

#### Features

- · Constant Current mode output
- · Flicker free design
- · Plastic housing with class II design
- Built-in active PFC function
- No load power consumption<0.5W(Blank-Type), Standby power consumption<0.5W(DA-Type)
- Function options: 2 in 1 dimming (dim-to-off); Auxiliary DC output; DALI
- 3 years warranty

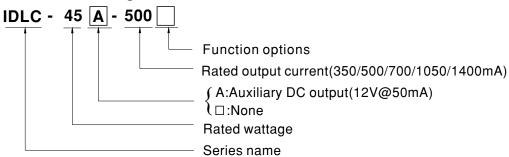

# Applications

- LED panel lighting
- LED flood lighting
- · Indoor LED lighting

## Description

IDLC-45 series is a 45W LED AC/DC driver featuring the constant current mode output with flicker free design.IDLC-45 operates from 90~295VAC and offers models with different rated current ranging between 350mA and 1400mA. Thanks to the efficiency up to 86%, with the fanless design, the entire series is able to operate for  $-20^{\circ}\text{C} \sim +85^{\circ}\text{C}$  case temperature under free air convection. IDLC-45 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for lighting system.

# ■ Model Encoding

Type	Function	Note
Blank	2 in 1 dimming (0~10VDC and 10V PWM)	In Stock
DA	DALI control technology	In Stock

Note: The DALI control model(DA Type) only for IDLC-45 Non Auxiliary DC output models.

## ■ DRIVING METHODS OF LED MODULE

 $\ensuremath{\ensuremath{\mathbb{X}}}$  This series works in constant current mode to directly drive the LEDs.

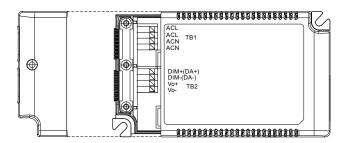

Typical output current normalized by rated current (%)

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems.

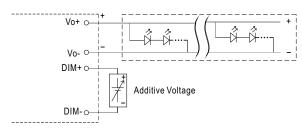

Should there be any compatibility issues, please contact MEAN WELL.

## **■ DIMMING OPERATION**

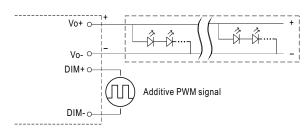

#### **\* 2** in 1 dimming function

- Output constant current level can be adjusted by applying one of the two methodologies between DIM+ and DIM-:
   0 ~ 10VDC, or 10V PWM signal.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- O Applying additive 0 ~ 10VDC

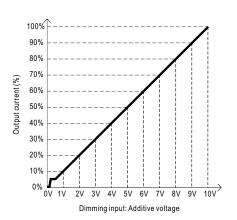

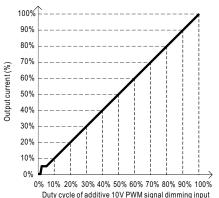

"DO NOT connect "DIM- to Vo-"

O Applying additive 10V PWM signal (frequency range 300Hz ~ 3KHz):

"DO NOT connect "DIM- to Vo-"

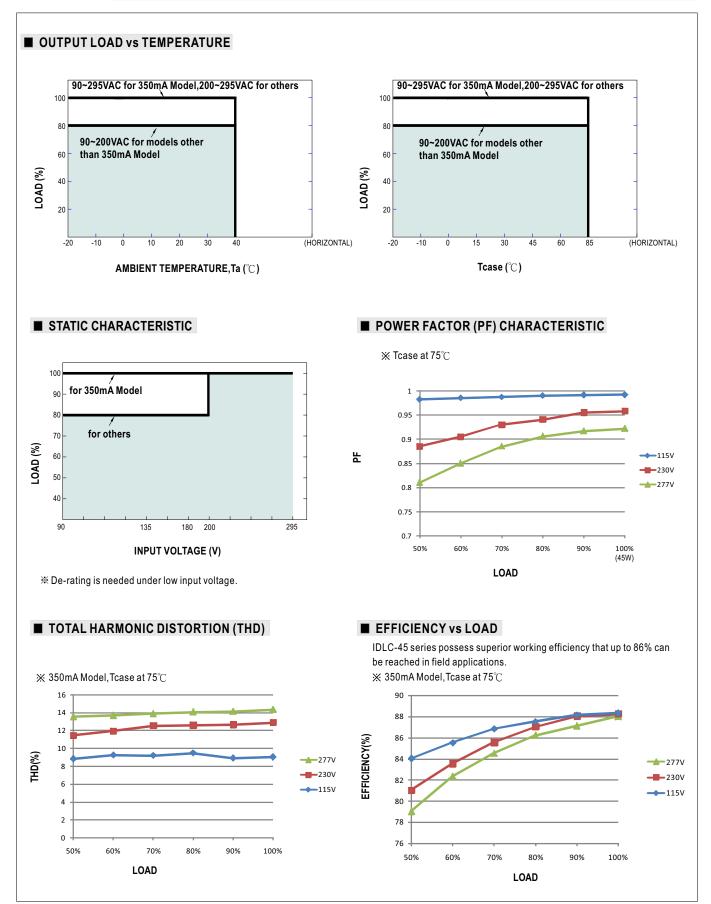

#### **※ DALI Interface (primary side; for DA-Type)**

- · Apply DALI signal between DA+ and DA-.
- DALI protocol comprises 16 groups and 64 addresses.
- First step is fixed at 8% of output.

Note: 1. Min. dimming level is about 8% and the output current is not defined when 0% < Iout < 8%.

2. The output current could drop down to 0% when dimming input is about 0Vdc or 10V PWM signal with 0% duty cycle.

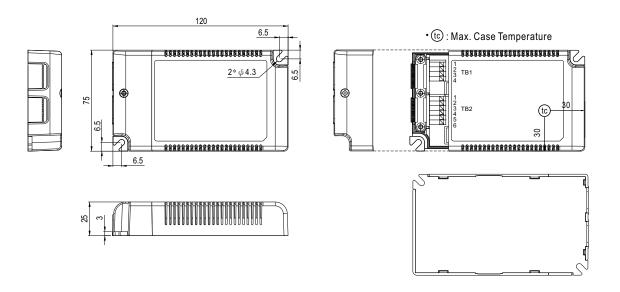

#### **■ MECHANICAL SPECIFICATION**

Case No.IDLC-45A

Unit:mm

NOTE: Please use wires with a cross section of 0.75~1.5mm $^2$  for TB1 and wires with a cross section of 0.5~1.5mm $^2$  for TB2.
