

Product/Process Change Notice - PCN 18_0049 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

PCN Title: Assembly Site Transfer of AD5592R LFCSP Product to ASE Chungli
Publication Date: 24-May-2018
Effectivity Date: 26-Aug-2018 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:
Initial Release.

Description Of Change:

- Assembly site transfer from Amkor Philippines (AP3) to ASE Chungli (AET)
- Qualification of die attach film for Chip-on-lead process (DAF-COL)
- Package Outline Dimensions (POD) will remain the same except for pin 1 identifier. (Please refer to POD, Pin 1 and BOM comparison in the Supporting Documents section of this PCN).
- A different DAF material and mold compound series will be used.

Reason For Change:

Amkor Technology Philippines has issued a notification that they will phase out and no longer support screen print die attach process. ADI assembly suppliers manufacture ADI products using Analog Devices specified assembly process flows, materials, process controls and monitors. This assures that ADI customers receive the same level of quality and reliability on products they receive from different manufacturing locations. ASE Chungli Taiwan (AET) is currently one of ADI's qualified assembly subcontractors and is in high-volume production of various ADI products and packages.

Impact of the change (positive or negative) on fit, form, function & reliability:

The change will have no impact on fit, form, function and reliability of the devices.

Product Identification *(this section will describe how to identify the changed material)*

The parts that will be assembled after the transfer will be identified by assembly lot number and date code.

Summary of Supporting Information:

Qualification will be performed per Industry Standard Test Methods. See attached Qualification Plan.
