Notice of Change in Product Availability – Option CloudGate 3G (CG0198-12042)

Dear Valued GetWireless Partner,

The purpose of this communication is to provide notice that the Option CloudGate 3G (CG0198-12042) cellular gateway will continue to be available after June 1st, 2018, but as of this date, will require an MOQ (minimum order quantity) of 1,000 pieces. Based on current run rate demand, GetWireless is not planning to order more of this SKU to maintain an inventory position.

Current CloudGate 3G customers should consider transitioning to the CloudGate LTE for all the same functionality of the CloudGate 3G with a standard 3G-to-4G price increase as shown below.

SKU	Description	MSRP	MOQ
CG0198-12042	Option CloudGate 3G	\$342	1,000 pieces
CG0114-12019	Option CloudGate LTE	\$492	None

Depending on the specific application, customers may also consider transitioning to the new Sierra Wireless AirLink LX60 or the Peplink MAX BR1 Mini.

Please reach out to your GetWireless Regional Sales Executive for details on these choices including pricing, or to place an order.

Thank you!

Craig Linder
