

Part Change Notice: CE2*001*0* Female and Male Coaxial Contact Abolition of Desiccant and Plastic Bag Packaging

Currently, when packing CE2*001*0* female and male coaxial terminals, each bundle is packed in a plastic bag with a desiccant. However, we have decided to discontinue plastic bag packaging and the use of a desiccant as we no longer see the value in this method, and there is no difference to the connector's performance without it.
