

LS HOLLOW CORE FIBERGLASS POLES

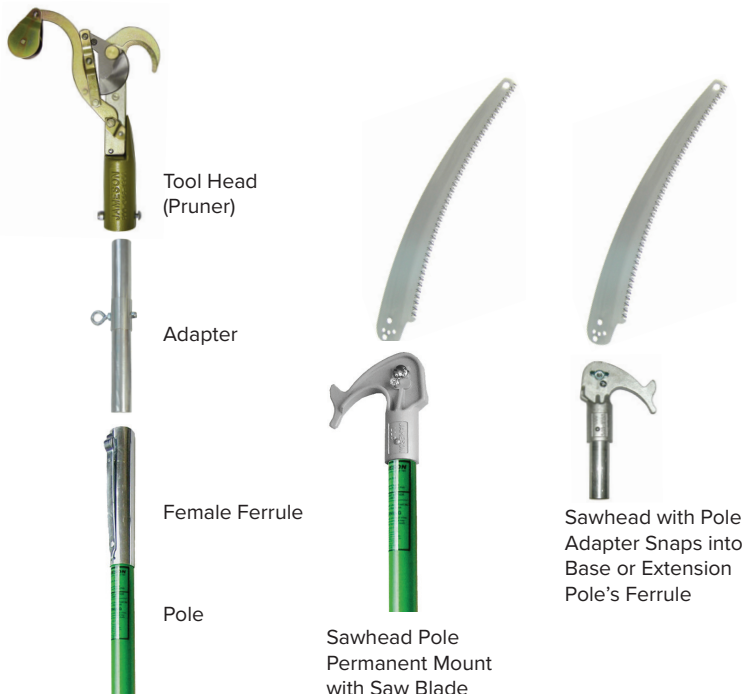

PREFERRED CHOICE FOR LANDSCAPERS AND HOMEOWNERS

Jameson LS Series Fiberglass Poles are constructed for Landscaping professionals as well as homeowners. They feature a hollow core and slightly thinner walled construction making them a good choice for applications where the pole won't be used all day long. The poles are light and flexible, yet tough and are constructed with a tough surface veil that prevents them from shedding fiberglass slivers.

- Polymer protective surface veil prevents fiber blooming at surface due to abrasion or ultra-violet light
- Lightweight, rigid, extremely durable and available in lengths of 4, 6, 8, 10, and 12 feet.
- Extension poles are equipped with a male ferrule on one end and a female ferrule on the opposite end constructed of aircraft grade aluminum
- Ferrules are made of aircraft grade aluminum with external leaf spring locking button
- .100" Wall Thickness, 1.25" Pole Diameter, 1.9 lbs. (Based on 6' extension pole)

These poles are not tested

Not A "Hot Stick" - Not For Use On Energized Lines

Pole Length	4'	6'	8'	10'	12'
Base	LS-4F	LS-6F	LS-8F	LS-10F	LS-12F
Extension	LS-4	LS-6	LS-8	LS-10	LS-12
Saw Head	LS-4SFP	LS-6SFP	LS-8SFP	LS-10SFP	LS-12SFP

For highest performance and safety, Jameson recommends using a Base Pole when using one pole or starting with a Base Pole when working with multiple poles.
