New Features

- Added BT SIG Erratum 10734: increase the security of the pairing procedures in Bluetooth Secure Pairing and Bluetooth LE Secure Connections.
- Make GATT profiles GAP role agnostic
- GATT Client: add LEATTMTU event

Fixed Issues

- Fix connect from specific Android phone
- UART: require external crystal clock
- Use baudrate divider with lower deviation
- Service Discovery does not work for some 128bit UUIDs
- ATD dial string does not allow spaces

Telit guarantees that the new software versions support all the features of the previous.

Following the Telit family's concept and long-term availability commitment to our customers, Telit guarantees that this change will not affect your current design and hereby declares that the new variant will be fully compatible with the old one.

Telit will follow the schedule reported below during this End-of-Life procedure of these old PN's:

- Build To Order term: September 30th, 2018 – From this date the product is available upon firm order, (not cancellable and not re-schedulable).
- Last Buy Order term: October 31th, 2018 – Orders will only be confirmed till this date.
- Last Shipment term: December 31th, 2018
- End of Support term: December 31th, 2018.

Telit Technical Support and Telit R&D will no longer provide support on these old versions.

Please contact your regional Telit Application Engineering Team for any technical question.

For any additional information regarding this notice please contact your Regional Sales Director.
