

In order to streamline order processing and ensuring your customer the best service available, Lascar is obsoleting a particular part and replacing all orders with an updated version.

The Part: PSU-5VDC-USB-US will be substituted with: PSU USB-US 3M A-UB starting on May 1st.

The reason for this substitution is the former does not include the Micro USB cable that would be expected and included as a power supply for our Wireless Data Loggers.

If you require any assistance or have any questions please do not hesitate to reach out to us.
