

To: Molex Sales Engineers, Customers and Authorized Molex Distributors
From: John Holba – Global Product Manager
Date: September 16, 2013
Subject: HD Mezz Product Change

As part of our continuous improvement activities, Molex is making a change to the guide pin to remove the swaging process and prevent potential metallic debris.

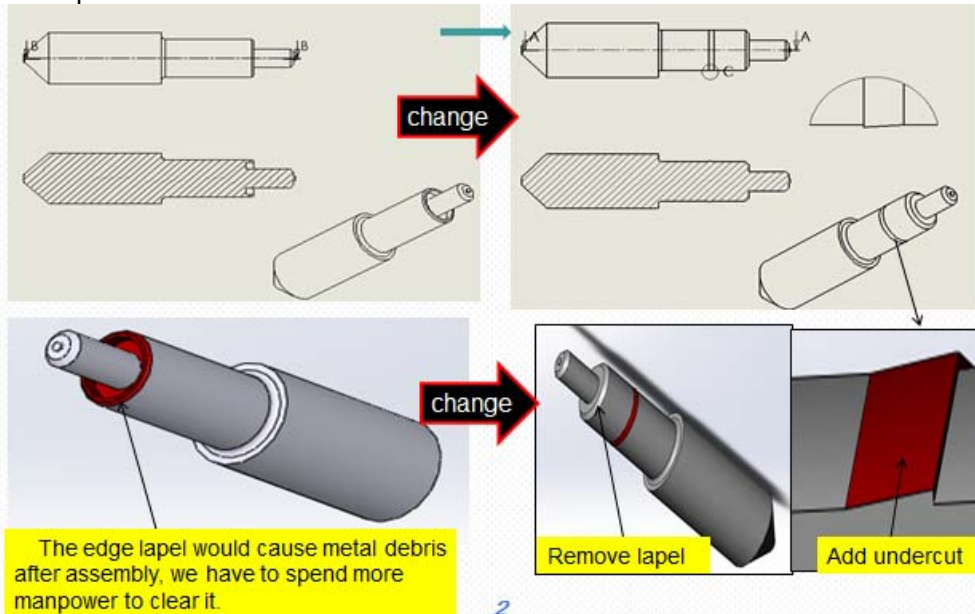

- Product Series Affected
- Details of Change
- Implementation dates

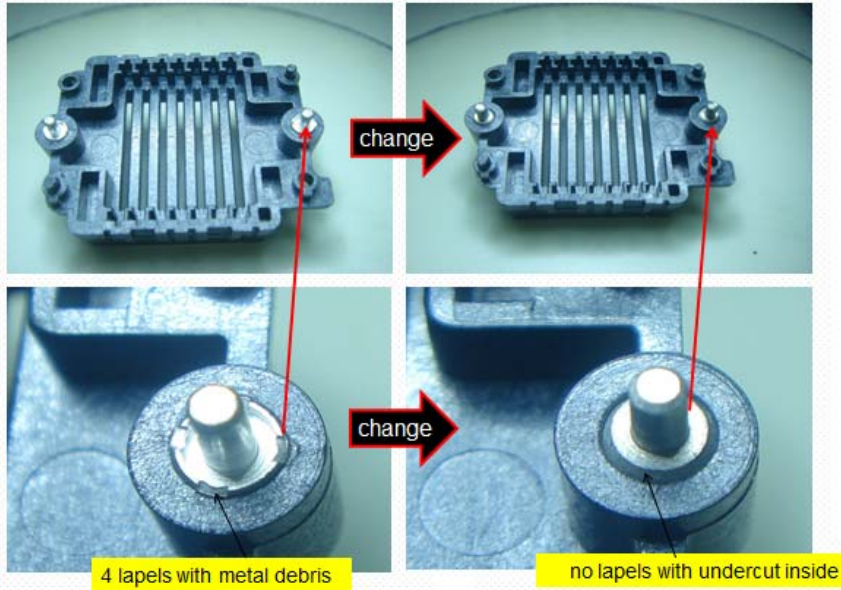

Product Series

Series	Description
45830	HD Mezz Plug
46743	HD Mezz Plug

Details of Change

- The change will have **no fit, form, or function** implications to the product.
- Product performance is consistent or better than the current product offering and no changes are required to the product specification.
- Part numbers will not be affected by this change.
- Guide pin retention will meet or exceed current levels.

Implementation Dates

- Integration of this change will begin as early as 10/31/2013.
