Re: Obsolescence of DT100-C and DT150-C power supplies

Dear Valued Customer / Partner,

Over the last four years, TDK-Lambda has launched several external power supplies that meet both the DoE Level VI and the EU CoC Tier 2 Efficiency requirements, including the DT100-D and DT150-D. Recertification to the IEC 62368-1 safety standard has also taken place, which is replacing IEC 60950-1.

We are therefore offering a last time buy for the DT100-C and DT150-C power supplies to those customers who have not already transitioned to the newer DT100-D and DT150-D series. These have the same connectors and are direct replacements. A cross reference is shown on page 2.

TDK-Lambda recognizes that as a past or current customer of these products, you may require additional units until substitution testing is complete or for service spares. We are offering a last time buy opportunity until September 30th, 2020, with a last time ship date of December 4th, 2020. Please understand that these orders would be non-cancelable and non-returnable.

Please contact our technical support for additional information. 1-800-526-2324 or email lambda.techsupport@us.tdk-lambda.com
