

## Alligator Clip with Female Header

This is a 4 pack of wires with an alligator (crocodile) clip on one end and a female header connection on the other.

Each Alligator Clip cable has a female connector that easily fits onto a standard 2.54mm male connector. Each pack consists of two red cables and two black cables.

These connector wires can also be used to connect a BBC micro:bit to a prototyping board as an alternative to using an edge connector.

### Features

- Wires with an alligator clip on one end and a female jumper cable connector on the other.
- Enables you to connect a BBC micro:bit to a prototyping board as an alternative to using an edge connector.
- Fits onto a standard 2.53mm male connector pin, such as those found on our Edge connector for micro:bit.

### Contents

- 2 x Red alligator to female jumper connector leads.
- 2 x Black alligator to female jumper connector leads.

### Dimensions

- Length: 30cm
