs will be considered upon request.

**Details of Change**

The R2C eSIM is depopulated in the replacement SKUs listed in the table below. The default setting of GPIO6 of RC7630 will be reconfigured to be “External SIM Switch” to accommodate the depopulation of the eSIM component. Aside from these changes, there is no other impact on fit, form, or function of the product, nor does it have any impact on country, industry, or Mobile operator certifications.

For existing designs customers are encouraged to migrate to the new SKUs as soon as possible. Existing purchase orders can be updated to replace deprecated SKUs (w/ eSIM) with new SKUs (w/o eSIM) without any negative impact to order priority.
