

New upgrade of Ender-3

Ender-3 V2

An upgraded version of a phenomenal 3D printer

Practical 3D printer

Integrated compact design

Multiple improved upgrades

Ultra silent printing

3D PRINTING INDUSTRY EVANGELIST

Integrated structure design Stable · fast · safe

A DIY 3D printer with practicability, fun and high performance

Exquisite appearance

Integrated structure design

High-precision printing

Carborundum glass platform

5 minutes to heat up

Easy to operate

Resume printing function

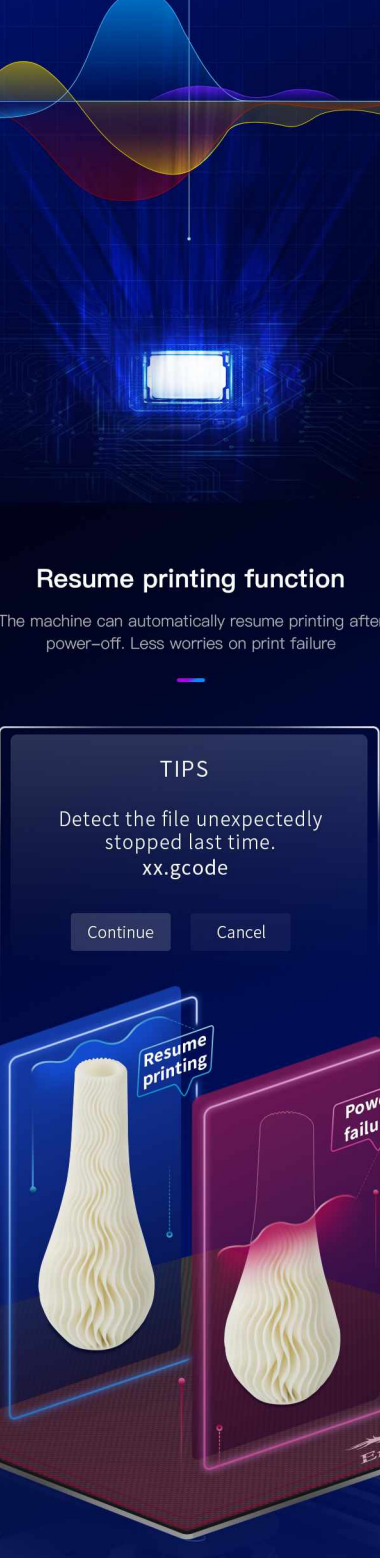

Smart add-ons

New user interface

Classic appearance Integrated all-metal body

Classic appearance in integrated all-metal body inherited from its predecessor Ender-3, firm and stable

Integrated structure design Easy to assembly

Easy to assembly and maintain with integrated structure and modular design the power supply is concealed in the machine making it much safer

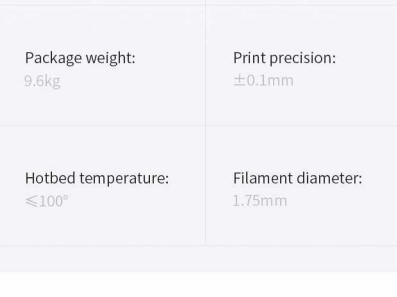

V-guide rail with high standard Stable to print

Ender-3 V2 uses the V-guide rail pulley with stable movement, low noise, wear resistance and longer life

Carborundum glass platform

The carborundum glass platform enables the hotbed heat up quicker and prints adhere better. Ultra smoothness even on the first layer

Self-developed silent motherboard

The self-developed silent motherboard always ensures smooth movement under 50dB, no noise during printing. Branded power is suitable for different voltages under 115V / 230V

Resume printing function

The machine can automatically resume printing after power-off. Less worries on print failure

User friendly design for better 3D printing experience

New injection tensioner

The XY-axis tensioner supports adjusting the belt tension in a quick and more convenient way

Smart add-ons

With the tool box integrated to the machine body it is more convenient and quicker for tools organization and storage

Effortless filament feed-in

Rotary knob added on the extruder makes it easier to load and feed filament

Brand New user interface

User experience greatly upgrades with the newly designed operation UI system, convenient disassembly and simple operation.

Product parameters

Machine size: 475*470*620mm	Layer thickness: 0.1-0.4mm
Print size: 220*220*250mm	Filament: PLA/TPU/PETG
Molding technology: FDM	Supported OS: MAC/WindowsXP/7/8/10
Product weight: 7.8kg	Slicer software: Simplify3d/Cura
Package weight: 9.6kg	Print precision: ±0.1mm
Hotbed temperature: ≤100°	Filament diameter: 1.75mm

COMPANY INTRODUCTION

Shenzhen Creality 3D Technology Co., Ltd.

Creality 3D is an internationally renowned 3D printer manufacturer, national high-tech enterprise, and a pioneer in the R&D and mass production of FDM and DLP 3D printers in China. Our company has been committed to applying 3D printers into market, delivering efficient and cost-effective integrated 3D printing solutions for individuals, families, schools and enterprises.

Headquartered in Shenzhen, Creality 3D has branches in Beijing, Shanghai and Wuhan, and cooperates with colleges and universities to build an industry-university-research teaching and internship base. We have a complete set of R&D, manufacturing and after-sales service system and strong technological strength. With a total area of 30,000 m², team of over 1000 and annual production capacity of over 800,000 units, Creality 3D prides itself on its large-scale R&D center and 3D printing laboratories and Creality research institute. Coupled with modern production lines working for 24 hours nonstop and demanding quality control system, the excellent product quality is thus guaranteed from the source. The products have been sold to more than 100 countries and regions, and have been ranked in the top of the global 3D printer sales list for a long time.

With initial aspirations never faltered, sticking to "customer-first" service concept, Creality 3D will keep passing on the spirit of the service, evangelist to make better quality 3D printer and provide best service, contributing to the rise of China's intelligent manufacturing industry.
