

# SmartOnline 120V 1500VA 1.35kW Double-Conversion UPS - 6 Outlets, Extended Run, Card Slot, LCD, USB, DB9, 2U

MODEL NUMBER: SU1500RTXLCD2U

On-line double-conversion UPS provides pure sine wave AC output to server and network equipment in data centers and computer rooms.

#### **Features**

Double-Conversion UPS Protects Equipment against Damage, Downtime and Data Loss
This 100/110/120/127V 50/60 Hz UPS system with IGBT technology maintains perfect output by
converting AC input to DC, then reconverting UPS output to fully regulated sine wave AC with +/-2%
voltage regulation in online and battery modes. Featuring a 1350W capacity, high 0.9 power factor, 570
joules of surge suppression, true on-line operation with pure sine wave output and zero transfer to battery
mode in on-line double-conversion mode, the SmartOnline® SU1500RTXLCD2U double-conversion UPS
provides the highest level of AC power protection and battery backup for critical network closet, computer
room and data center equipment.

Individually Controllable Load Banks Let You Access and Control Outlets Remotely
Six NEMA 5-15R outlets are split evenly into two switchable three-outlet load banks, allowing you to reboot select components or shed loads remotely.

Reliable, Expandable Battery Backup Keeps You Operational Through Power Outages

The field-replaceable, hot-swappable internal battery provides 14 minutes of support at half load (675W) and 4.2 minutes at full load (1350W), keeping protected equipment operational through power failures. For mission-critical applications demanding scalable extended runtime, the UPS supports external battery packs, such as Tripp Lite's BP48V24-2U (sold separately). The intelligent battery management system with temperature-compensated charging extends battery life.

**ENERGY STAR-Certified Economy Mode Helps You Save Money and Protect the Environment**By meeting strict EPA efficiency guidelines, this ENERGY STAR-certified UPS system helps you save money and energy. A power-saving Economy mode setting option offers enhanced efficiency and reduced BTU output when utility power is already high quality.

# Automatically Turns Back On After Power Is Restored

Battery-independent restart ensures automatic UPS power-up without user interaction after lengthy power outages, even when batteries are expired and require replacement.

Intuitive Front-Panel Interface for Convenient UPS Operation and Monitoring

## **Highlights**

- Offers network-grade protection against power failures and voltage fluctuations
- Zero transfer time between online and battery modes for uninterrupted operation
- Optional external battery packs provide additional runtime for applications requiring it
- Optional WEBCARDLX network interface required to use Auto Probe feature
- ENERGY STAR-certified to save electricity, lower costs, and protect the environment

#### **Applications**

- Deliver perfectly regulated sine wave output to mission-critical equipment
- Protect connected components from dangerous surges, spikes and line noise
- Keep equipment operational through power failures
- Allow time to save data and safely shut down components in case of a prolonged blackout

### **Package Includes**

- SU1500RTXLCD2U
   SmartOnline Double-Conversion
   UPS
- USB cable
- RS-232 cable
- EPO cable
- 4-post rack-mounting hardware
- Owner's manual

The front-panel LCD features nine selectable screens of UPS data (including load, voltage and battery data) and 16 screens of configuration and setup options. LEDs indicate line power availability, AC to DC conversion, battery mode operation, inverter mode, ECO mode operation, bypass mode operation and AC output status.

#### Advanced Communications Ports Allow for Automatic Saves and Shutdowns

RS-232 and HID-compliant USB ports connect to a computer running Tripp Lite's free downloadable PowerAlert® software to enable safe unattended file saves and system shutdown in case of a prolonged power failure. An EPO port connects the UPS to a contact closure switch to enable emergency inverter shutdown. Cables are included.

#### Optional WEBCARDLX Network Interface Offers 24/7 Access

The SU1500RTXLCD2U includes a slot for an optional Java-free HTML5-based WEBCARDLX (sold separately) that enables full remote access for site power and UPS status monitoring, configuration, control and email notifications via secure web browser, SNMP, telnet or SSH. It supports 10/100 Mbps auto-sensing for optimum communication with an Ethernet network. Automated alerts help prevent accidental overloads, power loss and downtime. WEBCARDLX 15.5.2 or later is required to use the Auto Probe feature, which can prevent costly service calls by automatically rebooting non-responsive network devices.

## **Versatile Installation Options**

Hardware is included for mounting the UPS system in 2U of space in an EIA-standard 19-inch 4-post rack. Use the optional 2POSTRMKITWM (sold separately) for 2-post rack mounting or the optional 2-9USTAND (sold separately) for mounting in an upright tower position. The 10-ft. (3.05 m) power cord with NEMA 5-20P plug connects to any compatible AC outlet.

# **Specifications**

| OVERVIEW                           |                                             |  |
|------------------------------------|---------------------------------------------|--|
| UPC Code                           | 037332168610                                |  |
| UPS Type                           | On-Line                                     |  |
|                                    |                                             |  |
| INPUT                              |                                             |  |
| Input Phase                        | Single-Phase                                |  |
| Rated input current (Maximum Load) | 12A                                         |  |
| Nominal Input Voltage(s) Supported | 100V AC; 110V AC; 115V AC; 120V AC; 127V AC |  |
| Nominal Input Voltage Description  | 120V factory default                        |  |
| UPS Input Connection Type          | 5-15P                                       |  |
| Input Circuit Breakers             | 20A                                         |  |
| UPS Input Cord Length (ft.)        | 10                                          |  |
| UPS Input Cord Length (m)          | 3.1                                         |  |
| Recommended Electrical Service     | 15A 120V                                    |  |
|                                    |                                             |  |
| OUTPUT                             |                                             |  |
| Output Capacity (VA)               | 1500                                        |  |
| Output Capacity (kVA)              | 1.5                                         |  |

| Output Capacity (Watts)                       | 1350                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Frequency Compatibility                       | 50 / 60 Hz; Supports 50 to 60 Hz and 60 to 50 Hz conversion                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Frequency Compatibility Details               | ON LINE MODE: Output frequency is automatically configured to match nominal input frequency on startup; Output matches input frequency when +/-5Hz of nominal; Output is regulated to +/-0.05Hz when input frequency exceeds +/-5Hz of nominal. UPS switches to battery mode when input frequency is below 40Hz or above 70Hz. FREQUENCY REGULATION / CONVERSION MODE: Output is regulated to +/-0.05Hz of selected output frequency input is 40 to 70Hz; UPS switches to battery mode when input frequency is below 40Hz or above 70Hz. BATTERY MODE: Output is regulated to +/-0.05Hz.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| VOLTAGE REGULATION                                            |                                                                                                                                                                                                                                 |  |
| Voltage Regulation Description                                | Online, double-conversion power conditioning maintains 2% output voltage regulation during brownouts and overvoltages                                                                                                           |  |
| Overvoltage Correction                                        | Corrects overvoltages to 150V (0-100% load)                                                                                                                                                                                     |  |
| Undervoltage Correction                                       | Corrects undervoltages to 100V at full load (90V at 100V nominal)                                                                                                                                                               |  |
| Severe Undervoltage Correction                                | Corrects brownouts to 70V (70% load) & 55V (33% load)                                                                                                                                                                           |  |
| USER INTERFACE, ALERTS & CONTROLS                             |                                                                                                                                                                                                                                 |  |
| Front Panel LCD Display                                       | Front panel LCD information and configuration screen offers detailed UPS and site power status and operating data, plus configuration of voltage, frequency, operating mode, alarm function and a variety of additional options |  |
| Switches                                                      | 2 switches control off/on power status and alarm-cancel operation; 2 additional scroll-down and scroll-up / select options enable LCD status viewing and configuration options                                                  |  |
| Alarm Cancel Operation                                        | Power-fail alarm can be temporarily silenced using alarm-cancel switch; silent mode alarm configuration option available                                                                                                        |  |
| Audible Alarm                                                 | Audible alarm indicates UPS startup, power-failure, low-battery, overload, UPS fault and remote shutdown conditions                                                                                                             |  |
| LED Indicators                                                | 7 front panel LEDs indicate line power availability, AC to DC conversion, battery mode operation, inverter mode, eco mode operation, bypass mode operation and AC output status                                                 |  |
| SURGE / NOISE SUPPRESSION                                     |                                                                                                                                                                                                                                 |  |
| UPS AC Suppression Joule Rating                               | 570                                                                                                                                                                                                                             |  |
| UPS AC Suppression Response Time                              | Instantaneous                                                                                                                                                                                                                   |  |
| UPS Dataline Suppression                                      | 1 line TEL/DSL (1 in / 1 out); 10/100Base T Ethernet                                                                                                                                                                            |  |
