2. Reason for Termination

The demand for the TCA connector series has been declining for several years. Based on the feedback and forecasts from our customers, demand for the TCA family of products will continue to decline.

3. Possible Replacement Products

There will be no similar replacements available from HARTING. However, alternatives are available from other manufacturers, for example ept and Conec. It is important to note that when changing to other manufacturers, modifications to the PCB design might be necessary due to differences in the connector designs.
