RE: Part Number IO-E4231S-6CMR-1000B

Dear Ms. Samuelson:

This memo is to confirm that Io Audio Technologies part number IO-E4241S-6CMR-1000B has been discontinued. A product improvement was performed and IO-E4231S-6LZH-1000B is our new product that is used in similar use cases as the old product.

Knight Electronics routinely makes changes to the designs of our Commercial Off the Shelf (COTS) products as we respond to the availability of raw materials, global manufacturing requirements, and the state of the art in product design. The manufacturing of the model in question was recently moved to our Taiwan manufacturing facility, and at that time we made design changes to best match emerging market requirements and the raw materials available at our Taiwan manufacturing plant.

We recognize that the new Low Smoke Zero Halogen product is a different specification from the original CMR type product and may not be considered a perfect drop-in replacement in all applications. The change in the product design is not an assembly error or defect of any kind. As stated on our data sheets, information and data is subject to change without prior notification. It is our company policy that we do not issue Product Change Notices (PCN) for any COTS product. We retain the ability to make the previous design for the customer, subject to minimum order quantities and are happy to quote that option if so desired.

We apologize that this change has caused any disruption.

Sincerely,

John Crutti

Engineering Manager

Knight Electronics Inc. / Orion Fans / Io Audio Technologies
