# PIC32CM MC00 Family Data Sheet Clarifications and Silicon Errata

# PIC32CM MC00 Family

The PIC32CM MC00 family of devices that you have received conforms functionally to the current Device Data Sheet (TBDA), except for the anomalies described in this document.

The silicon issues discussed in the following pages are for silicon revisions with the Device and Revision IDs listed in the following table.

The errata described in this document will be addressed in future revisions of the PIC32CM MC00 family silicon.

Note: This document summarizes all silicon errata issues from all revisions of silicon, previous as well as current.

Data Sheet clarifications and corrections (if applicable) are located in Data Sheet Clarifications, following the discussion of silicon issues.

#### 1. PIC32CM MC00 Errata Issues

The following issues apply to the PIC32CM MC00 family of devices.

### 1.1 Non-Volatile Memory Controller (NVMCTRL)

#### 1.1.1 DATA FLASH

CPU writes to any memory or register while a write or erase operation is ongoing in the Data Flash address space will stall the AHB bus for the duration of the write or erase operation. CPU reads are not impacted.

The stall duration will be up to the maximum time of the Flash write or erase operation:

Page Write time: 2.5 ms Row Erase time: 6 ms Sector Erase time: 8 ms

#### Workaround

Perform Data Flash modify operations in a safe region of the application where CPU writes are not required.

#### **Affected Silicon Revisions**

A1		
X		

#### 1.1.2 CEHL

The Chip Erase Hard Lock (CEHL) feature is not functional and will not provide any code protection capabilities. The Secure Bit (SB) is not affected, and can be used for code protection.

#### Workaround

None.

#### **Affected Silicon Revisions**

A1		
X		

#### 1.2 SERCOM I<sup>2</sup>C

#### 1.2.1 Repeated Start

For Master Write operations (excluding High-Speed mode) in 10-bit Addressing mode, writing CTRLB.CMD = 0x1 does not correctly issue a Repeated Start command.

#### Workaround

Write the same 10-bit address with the same direction bit to the ADDR.ADDR register to generate a Repeated Start.

### PIC32CM MC00 Errata Issues

### 1.2.2 Repeated Start

For High-Speed Master Write operations, writing CTRLB.CMD = 0x1 issues a STOP command instead of a Repeated Start, making repeated start is not possible in that mode.

#### Workaround

None.

#### 1.2.3 NACK and Repeated Start

For High-Speed Master Read operations, sending a NACK (CTRLB.CMD = 0x2) forces a STOP to be issued, making repeated start is not possible in that mode.

#### Workaround

None.

### 2. Data Sheet Clarifications

The following typographic corrections and clarifications are to be noted for the latest version of the device data sheet (TBDA):

**Note:** Corrections in tables, registers, and text are shown in **bold**. Where possible, the original bold text formatting has been removed for clarity.

There are no Data Sheet Clarifications to report at this time.

# 3. Appendix A: Revision History

#### Revision B - 11/2020

The following updates were performed for this revision:

- Updated Silicon Die Revision from A0 to A1
- Updated the errata numbering schema to reflect those errata which were removed

#### Revision A - 07/2020

This is the initial released version of this document.

# The Microchip Website

Microchip provides online support via our website at <a href="www.microchip.com">www.microchip.com</a>/. This website is used to make files and information easily available to customers. Some of the content available includes:

- **Product Support** Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- General Technical Support Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- Business of Microchip Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

## **Product Change Notification Service**

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to www.microchip.com/pcn and follow the registration instructions.

### **Customer Support**

Users of Microchip products can receive assistance through several channels:

- · Distributor or Representative
- · Local Sales Office
- · Embedded Solutions Engineer (ESE)
- · Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: www.microchip.com/support

# **Microchip Devices Code Protection Feature**

Note the following details of the code protection feature on Microchip devices:

- · Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these
  methods, to our knowledge, require using the Microchip products in a manner outside the operating
  specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of
  intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.
