Radio frequency identification 13.56 MHz XG range

Compact smart antennas, Ø 22 mm mounting

XG range

RFID is the abbreviated term used to designate radio frequency identification systems. These frequencies range between 50 kHz and 2.5 GHz. The most widely used is 13.56 MHz.

The XG range RFID system is used to identify operators on machines by means of contactless RFID cards or key fobs.

Operator ID information is stored in a memory that can be accessed using a simple radio frequency link. This memory is in the form of an electronic tag, which contains an antenna and an integrated circuit.

When a tag enters the field generated by the reader/smart antenna, it detects the signal and exchanges data (read or write) between its memory and the reader/smart antenna.

Telemecanique Sensors offers 3 smart antennas for mounting on a control panel. These XG smart antennas are designed for identifying operators on systems such as:

- mobile access platforms for trucks and elevators
- electric vehicle charging stations
- machine control panels
- automated tools, presses, and assembly lines, etc.

Rapid and efficient access control

- > XG smart antennas identify operators by means of their RFID card or electronic key fob in order to determine which operations they are authorized to access.
- > One model has 2 integrated LEDs on the front. These multi-color LEDs are used to guide the operator by means of visual indications controlled by the automation system via the smart antenna's Modbus serial link. There is a choice of 7 different colors that can also be combined with flashing.

Easy to install

- > Less machining: The smart antenna is mounted on a panel through a standard Ø 22 mm hole and manually tightened to secure in place using a single locking nut.
- > Less wiring: A single M12 connector is required for the smart antenna power supply (and network connection for XGCS49LB201 and XGCS490B201 smart antennas).
- > Dedicated accessories, such as network T-connectors and M12 cables, are available to facilitate daisy-chain connections (1).

Easy to configure

- > The network address can be set simply by presenting the RFID card supplied with the smart antenna.
- > Integrated network and RFID functions
- > No programming
- > Automatic detection of RFID electronic tags (read or write)
- > Automatic setting of communication parameters (speed, format, parity, protocol, etc.)
- > Read/write compatibility with the majority of 13.56 MHz tags on the market
- > Low sensitivity to metal environments
- > User cards for the XGCS491B201 standalone smart antenna can be enrolled without the need for any special software using configuration kit XGSZCNFAC.

(1) Up to 15 XG compact smart antennas can be connected to the same network. All connections are made via M12 connectors, using a complete range of cables and T-connectors. Please consult our website www.tecsensors.com.

Easily integrate operator ID functionality into your machines

Radio frequency identification 13.56 MHz XG range

Compact smart antennas, Ø 22 mm mounting

Rugged and compact

A monobloc device designed for harsh environments

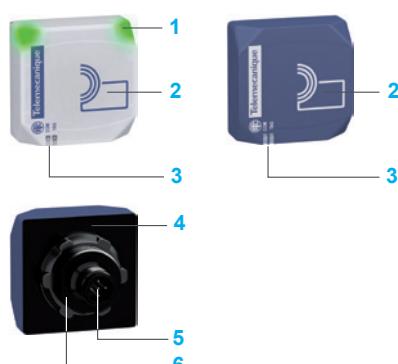

- XG smart antennas, with their sleek, clean design with no screws on the front face, are intended for use in industrial environments, particularly in cleaning applications in the medical and food and beverage sectors.
- The extended operating temperature range means that XG smart antennas can operate in some of the harshest conditions.
- XG smart antennas are highly compact, measuring just 40 x 40 x 40 mm, and have a simple mounting system via a nut on the rear, meaning they can be easily integrated into even the smallest of spaces.
- XG compact smart antennas offer a tried-and-tested solution that has been validated through numerous laboratory and field tests.

Worldwide compatibility

With 13.56 MHz standards

- The XG identification system is open to the majority of ISO 18000-3, ISO 15693, and ISO 14443 electronic tags.
- With their low power consumption (< 60 mA) and a choice of suitable materials, XG smart antennas are environmentally-friendly.

Use

Description

- 1 LEDs for informing the operator (7 different colors can be selected and combined with flashing)
- 2 Network address configuration
- 3 RFID and communication diagnostic LEDs
- 4 Seal
- 5 M12 connector for power supply (and connection to the Modbus RTU network for XGCS49LB201 and XGCS490B201 smart antennas)
- 6 Locking nut for mounting in Ø 22 mm hole

Compact smart antennas, Ø 22 mm mounting

Characteristics of XG compact smart antennas

Smart antenna type	XGCS49LB201	XGCS490B201	XGCS491B201
--------------------	-------------	-------------	-------------

Certification	CE, cULus, IC, FCC part 15			
Conforming to standards	EN 301489-1, EN 301489-3, EN 300330-1, and EN 300330-2			
Ambient air temperature	For operation	°C	-25...+70	
	For storage	°C	-40...+85	
Degree of protection	Conforming to IEC 60529		IP 69K (front) IP 65 (rear)	
Vibration resistance	Conforming to EN 60068.2.6	2 mm from 5 to 29.5 Hz/7 gn from 29.5 to 150 Hz		
Shock resistance	Conforming to EN 60068.2.27	30 gn/11 ms		
	Conforming to EN 50102	IK 04		
Resistance to interference	Conforming to IEC 61000	Resistance to electrostatic discharge, radiated electromagnetic fields, fast transients, electrical surges, conducted and induced interference, and network frequency magnetic fields		
Dimensions (W x H x D)	mm	40 x 40 x 40		
RFID frequency	MHz	13.56		
Nominal sensing distance	mm	20 to 70 depending on associated tags		
Type of associated tag		ISO 15693 and ISO 14443 standardized tags Automatic detection of tag type		
Examples of RFID compatible chips		Fujitsu (MB89R118), NXP (I-Code SL2, SL1, Ultralight, Std 1K/4K), Texas (Tag-it HFI), µEM4135		
Nominal supply voltage	V	24 --- PELV (protective extra-low voltage)		
Supply voltage limits (including ripple)	V	19.2...29 ---		
Power consumption	mA	< 60		
Interface	Physical interface	RS 485		PNP discrete output 300 mA protected against short-circuits and overloads
	Protocol	Modbus RTU		—
	Data rate	9,600...115,000 baud (automatic detection)		—
	Medium (see cable references on page 7)	2-pair shielded twisted pair cable with M12 connector, A-coded		3-wire unshielded cable with M12 connector, A-coded
Display	To inform the operator	2 multi-color LEDs (choice of 7 colors) controlled by Modbus requests	—	—
	For communication	1 bi-color LED (Tag presence/Dialog between smart antenna and tag)		
		1 bi-color LED (Modbus network activity)		1 bi-color LED (output/status)
Connections		1 male M12 5-pin connector (see connections on page 9)		
Tightening torque	Locking nut	2.2 Nm ± 0.2/19.5 lb-in ± 1.8
