

RJ45 Breadboard Breakout

MPN: ST-215

Description:

This RJ45 breakout board allows for quick and easy prototyping, testing, and debugging of RJ45 connections. This board has two rows of 0.1" male headers which fit perfectly into a breadboard to create a secure fit. Each pair of headers connects to one of the eight connections inside the RJ45 jack.

Key Features:

- Standard 0.1" male headers allow for easy breadboard connections
- Two rows of headers increase stability when used on a breadboard
- High quality double sided PCB can withstand re-work

Usage Examples:
