LED Illumination with Intensity Control

Cyclops HDMI

Digital Microscope with Image Measurement Box

This innovative inspection scope allows operators to see high quality images by looking straight ahead at a large screen via HDMI rather than hunching over traditional narrow microscope eyepieces. This bundle includes the Cyclops HDMI Image Measurement Box for capturing screenshot images/videos with the touch of a button and features a built-in measurement software without the need for a PC.

Key Features

- 2-megapixel sensor
- HDMI output
- LED illumination with intensity control
- Large magnification range and long working distance
- Infrared remote control for all major features
- USB port for keyboard or mouse
- Save image/video files to SD card
- Take accurate measurements
- Make on-screen notes
- Utilize on-screen grids and overlays

Image Measurement Box
Features built-in measurement software with image/video capturing capabilities
