### EVAL BOARD USER'S MANUAL

#### Description

This document describes the NCS2200A 6 pin UDFN package evaluation board. It should be used in conjunction with the data sheet which contains full technical details on the device specification and operation. This evaluation board is offered as a convenience for the customers interested in performing their own engineering characterization and performance assessment. The evaluation board provides a 50  $\Omega$  controlled impedance environment. The evaluation board is designed to facilitate a quick evaluation of the device.

This evaluation board manual contains:

- Information on NCS2200A Evaluation Board
- Bill of Materials

#### Board Lay-up

The evaluation boards are implemented in two layers. The first layer is the primary signal traces and the device. The FR4 dielectric material is placed between the first and second layer. The second layer is the 1.0 oz copper ground plane, with portion of the ground plane cutout for power.

#### Board Design

The evaluation board was designed to be flexible (See Figure 3).

- Inputs
  - Inputs have place holders for termination resistors to ground if input signal requires termination
- Outputs
  - Outputs have a place holder for loads. It can either be loaded with resistor or capacitor or both or none at all.
- Power Supply
  - It can be operated with either single power supply or dual power supply
    - For single power supply – Jumper the  $V_{EE}$  and GND together
    - For dual power supply – Do not jumper the  $V_{EE}$  and GND
  - Both  $V_{CC}$  and  $V_{EE}$  have power supply decoupling capacitors

Item	Qty	Ref Des	Value	Package	Description	MFG	Part Number
1	1	C1	10 $\mu$ F		Capacitor	Kemet	T491C106K025AS
2	2	C2, C4	0.1 $\mu$ F	0603	Capacitor	TDK Corp	C1608X7R1H104K
3	1	JMP			Jumper Shorting Tin	Sullins Electronics Corp	STC02SYAN
4	1	JMP			Jumper Header	Sullins Electronics Corp	PTC36SABN
5	3	V <sub>CC</sub> , V <sub>EE</sub> , GND			Surface Mount Test Clip	Keystone	5016
6	3	IN-, IN+, OUT			Through Test Point (Optional: SMA Connector)	Keystone (Johnson Comp.)	5000 (142-0701-801)
7	1	DUT		UDFN8	NCS2220A UDFN8	ON Semi	NCS2220AMUT1G
8	1				NCS2220A Eval Board	ON Semi	NCS2220AEVB

**Parts Not Installed**

9	1	C3		0603	Capacitor		
10	3	R1, R2, R3		0603	Resistor		

## NCS2200A EVALUATION BOARD TEST PROCEDURE

NCS2200A is a single low power comparator. The test is simply to power up the device and make sure the device is functional.

**Test Condition for NCS2200A**

- Test the board at the following power supply voltage and temperature
  - ◆ Voltage: 0.85 V, 3 V, 6 V
  - ◆ Temperature: Room

**Test Procedure for NCS2200A**

- Power up the device.
  - ◆ Place a jumper to short GND and VEE.
  - ◆ Short one of the inputs to ground, short the other input to Vcc.
  - ◆ Read the power supply current and verify that it is according to the data sheet specification.
- Functionality Test
  - ◆ Short negative input to ground and short positive input to Vcc, the output voltage should be Vcc.
  - ◆ Short negative input to Vcc and short positive input to ground, the output voltage should be ground.

ON Semiconductor and the ON Semiconductor logo are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at [www.onsemi.com/site/pdf/Patent-Marking.pdf](http://www.onsemi.com/site/pdf/Patent-Marking.pdf). ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.

The evaluation board/kit (research and development board/kit) (hereinafter the "board") is not a finished product and is as such not available for sale to consumers. The board is only intended for research, development, demonstration and evaluation purposes and should as such only be used in laboratory/development areas by persons with an engineering/technical training and familiar with the risks associated with handling electrical/mechanical components, systems and subsystems. This person assumes full responsibility/liability for proper and safe handling. Any other use, resale or redistribution for any other purpose is strictly prohibited.

The board is delivered "AS IS" and without warranty of any kind including, but not limited to, that the board is production-worthy, that the functions contained in the board will meet your requirements, or that the operation of the board will be uninterrupted or error free. ON Semiconductor expressly disclaims all warranties, express, implied or otherwise, including without limitation, warranties of fitness for a particular purpose and non-infringement of intellectual property rights.

ON Semiconductor reserves the right to make changes without further notice to any board.

You are responsible for determining whether the board will be suitable for your intended use or application or will achieve your intended results. Prior to using or distributing any systems that have been evaluated, designed or tested using the board, you agree to test and validate your design to confirm the functionality for your application. Any technical, applications or design information or advice, quality characterization, reliability data or other services provided by ON Semiconductor shall not constitute any representation or warranty by ON Semiconductor, and no additional obligations or liabilities shall arise from ON Semiconductor having provided such information or services.

The boards are not designed, intended, or authorized for use in life support systems, or any FDA Class 3 medical devices or medical devices with a similar or equivalent classification in a foreign jurisdiction, or any devices intended for implantation in the human body. Should you purchase or use the board for any such unintended or unauthorized application, you shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the board.

This evaluation board/kit does not fall within the scope of the European Union directives regarding electromagnetic compatibility, restricted substances (RoHS), recycling (WEEE), FCC, CE or UL, and may not meet the technical requirements of these or other related directives.

**FCC WARNING** – This evaluation board/kit is intended for use for engineering development, demonstration, or evaluation purposes only and is not considered by ON Semiconductor to be a finished end product fit for general consumer use. It may generate, use, or radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to part 15 of FCC rules, which are designed to provide reasonable protection against radio frequency interference. Operation of this equipment may cause interference with radio communications, in which case the user shall be responsible, at its expense, to take whatever measures may be required to correct this interference.

ON Semiconductor does not convey any license under its patent rights nor the rights of others.

**LIMITATIONS OF LIABILITY:** ON Semiconductor shall not be liable for any special, consequential, incidental, indirect or punitive damages, including, but not limited to the costs of requalification, delay, loss of profits or goodwill, arising out of or in connection with the board, even if ON Semiconductor is advised of the possibility of such damages. In no event shall ON Semiconductor's aggregate liability from any obligation arising out of or in connection with the board, under any theory of liability, exceed the purchase price paid for the board, if any.
