Description and Extent of Change

Lantronix is pleased to announce the availability of new firmware release **1.9.0.1R4** for xPico 240 and xPico 250 line of embedded gateways.

Key highlights of this release are:

- Support for bridging multiple Ethernet hosts over the Soft AP interface
- Support for bridging multicast packets (configurable bridge IGMP IP address)
- Support for channels 36, 40, 44 and 48 to China region code
- Support for configurable DHCP server address range
- HTTP Server now support three concurrent sessions for quicker response to WebAPI and WebUI requests

Refer to the release notes for a complete list of additional features and bug fixes.

Effect of Change on Fit, Form, Function, Quality, or Reliability

Functional changes as noted above.

For customers that would like to take advantage of the new capabilities immediately, the new firmware, associated release notes and upgrade instructions are available for download from our website, <http://www.lantronix.com/support/downloads>.

An updated SDK release is available for download via Lantronix forums (<http://forums.lantronix.com>).

Effective Date of Change

Affected products began shipping with the new software from Lantronix starting July 15, 2018.
