Description

The TN4050HP-12G2YTR is an automotive grade SCR thyristor designed for applications such as automotive on board and stationary battery chargers.

This SCR thyristor, rated for a 40 A RMS power switching, offers superior performances in peak voltage robustness up to 400 V sine wave pulse. Its key features allow the design of functions such as a 56 A RMS AC switch and a 50 V ACDC controlled rectifier-bridge.

The TN4050HP-12G2YTR is available in D²PAK HV surface mount package, ideal for automatic assembly lines.

D²PAK HV package offers increased creepage distance of 5.38 mm, simplifying design conformity with insulation coordination standards such as IEC60664-1 and UL-840.
