

Product Change Notification

TE Connectivity

Product Change Notification: P-16-013924 PCN Date: 06-DEC-16

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:
TECT - Material change due to component obsolescence

Description of Changes

This notification is to inform our customers that the TECT tubing product from TE Connectivity is changing. Due to a raw material obsolescence we have been forced to change the material used to manufacture the TECT tubing. The modified material continues to meet the manufacturing release specification for this tube type and Fit Form and Function is not impacted. However the material modification does require an update to IMDS records This has been an imposed change on TE by our raw material vendor. As the specification for this product has not changed we plan to make this a running change as stocks of the tube from the original material are depleted. Should the new tube material need to have a PPAP release or if samples are required please contact your Customer Care Professional.
