

USB-C Dock with Removable Clip - For Laptops and Tablets, 4K HDMI, USB-A Hub, 60W PD Charging

MODEL NUMBER: U442-DOCK15-S

USB-C dock connects to your laptop, tablet or smartphone to add 4K HDMI, USB-A, PD Charging and memory card slots to its USB-C port.

Features

Clips to Your Device's USB-C or Thunderbolt 3 Port to Create a Multipoint Workstation

This USB-C docking station with PD Charging adds multiple ports to the USB-C or Thunderbolt 3 port on your laptop, tablet or smartphone. The U442-DOCK15-S allows you to transmit 4K video and digital audio to a large display, add external memory via USB drive or memory cards, and power and charge a PD Charging-compliant mobile device simultaneously. The USB-C plug clips securely to your tablet or smartphone to prevent it from becoming accidentally disconnected. The clip is removable, letting you connect the USB-C plug to a laptop as well.

Supports USB-C DisplayPort Alternate Mode for Converting Audio/Video Signals

By connecting the USB-C plug to a source device that supports USB DisplayPort Alt Mode, you can output 4K video and digital audio to an HDMI monitor, television or projector without installing special software drivers.

Transmits Crystal-Clear 4K Video and Digital Audio

The U442-DOCK15-S supports Ultra HD video resolutions up to 3840 x 2160 (4K x 2K) at 30 Hz with multi-channel sound. Connect the HDMI port to your display using an HDMI cable (sold separately).

PD 3.0 Charging Port Charges High-Powered Devices via AC Wall Charger

The USB-C Power Delivery port supports power output up to 20V 3A (60W), which is sufficient for charging and powering the connected source device, such as an iPad Pro, Windows laptop or Android smartphone. Just connect the device's AC wall charger to the USB-C PD port. Note: USB-C PD port does not support Quick Charge (QC).

Connects a Keyboard, Thumb Drive and Other Peripherals

The USB-A hub port accepts a USB peripheral, such as a flash drive, mouse, keyboard or printer. It supports USB 2.0 transfer rates up to 480 Mbps and is backward compatible with earlier USB generations. A 3.5 mm audio jack allows connection of a microphone, stereo earbuds or speakers to your USB-C device with a user-supplied cable. Note: Host must support USB OTG (On-the-Go).

Allows External Memory Access
