

### Application

- Operating voltage range: 12-1,800VDC, continuous 350A, break current of 2,300A
- Ideal for Circuit protection, control, battery switch and main power break, etc.
- Built-in coil economizer:
  - Holding power @4W with no limitation of temperature and voltage
  - EMI spectrum has been tested and approved
  - Built-in coil suppression
- Hermetically Sealed contact chamber to protect all moving parts
- Able to handle harsh environments
- Provided with sealed control wire connector

### Nomenclauture

### **Performance Data**

MAIN CONTACT	LIFE	DATA	
Contact arrangement	1 Form X (SPST-NO DM)	350A @ 450VDC (make/break)	3,000 cycles
Rated Operating Voltage	12-1,800VDC	350A @ 650VDC (make/break)	1,000 cycles
Continuous (Carry) Current	350A <sup>*1</sup>	Mechanical life	200,000 cycles
Short term Carry Current	400A (6.5 minutes) *2	AUX. CONTACT	
Max short circuit current	2,300A @ 450VDC (1 cycle)	Aux. Contact Arrangement	SPST-NO (1 Form A)
Dielectric Withstanding Voltage	Between open contacts: 4,000VDC (leakage ≤1mA)	Aux. Contact Rating (Max Wattage)	10W
	Between contact and coil: 2,200Vrms (leakage ≤1mA)	Aux. Contact Rating (Max Voltage)	100 VDC
Insulation Resistance	Terminal to Terminal / Terminal to Coil	Aux. Contact Resistance (Max)	500mΩ
	New: Min 100MΩ @500VDC		
Voltage Drop (@350A)	≤120mV

### CURRENT-TIME CURVE

## **Outline Dimensions: inches (mm)**

## **Application Note:**

- 1. Be sure to use washer to prevent screws from loosening, all the terminals or copper bar must be in direct contact with the contactor's terminals.
  - Contact Terminal Torque: 53 70 lb.in (6 8 N.m)
  - Mounting Torque: 15 30 lb.in (1.7 3.3 N.m)
- 2. Contact terminals are polarized so refer to drawing during connecting. There is a reverse surge absorption circuit so that it is not necessary to use a surge protective device.
- 3. Do not use if dropped.
- 4. Avoid installing in a strong magnetic field (close to a transformer or magnet), or near a heat source.
- 5. Electrical life

Use per load capability and life cycle limits so as not to cause a function failure (treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure occurs. It is necessary to take layout considerations into account and to make sure power shall be cut off within 1 second.

6. Avoid debris or oil contamination of the main terminals to optimize contact and avoid excess heat generation.
