Dear Valued Customers

Shell shape change for microSD Conn. Push-Pull H=1.28 with Detect Switch 504077-0891/1891

Thank you very much for your patronage of Molex products.
Please be advised that the shell shape used for the subject product will be changed with the following details.

Change Content

- From: <Currently used shell>
- Tail portion is exposed from the top connector.
- To: <New shell>
- It hide the tail portion from the connector top.
- The new shell has the effect as ESD countermeasure.

Molex Product No. Affected

Model No.: 504077-0891/1891

Shape Change

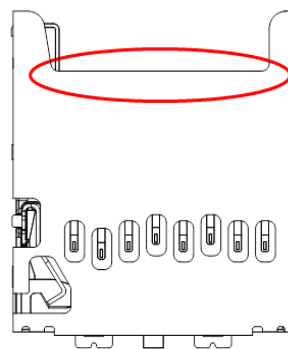

Fig.2 Changed shape

When Change will take place

- We would like to implement the change from our production lots starting from 16th August 2013 and maintain 'First-In First-Out' production lot management during the transition.

Why Change will take place

- About ESD, we must to implement the measures in the current products or more, to be able to use our customers with peace of mind.

Please note that there will be no change to other parts/materials than the shell shape and also that. Our team has conducted evaluation and reliability assurance testing in-house regarding the change and confirmed that there will be no change to the performance and functionality etc. of our products themselves.
