Your Ref.	
Our Ref.	
Date	5/27/15

We recently did some testing on the AN9 sensors and found that we are able to increase the Ingress Protection rating from IP67 to IP68. Since the conditions need to be specified by the manufacturer, a one-line explanation is added on the data sheet detailing that the sensor was submerged for an hour under 2 m of water at 22 degrees C.

While the datasheets will be updated on our end, please make sure to update this change on your website if applicable.

Note: This change does not affect our AN1 or AN8 series sensors.

Kind regards,

Ryan Eder
