FUNCTION:

Pin No.	Pin Name	I/O	Function
1	CLKOE	Input	This is an input pin used to control the output mode of the CLKOUT pin. When this pin's level is high, the CLKOUT pin is in output mode. When it is low, the CLKOUT pin is "Hi-Z" (High Impedance).
2	/INT	Output	This pin is used to output alarm signals, timer signals, timer update signals, and other signals. This pin is an open drain pin.
3	N.C.		This pin is open.
4	VSS		This pin is connected to ground.
5	CLKOUT	Output	This pin outputs a 32.768kHz signal. This is the C-MOS output pin with output control provided via the CLKOE pin.
6	SCL	Input	This is the serial clock input for I ² C BUS communications.
7	SDA	I/O	This is the serial data input/output for I ² C BUS communications. This pin's signal is used for input and output of address, data, and ACK bits, synchronized with the serial clock used for I ² C communication. This pin is an N-ch open drain pin during output.
8	VDD		This pin is connected to a positive power supply.
