

November 30th, 2017

To our valued customer,

Please be advised that we are making a running change to our part numbers KO132D1506HT and KO106A102 key lock switches . Because of some past quality related issues the switches will now have barrel nickel plating rather than barrel chrome plating. This change will take place immediately and will not impact any form, fit or function to the switch.

Sincerely,

Rick Nelson

Sales Director
