

Date: December 17th, 2020

**Subject:** Product change notification

Dear Customer,

In August 2019 4D Systems made some changes to individual parts included in some of its Intelligent Display Module Starter Kits.

The gen4-IoD Programming Adaptor was replaced by the 4D-UPA Universal Programming Adaptor. And the gen4-IoD-Programming Adaptor was discontinued.

This affected a handful of starter kit parts and was already communicated and the information was updated in the submitted parametric data at the time.

However, at the time we overlooked marking the gen4-IoD Programming Adaptor as an EOL part. Please take this letter as the official announcement that the gen4-IoD Programming Adaptor is no longer available and has been replaced by the 4D-UPA Universal Programming Adaptor.

We are consistently dedicated to providing our customers with excellent products and services. If you have any questions, please contact your 4D Systems Account Manager.

Please feel free to contact us if you have any questions or concerns regarding this announcement.

Sincerely,

Markku Riihonen  
Global Products and Business Development Manager  
**4D Systems**
