

Product Change Notification

SN132-001 End of Life Notification

Issue Date: January 1, 2021

Effective Date: January 1, 2021

Devices

Part Number	Description
SN132-001	SNAP Through-hole to USB Paddle Board, no radio

Description of Changes

The SN132-001 has been moved to End of Life and once the existing inventory has been depleted will no longer be offered for sale.

Reason for Change

There has been little demand for this product and hence it no longer makes sense to maintain production or inventory.

Recommended Alternative Product(s)

The higher volume SN220-001 "SNAP Stick" USB SNAP radio is a suitable substitute for most development and production needs. It is smaller and self contained including the printed F antenna in a plastic enclosure.
