

12ft Molded TOSLINK to TOSLINK Digital Optical Audio Cable

M06-826-12

This 12 foot Toslink (Toshiba Link) is the standard for fiber optic audio connections. It carries a digital audio signal from Home Theater, PlayStation/PS4, Xbox - Pro Series, CD, DVD, Blu-ray, satellite box, cable box and computers to AV receivers for multi-channel surround sound reproduction. Fiber optic cable can faithfully send data without fear of traditional interference that are typical in a copper-based medium. Virtually unaffected by electromagnetic and radio frequency interference, this cable reliably transfers a lossless high fidelity signal for your entertainment. This connection is also known as: optical audio cable; digital optical; fiber optic audio and S/PDIF.

without us, you are just not connected!
