AS3460 – Digital Augmented Hearing firmware upgrade capability

Dear Customer,

ams is pleased to inform you that the Digital Augmented Hearing and Noise Cancellation device AS3460 is capable of being upgraded by firmware updates on a constant basis. From the distributed version 9 the firmware is fully up- and downwards compatible. Hence customer can choose and upload the desired and respective firmware version during the regular production process.

Impact on product

No impact on hardware product. Regular firmware upgrades will up-feature the device and strengthen the value towards the end customer/consumer.

— **Impact on delivery schedule**

No impact on delivery schedule.

Impact on supply chain

No impact on supply chain.

Impact on testing equipment

No impact on equipment.

Impact on packing & shipment

No impact on packing and shipment.
