APPLICATION

GMLB chip beads can be used in a variety of electronic applications including:

- Computers and Computer Peripherals
- Cellular Communication Equipment
- Digital Cameras
- Digital Televisions
- Audio Equipment

FEATURES

The GMLB Series is Mag.Layers' line of high quality ferrite chip beads. Using the latest in multilayer technology, we have developed chip beads that are able to resolve all EMI/EMC issues. High quality, reliability, and versatility make the GMLB series chip beads suitable for all your design needs.

- High Reliability
  The monolithic inorganic materials used to construct GMLB chips restrain magnetic flux leakage thereby minimizing EMI concerns. GMLB chips are also extremely effective with unstable grounding.
- Small Chip-Shaped Design
  The chip-shaped design makes GMLB chip beads ideal for automatic mounting.
- High Soldering Heat Resistance
  High quality termination allows both flow and re-flow soldering methods to be applied.
- Sharp High Frequency Characteristics
  The GMLB high frequency chip series has sharp impedance characteristics, which make it suitable for high-speed signal lines.
