

3M™ Black Super Weatherstrip and Gasket Adhesive, 08008, 5 fl oz

Part Number 08008, 3M ID 60455055602, UPC 00051135080085

Specifications

Adhesive Type	Rubber
Brand	3M™
Case Quantity	6 Cartons per Case
Color	Black
Consistency	Paste
Container Type	Tube
Container Volume	5 fl oz (US)
Net Weight	147.87
Number per Inner	1 per Carton
Volume	5 Fluid Ounce
Work Time	1-5 Minutes

Details

- Forms flexible, waterproof bond that resists vibration
- Easy to brush and spread right from the tube, saving time
- Resists oils, solvents, detergents and temperature changes for permanent repairs
- Bonds to a range of surfaces including vinyl, metal, fabrics and rubber

3M™ Black Super Weatherstrip Adhesive is designed specifically to bond rubber gaskets and weatherstripping to metal surfaces. This flexible, high-strength adhesive helps ensure a tight waterproof seal on car doors, trunks, sun roofs and more. It cures fast and works right out of the tube, holding rubber weatherstripping in place and resisting heat, vibration, oils and detergents.

A Durable Bond Where it Matters Most

You take your auto weatherstripping for granted — until it starts to fail. Our 3M™ Black Super Weatherstrip Adhesive is designed specifically to bond seals and gaskets to metal, ideal for helping ensure a waterproof, airtight seal inside your vehicle. Preferred by auto professionals for decades, this adhesive was developed by 3M to bond with weatherstripping around doors, trunks, T-tops and

sun roofs as well as around your windows. It bonds permanently to a large variety of surfaces including rubber, fabrics, gaskets, seals and metal. The weatherstripping adhesive is very easy to use. Simply squeeze it right from the tube, easily brush and spread as needed on each surface, and let it cure for up to 24 hours. The adhesive remains flexible, yet it resists nearly any condition you're likely to encounter in your vehicle — wind, rain, vibration, temperature changes, detergents, grease and more.

3M™ Black Super Weatherstrip Adhesive can also be used for securing paper, cork or rubber gaskets, or to bond vinyl headliners and side panels. It applies most effectively when used with 3M™ General Purpose Adhesive Cleaner 08984 or 3M™ Gasket Prep and Parts Cleaner 08901.

The Science of Better Vehicle Care from 3M

Since 1925 when one of our lab assistants invented masking tape, 3M has been developing new ways that the science behind adhesive technology can apply to the lives of people like you. Our 3M™ Black Super Weatherstrip Adhesive is a great example — decades of knowledge in a product that specifically delivers better results, and helps you get the most enjoyment and value from the vehicles you own.
