

Vienna, 25th June 2014

END OF LIFE ANNOUNCEMENT

Dear Customer,

Knowles Corporation is committed to delivering high-performing, quality products to our customers with increased operational efficiency. As a result, the decision was made to transition our facility in Vienna to a technology and design center and transfer production to Asia by July 1, 2014.

Most of our production lines are already transferred or on the way. In order to guarantee a smooth transaction an adequate stock was built for all components.

Our production lines for 4,8x10x2,2 mm RA-Receiver (M-Stout):

2403 260 00041 M-Stout

have been producing for several years and these products are now reaching the end of their life cycles.

We would like to inform you that the management of Knowles Sound Solutions has decided not to transfer those specific production lines.

Since there are still some projects ongoing the stock level is kept high to support all projects further.

Last time Buy orders will accepted until August 1, 2014, and only confirmed with available inventory. Shipments must take place by October 31, 2014.

We would like to point out and express our thanks for your confidence in Knowles Sound Solutions and the great cooperation. We are very interested in a smooth replacement of these parts and count on your understanding.

Sincerely yours,

Dr. Ursula Wutte
Knowles Sound Solutions
