

Universal Enclosures

Protecting your equipment for more than 50 years

Schneider Electric

Our Universal Enclosures ranges, solutions for each application

> Spacial Metal enclosures and boxes

From our small boxes to large suitable floor-standing enclosures, with the Spacial range you can find the perfect fit for your applications. Our extensive range of easy-to-use accessories helps you save time during your projects.

Select between steel or stainless steel to better suit the installation environment. In our stainless-steel offer you can find the optimal solution where cleanliness is required, or for highly corrosive environments.

> Thalassa Insulating enclosures

Working in difficult environments can, without the right protection, expose your installation to chemical or aggressive substances. Developed to efficiently protect it; our Thalassa offer, from boxes to floor-standing enclosures, made in fibreglass-reinforced polyester, resists in hard conditions and outdoor applications.

Our Thalassa industrial boxes in ABS or polycarbonate are strong, easy to install and designed to be used in highly demanding environments.

New

Early 2016, the Thalassa polyester enclosure range changes color

> What products will be affected?

All our Thalassa range of polyester enclosures.

> What happen with the part numbers (references)?

Every product that have changed in colour have also changed the part number. It is done just adding a letter "G" at the end on reference. *Example:*

RAL 7032	RAL 7035
NSYPLM43	NSYPLM43G

> How can I obtain RAL 7032 enclosures?

Consult us.

> ClimaSys Thermal management

Preserving and keeping the right temperature inside your enclosure is vital for maximising the lifetime of your installed devices. With our ClimaSys offer you can find the right solution, be it Ventilation, Cooling or Heating, including control units for temperature, humidity and much more.

Industry and Infrastructure Offer

A material for every environment

PB500013-55

> Solution:

The Spacial range in steel (wall-mounting, monobloc and suitable floor-standing enclosures).

> Steel

Indoor non-clean industrial environment

The industrial environment in mechanical plants is especially demanding as regards the protection of electric and electronic components against dust, splashing with oil and impacts. This environment therefore requires a range that is suited to the applications and easy to implement.

- **Standard range**, for industry.
- **E.M.C. range**, against electromagnetic disturbances (treated with Aluzinc).
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

PB500014-55

> Solution:

The Spacial range in stainless steel (wall-mounting, monobloc and suitable floor-standing enclosures).

> 304L - 316L stainless steel

Demanding industrial environment

Food and beverage, pharmaceutical, petrochemical and infrastructure industries are particularly demanding in terms of hygiene and resistance to corrosion. With two grades of stainless steel:

- **304L stainless steel:**
Resistance to corrosion and cleanability (often used in food production environments).
- **316L stainless steel, also known as "marine stainless steel":**
Very high resistance to corrosion (saline or chlorinated environment).
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

PB500015-28

PB500016-48

> Solution:

The Thalassa range (boxes, wall-mounting and floor-standing enclosures).

> Insulating polyester and plastic materials (ABS, polycarbonate)

Infrastructures and industrial environments

Outdoor infrastructures and electrical installations are exposed to direct sunlight, rain, saline mist, extreme temperatures, oil splashes, chemical and corrosive agents.

- **Standard range**, for industry and infrastructures.
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

PB502732-46

PB502733-26

> Solution:

The Thalassa PHD and Spacial S3HD and SFHD ranges (wall-mounting and floor-standing).

> Heavy Duty materials New

Severe outdoor environments, generally requested by OEMs, telecom, water treatment and transportation

- Polyester Heavy Duty is suitable for outdoor public areas thanks to its multiple virtues:
 - pressure and shock resistant (IEC 61439-5: 2010),
 - anti-posting thanks to its special ribbed-surface door,
 - insulated (ready to be Class II according to IEC 61439-1: 2011).
- Steel Heavy Duty enclosures are designed for outdoor private areas:
 - they are engineered to resist aggressive environments (anti-corrosion certification class C4H, ISO 12944:1999).

Selection tools

PE500009-185

> www.schneider-electric.com

Our web site allows you to access all the Schneider Electric products in just two clicks with direct links to:

- A complete library of technical documents, catalogues, FAQs brochures, etc.
- Certificates.
- 2D & 3D drawings.
- Selection Guides from the e-catalogue.
- Product discovery sites.

You may also find illustrated overviews, news to which you can subscribe, a list of country contacts and more useful information.

Our software suite

60120-24

> [Spatial.pro](#)

Find the right dimension for your enclosure

Spatial.pro allows you to make control panel quotations based on dimensions of electrical devices. A full project with several sets of control panels is quoted in minutes, with automatic creation of the Bill of Material and 2D drawings for front/side views.

> [Digital Rules](#)

Find the accessories that suit your enclosure

The digital rules allow you to select the best components from the current product range. There will be no risk of mistake, since product and accessory selection take place automatically, saving you time and money.

PE500011-38

> [ProClima](#)

Find the best thermal solution for your enclosure

Select and calculate your thermal management requirements, according to the environment and the electrical/electronic devices installed inside the enclosure.

DB300837-21

> [Spatial.conf](#) New

Get your enclosure pre-engineered for your special needs

Spatial.conf software gives you total autonomy to configure and quote enclosures with services (cut-outs, painting, accessory mounting) in less than 3 minutes. Spatial.conf is designed for convenient, error-free, and time-saving orders.

Have a smartphone or a tablet? Scan this >

The customised solutions

Over 50 years of experience, knowledge and expertise to have the best enclosure solution that meets your needs.

Two offer levels to cover your different requirements

Configured: the enriched standard offer

Feasibility automatically guaranteed by the configurator software Spacial.conf, which gives you autonomy and flexibility to quickly define your customized enclosure.

 Committed delivery date.

Specific: the co-developed offer

Special dimensions, accessories and logistic needs. You participate to the whole development process of your "Tailor-made" solution.

 According to co-developed specifications.

○ Specific offers

Time saving

Delivered with cut-outs & painting: no waste of time

Logistics

- Flexible management of your logistic option (scheduled delivery service for on-going orders)
- Special packaging

Installation simplified

Enclosures delivered with cut-outs: you don't need special tools

Ergonomic design

Customized project dedicate to your personal concern

PE500518-1B2

Life time increased

- Cut-outs done before painting guarantees better anti-corrosion/sealing
- Painting service for better protection

Quality improved

- No burrs on edges of cut-outs
- Guaranteed machining tolerances

Aesthetics

- Large choice of colours
- External surfaces with no scratches

Higher performances

- Adapted thermal management
- Upgraded stainless steel type

Metallic junction boxes

Characteristics

Characteristics	Metallic junction boxes		
	<ul style="list-style-type: none"> ■ PVC sealing gasket on sizes up to 20/15 and a rubber gasket for > 25/20. ■ Back ready for threaded drill holes for mounting equipment. From size 15/10 and up, there are four M4 threaded holes fitted with removable plugs for direct mounting of the mounting plate. ■ The SDB series consists of 4 basic models: <table style="width: 100%; border: none;"> <tr> <td style="border: none;"> <ul style="list-style-type: none"> □ without knock-outs: with high cover, □ with knock-outs: NSYDA●●●M with high cover. </td> <td style="border: none;"> <ul style="list-style-type: none"> □ without knock-outs: with low cover, □ with knock-outs: NSYDB●●●M with low cover. </td> </tr> </table> 	<ul style="list-style-type: none"> □ without knock-outs: with high cover, □ with knock-outs: NSYDA●●●M with high cover. 	<ul style="list-style-type: none"> □ without knock-outs: with low cover, □ with knock-outs: NSYDB●●●M with low cover.
<ul style="list-style-type: none"> □ without knock-outs: with high cover, □ with knock-outs: NSYDA●●●M with high cover. 	<ul style="list-style-type: none"> □ without knock-outs: with low cover, □ with knock-outs: NSYDB●●●M with low cover. 		
Material	Sheet steel		
Finish	Protected inside and outside with textured epoxy-polyester paint		
Colour	RAL 7035 grey		
Ingress protection rating	IP55 according to IEC 60529		
Mechanical protection rating	IK07		
Installation	Indoor installation: direct wall-mounting by means of drill holes fitted with plastic plugs to ensure sealing Outdoor installation: compliant with IEC 62208 regarding type tests specified in §9.12 (resistance to ultra-violet (UV) radiation) and §9.13 (resistance to corrosion). It is always advisable to install a canopy to avoid water stagnation on the upper part of the enclosure

Small metallic enclosures

- Enclosures fitted with sealing gasket and M4 threaded holes fitted with removable plugs for mounting the mounting plate and/or equipment in general.
- Lock with double-bar  insert operated with key (standard supply ). Mounting this key to the insert will convert it into a handle lock. See other lock possibilities in the insert table.
- The Spacial SDB series with hinges consists of 2 models:
 - low cover.
 - high cover.

New

> Simplicity, ergonomics and versatility, it's all in the box.

PB502105-40

PB502112-17

Selection

- 3 versions: flat box (SBM), FL21 entry box (SBMC) and bus box (SBMB).
- 80 mm and 120 mm depth.
- FL21 cable entries available according to the version.

PB502113-30

Modularity

- 28 sizes available.
- Up to 42 sizes possible thanks to the optional Extension box accessory.

PB902073-20

Ergonomics

- Cover opening and accessory mounting with **just a screwdriver**.
- Better accessibility thanks to the Extension box accessory.

PB502085-20

Sturdy and good ingress protection

- Mechanical protection rating up to IK10.
- Ingress protection rating up to IP66.

DB300080

Easy installation

- Direct mounting through the rear.
- Mounting with versatile external lugs.

PB502071-20

Added value to your work

- Quality and aesthetics.

This range can be configured according to your needs

PE502069-40

PE502070-35

PE502071-35

	Spacial SBM Flat box	Spacial SBMC FL21 Entry box	Spacial SBMB Bus box
	Box with plain faces.	Equipped with two or more FL21 cable gland plates.	Equipped with FL 21 cable gland plates, a hinged cover with a transparent polycarbonate window and a DIN rail.
	<p>Box body Single-piece body (rectangular structure). Front design incorporating folded gutters. Flat rear. 2 (or 3*) drilled profiles for installing mounting plates and DIN rails, with mounting centres of 12.5 mm. 2 or more FL21 cable gland plates (1) for easy drilling and to guarantee the maximum access area, delivered with the enclosure.</p> <p>Box cover Equipped with 2, 3, 4 or 6 half-turn thread screws, according to the version (2) to ensure maximum watertightness. Bus boxes equipped with cover hinges for a comfortable 180° door opening. Polyurethane sealing gasket.</p> <p>Protection of personnel Earth connection mandatory for all boxes: Spacial SBM steel boxes are equipped with a M6 x 16 earth stud welded in the cover, to be linked with the body for equipotential connection. Earth braid to be ordered separately (Ø 6.4 mm terminal).</p>		
Material	Sheet steel		
Finish	Structured		
Colour	RAL 7035 grey		
Ingress protection rating	IP66	IP55	
Mechanical protection rating	IK10		IK08
Standard	Compliance with enclosure standard IEC 62208 and the RoHS directive		
Certifications	<ul style="list-style-type: none"> ■ UL, BV, DNV, LR, GL ■ Type 4, 4X according to UL 508A standard ■ Fire class: M0 	<ul style="list-style-type: none"> ■ UL, BV, DNV, LR, GL ■ Type 12, 12K according to UL 508A standard ■ Fire class: M0 	
Installation	<p>Indoor installation Direct wall-mounting (4 x Ø 10 mm holes with sealing plugs to maintain the IP rating) or with the help of mounting brackets installed from the outside (to be ordered separately, see the specific accessory pages). Distance between mounting holes enables the installation of the box in the same locations as many existing enclosures. Marks on the rear of the box locate the mounting points of obsolete Schneider Electric models. Marks on the sides help with drilling the body to install hinges</p> <p>Outdoor installation Compliant with IEC 62208 regarding type tests specified in §9.12 (resistance to ultra-violet (UV) radiation) and §9.13 (resistance to corrosion). It is always advisable to place the box under shelter to avoid water stagnation on the upper part of the enclosure</p>		
Maximum load	Loading capacity on the body: 50 kg/m ²		
Other characteristics	<p>Vibration constraints Specific construction of the Spacial SBM - Single-piece body (rectangular structure). The rear is flat without added parts - this ensures compliance with certain vibration constraints. The tests were conducted according to the marine application by "Det Norske Veritas". Boxes labelled "DNV" have undergone these tests and obtained classification "A"</p>		

* 3 profiles for width 800 mm.

(1) Only on Entry boxes and Bus boxes.

(2) 2 for Bus box (3 screws for width greater than 400 mm), 4 for Flat and Entry boxes (6 screws for width greater than 400 mm).

Spacial® S3DC, CRN and CRNG

Steel enclosures

> Mounting & cabling systems

for setting up devices and managing cabling

> Thermal management

for controlling the internal temperature & humidity of the enclosure

3 Material Solutions

Steel

Stainless-steel

Polyester

Time-saving & easy to equip

...with direct installation of the mounting plate.

Spacial S3DC, CRN and CRNG are designed to protect your equipment in most indoor installations with **harsh & dirty environments**, such as:

- > Machines
- > Manufacturing plants
- > Logistics centers, etc

Whatever the installation environment, you can select the material according to your needs: steel, stainless-steel or polyester. Our enclosures share the same sizes and most of the mounting, cabling and installation accessories, to make selection and mounting simpler!

Machines

Industry

+ Simple to choose,
simple to order
and simple to use!

Spacial S3X

Stainless-steel enclosures

Thalassa™ PLM

Polyester enclosures

Durable & hygienic

...using highly corrosion-resistant material with a detailed finish, to reduce the risk of contamination.

Spacial S3X is commonly used in:

- > **Food & beverage** and **pharmaceutical industries**, where the ability to clean hard water is required to help prevent the growth of bacteria.
- > The **oil & gas** industries, for its chemical resistance.

Food & Beverage

Oil & Gas

Safety & low maintenance

...thanks to its long-lasting and insulated material construction (Class II protection level from hazard).

Thalassa PLM offers excellent performance in:

- > **Outdoor applications**, such as road & train infrastructures, airports and harbors, including saline environments.
- > A good choice for harsh environments where non-corrosive materials are required.

Desalination

Airport

Steel wall-mounting enclosures

Selection guide

S3DC

You need an efficient, sealed multipurpose and aesthetic enclosure for an indoor industrial facility.

Our solution: the Spacial S3DC universal offer.

A universal enclosure with 3-point locks and a broad range of accessories to conform to all your applications.

NEMA 4, 4X, IP66 water and dust tightness.

A complete offer of 30 dimensions from 300 × 200 × 150 mm (11.8 × 7.9 × 5.9 in.) to 1200 × 1000 × 300 mm (47.2 × 39.4 × 11.8 in.):

- With plain door, without cable-gland plate
- Resistance to mechanical impacts: IK10 plain door
- Compliance with enclosure standard EN 62208 and IEC 62208
- A broad range of accessories to conform to all your applications
- See the Selection Guide on page 60.

S3DCD

You need an efficient sealed enclosure for a specific application such as electronics and electricity distribution.

Our solution: the Spacial S3DC application offer.

- Models sized and suited for your applications
- Discover our S3DCD disconnect enclosure on page 78.

S3HF

You need an efficient sealed enclosure for an industrial facility with EMC constraints.

Our solution: the offer for EMC environments.

Enclosures suited to different EMC environments.

- IP55 water and dust tightness
- See page 342.

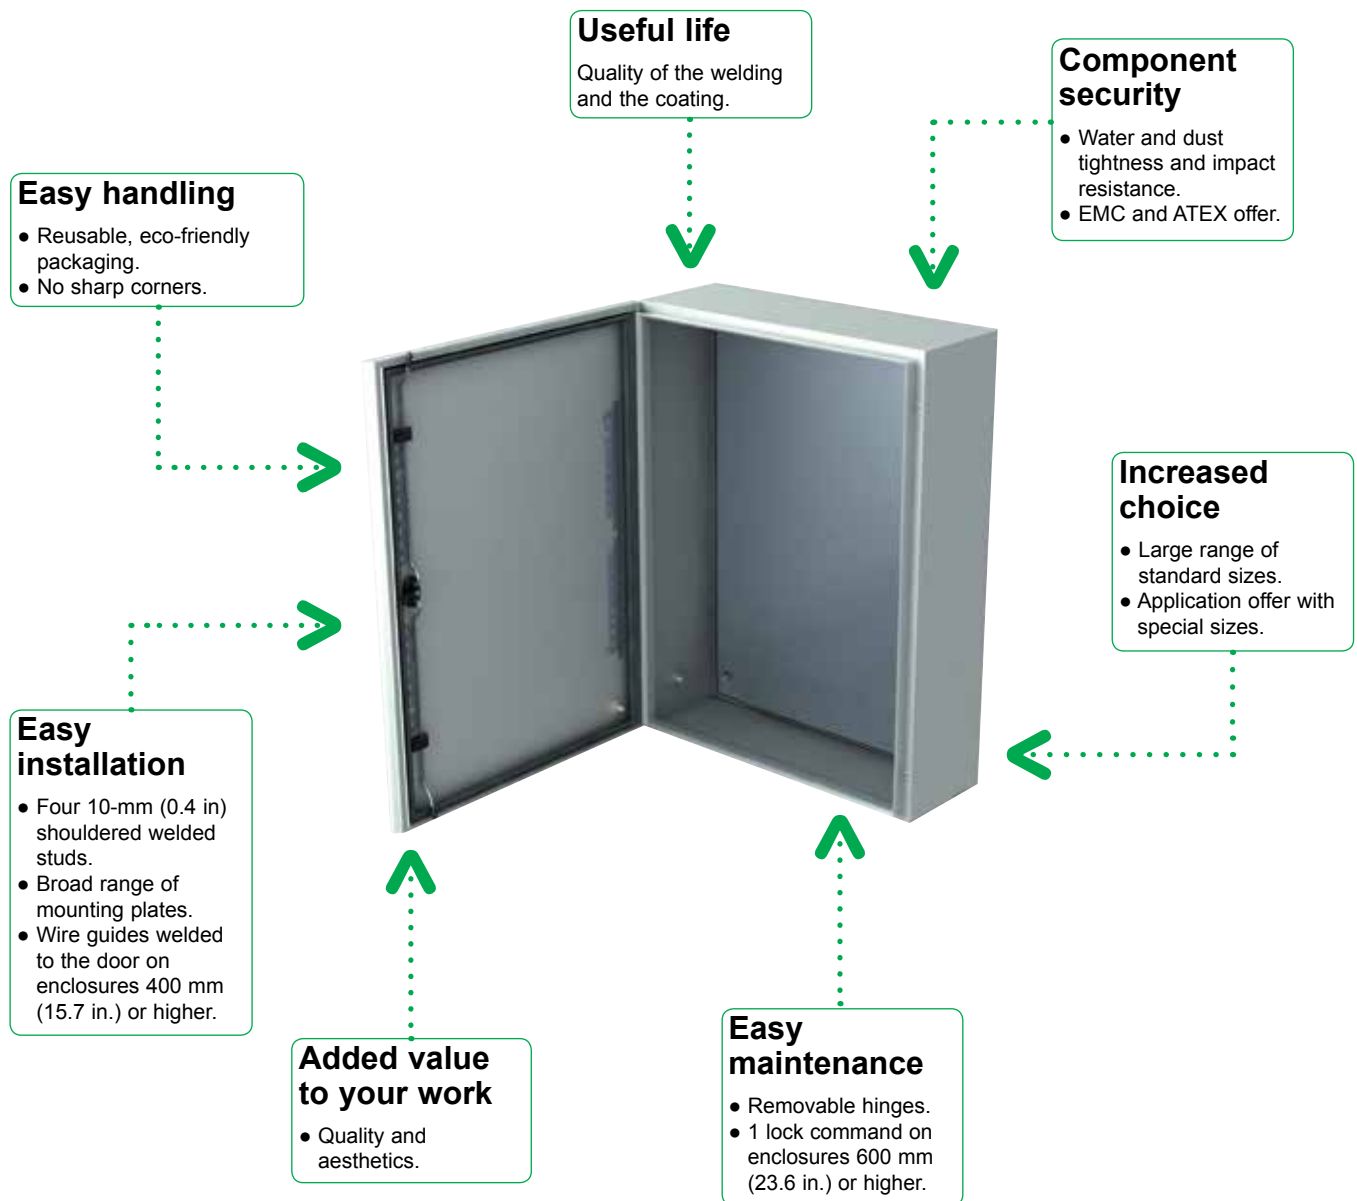

Spacial S3DC:
The multipurpose enclosure

Steel wall-mounting enclosures

Features

> Mounting

- ① Wall-mounting
- ② Floor-standing
- ③ Roof
- ④ Viewing and grounding

> Cable installation and management

- ⑤ Installation
- ⑥ Cable entries
- ⑦ Cable management
- ⑧ Thermal management

3-point lock enclosure.

One action point enclosure.

Welded studs for the ground connection.

Screwdriver lock (coin protected).

Delivered in a reusable cardboard box with assembly instructions enclosed and wall-mounting template on the cardboard.

The Spacial S3DC steel enclosure universal offer

- Enclosure with plain door.
- Structured finish, epoxy-polyester powder, RAL 7035 gray color. See the Selection Guide on page 60.

Technical characteristics

Enclosure body

- Single-piece body (cross-shaped structure). Gutter-shaped front profile with double fold. Flat rear.
- 4 (or 6**) M8 × 25 shouldered backstuds for installing mounting plates and step slides, leaving a space of 10 mm (0.4 in.) behind them.
- M6 × 16 grounding studs for equipotential connection between the door and the body of the enclosure.
- Four direct wall-mounting drill holes (∅ 10 mm (0.4 in.)) are sealed with plugs to maintain the degree of protection. Or mount with lugs installed from the outside (lugs ordered separately, see page 66).

Enclosure door

- Wall-mounting enclosure supplied with screwdriver insert lock as standard.
- Polyurethane door gasket.
- M6 × 16 grounding studs for equipotential connection between the door and the body of the enclosure.
- Easily removable and reversible, with 20-mm (0.8 in.) return with double thickness for excellent rigidity, opening to 120°, equipped with 2 or 3 invisible hinges*.
- For heights from 600 mm (23.6 in.), three locking points with linkage, with a single control point. Simple reversal of linkage. Maximum load: 50 kg/m².
- Perforated rails on the door, with pre-drilled holes with a diameter of 4.2 mm (0.2 in.) in steps of 25 mm (1.0 in.):
 - 2 vertical rails from the height of 400 mm (15.7 in.),
 - 2 vertical rails and 2 horizontal rails from the width of 800 mm (31.5 in.).

* From the height of 800 mm (31.5 in.).

** Widths of 1000 and 1200 mm (39.4 and 47.2 in.).

Standards

Compliance with enclosure standards IEC 62208, UL 508A. Environmental testing to UL 50E.

The Spacial S3DC wall-mounting enclosures are compliant with the RoHS directive.

Certifications

For certification table, see page 478.

Our certificates can be downloaded from our website.

Our empty enclosures are marked CE according to the Low-Voltage Directive (LVD). It is the responsibility of the final equipment manufacturer to respect the regulations in force.

Technical characteristics

Protection degree

- IP66 for the single-door enclosures and IP55 for the double-door enclosures, according to IEC 60529.
- UL/NEMA rated 4, 4X for the single-door enclosures and 12, 12K, 13 for the double-door enclosures according to UL 50E and NEMA 250.

Resistance to external mechanical impacts

- IK10 for the plain-door enclosures, according to IEC 62262.
- IK08 for the glazed-door enclosures.

Mechanical characteristics

Attachment of mounting hardware

- 4 (or 6**) M8 × 25 shouldered backstuds for installing mounting plates and step slides, leaving a space of 10 mm (0.4 in.) behind them.
- ** 6 studs for widths 1000 and 1200 mm (39.4 and 47.2 in.).

Personnel protection

Ground connection: Spacial S3DC steel enclosures are equipped with M6 × 16 grounding studs welded in the body and the door for equipotential connection. Grounding braid ordered separately (see page 303).

Closing the enclosure: enclosures of 600 mm (23.6 in.) and higher are equipped with three linked locking points, with a single control point, preventing the enclosures from being left ajar. For locks and inserts see page 72.

Coating properties

Color: RAL 7035 gray; finish: structured.

Coating thickness: 60 µm.

Fire class: M0.

Resistance to corrosion: compliance with standard IEC 62208 for outdoor installation: 288 h of humid heat and 336 h of salt mist.

Note: the Spacial S3DC is specially designed for indoor installations. For outdoor installations, it is advisable to install a canopy or contact us.

Protection from nuclear contamination (NFT 30901): RAL 7035 and AFNOR A550 tests available on request.

For further information, see the technical annexes on page 478.

EMC protection

Standard Spacial S3DC enclosures are tested against electromagnetic disruptions. Since the enclosure is tested empty, it is advisable to rerun the tests with the enclosure equipped in its final configuration.

Grounding braids ordered separately, see page 303.

For another EMC solution and additional information on electromagnetic compatibility, see the Spacial S3HF enclosure, page 342.

Attenuation curve of the Spacial S3DC compared with the Spacial S3HF

Frequency: 3 - 13.2 Hz
 Amplitude: 1 mm/sec below 22 Hz
 Frequency: 3 - 100 Hz
 Acceleration: 0.7 g above 30 Hz

Vibration constraints

The Spacial S3DC enclosure is constructed as a single-piece body with a cross-shaped structure. The rear is flat without added parts, allowing it to comply with specific vibration constraints.

The tests were conducted according to the "rules for ships" by "Det Norske Veritas." Enclosures labelled "DNV" have undergone these tests and obtained classification "A." Since the enclosure is tested empty, it is advisable to rerun the tests with the enclosure equipped in its final configuration.

ATEX compliance

The Spacial S3DC enclosure (with adaptation) is certified ATEX by the LCIE.

Environmental consideration

Compliance with RoHS standard.

A: Enclosure height
 B: Enclosure width
 C: Enclosure depth

- (1) 4 or 6 M8 × 25 mm (1.0 in.) backstuds with widths 1000 to 1200 mm (39.4 to 47.2 in.).
- (2) 2 M6 × 17.5 mm (0.7 in.) grounding studs.
- (3) Stud center-to-center distance.
- (4) Center-to-center distance of the holes for direct mounting.

The DXF diagrams can be downloaded from our website.

Wall-mounting lugs

Set of 4 wall-mounting lugs

- Mounted directly on the rear of the enclosure, either in horizontal or vertical position.
- Available in two materials, steel and 304L stainless steel. Can be mounted in two positions, vertical or horizontal, for a wall enclosure separation of 10 mm (0.4 in.).
- Acceptable load:
 - Horizontal lug: 180 kg (396.8 lbs).
 - Vertical lug: 350 kg (771.6 lbs).
- Supplied with mounting screws and pre-mounted sealing gaskets.

180° hinge.

Door hinges

- Two models:
- For opening the door to an angle of 180°.
 - Spare standard hinges (120°).
 - Captive pin, indexed by a spring.
 - Batch of 1 hinge, delivered with hardware.
 - Material: zamack body for catalog number **NSYAEDH180S3D**, treated sheet-steel body for catalog number **NSYAEDH120S3D**, aluminum pin.
 - For the 180° hinge, the maximum allowable load on the door is 20 kg / m².
 - For the 120° hinge, the maximum allowable load on the door is 50 kg / m².

Description	Catalog number
180° hinge for S3DC enclosure	NSYAEDH180S3D
Standard 120° hinge for S3DC	NSYAEDH120S3D

120° hinge.

Accessories

Doors

Inner door

- Sheet-steel door, RAL 7035 gray color.
- Locking with 3-mm (0.1 in.) double-bar lock.
- Maximum load, 30 kg/m².
- The inner door can be installed directly on the front face of the enclosure or on the step slides (not supplied as standard).
- It is possible to mount an internal door and a mounting plate together on the step slides with the standard supply.
- Incompatible with the installation of the door stop and door switch. For further details, please contact us.
- All doors with a height > 700 mm (27.6 in.) are equipped with welded vertical profiles in order to facilitate cable management. Those profiles allows the mounting of our standard door cross rail.

Dimensions

Installation on the front of the enclosure (A) or installation on step slides (B).

- (1) Dimension resulting from installation on step slides: B-83 mm (B-3.3 in.).
 Dimension resulting from direct installation (without step slides): B-91 mm (B-3.6 in.).

Accessories

Door accessories

Steel door retainer

For blocking the door at the end of its travel.

- It is installed on enclosures with heights from 400 mm (15.7 in.) and widths from 300 mm (11.8 in.).
- Connection for grounding the enclosure on the reinforcement rail.
- Grounding accessories supplied with the enclosure (ground-connection wire to be ordered separately), see page 303.
- Please note: cannot be installed on 19" mounting plates or on enclosures equipped with an internal door.

Description	Catalog number
Steel door retainer for Spacial wall-mounting steel enclosure	NSYAEDRSCST

Door-holding system

To hold the door open while working on the enclosure.

- It is installed on the perforated rails of the enclosure doors at the required height.
- Material: polyamide 6 (PA6).
- It can be mounted on enclosures with a height > 400 mm (15.7 in.) [no door cross rail on heights < 400 mm (15.7 in.)].
- It cannot be installed in the Spacial CRN enclosures.

Description	Catalog number
Door-holding system for Spacial S3DC wall-mounting steel enclosure	NSYAEDRS3DPA6

Cable management

Cable entries

Standard cable-gland plate

Made from self-extinguishing ABS with 30% fiberglass material. Color RAL 7035.

- Pre-marked holes with diameter Pg for coupling cable glands, membrane glands, tubes, etc.
- With a polyurethane sealing gasket.
- Excellent thermal resistance.
- Pre-marked holes for cable glands.

Disconnect enclosures

Overview

S3DCD Disconnect enclosure

Disconnect enclosures

Overview

Application

- Designed to house the following enclosure disconnect equipment:
- **Square D®** class 9422 disconnect switches with flange-mounted variable depth operating mechanisms or cable mechanisms and Class 9422 flange-mounted variable depth operating mechanisms or cable mechanisms for circuit breakers. Will not accept Square D Class 9422 bracket-mounted disconnect devices, 9422TG1 or TG2 devices (contact us).
- **ABB Controls** flange-mounted variable depth operating mechanism for disconnect switches and circuit breakers.
- **Allen Bradley** 1494V variable depth flange-mounted disconnect switches and circuit breaker operators. Will not accept Allen Bradley 1494F disconnect switches, 1494D circuit breaker operators.
- **C-H Westinghouse** C361 flange-mounted variable depth operating mechanism with disconnect switches and C371 flange-mounted variable depth operating mechanisms for circuit breakers. Also Flex-Shaft handle mechanisms for circuit breakers.
- **General Electric** Type STDA flange handles and variable depth operating mechanism for disconnect switches and circuit breakers. Also Spectra-Flex cable operators for circuit breakers.
- **I-T-E Max-Flex** flange-mounted variable depth handles for disconnect switches and circuit breakers.

Ordering

The disconnect switch, operating handle, and operating mechanism must be ordered from the disconnect equipment supplier.

Disconnect enclosures

Characteristics

S3DCD disconnect enclosure: our wall-mounting circuit breaker interlocking enclosure

- Three-point lock enclosure with plain door.
- Structured finish, epoxy-polyester powder, RAL 7035 gray color.
- IP66 for the single-door enclosures, according to IEC 60529.
- UL/NEMA rated 4, 4X for the single-door enclosures according to NEMA 250 and UL 50E.
- IK10 for the plain-door enclosures, according to IEC 62262.

Technical characteristics

Enclosure body

- Single-piece body (cross-shaped structure). Gutter-shaped front profile with double fold. Flat rear.
- 4 (or 6**) M8 × 25 shouldered backstuds for installing mounting plates and step slides, leaving a space of 10 mm (0.4 in.) behind them.
- M6 × 16 grounding screws for equipotential connection between the door and the body of the enclosure.
- Four direct wall-mounting drill holes [∅ 10 mm (0.4 in.)] are sealed with plugs to maintain the degree of protection. Or mount with lugs installed from the outside (lugs ordered separately, see page 82).

Enclosure door

- Wall-mounting enclosure supplied with screwdriver insert lock as standard. Polyurethane door gasket.
- M6 × 16 grounding screws for equipotential connection between the door and the body of the enclosure.
- Easily removable, with 20-mm (0.8 in.) return with double thickness for excellent rigidity, opening to 120°, equipped with 2 or 3 invisible hinges*.
- Door opening to 180° with optional hinges (page 73).
- For heights from 600 mm (23.6 in.), three linked locking points with a single control point. Maximum load: 50 kg/m².
- Perforated rails on the door, with drill holes with a diameter of 4.2 mm (0.2 in.) in steps of 25 mm (1.0 in.):
 - 1 vertical rail from the height of 500 mm (19.7 in.) on the side with the hinges.
 - 1 vertical rail and 2 horizontal rails from the width of 800 mm (31.5 in.).
 - Load on door, see page 65.

Standards

Compliance with enclosure standards IEC 62208 and UL 508A. Environmental testing to UL 50E.

The Spacial S3DCD wall-mounting enclosures are compliant with the RoHS directive.

Disconnect enclosures

Dimensions

- A: Enclosure height
- B: Enclosure width
- C: Enclosure depth

- (1) 4 or 6 M8 × 25 mm (1.0 in.) backstuds with widths 1000 to 1200 mm (39.4 to 47.2 in.).
- (2) 2 M6 × 17.5 mm (0.7 in.) grounding studs.

- (3) Perforations in steps of 25 mm (1.0 in.).
- (4) 1 M6 × 17.5 mm (0.7 in.) grounding stud.

- Ø1 vertical rail beginning with height 500 mm (19.7 in.).
- Ø2 vertical rails beginning with width 800 mm (31.5 in.).

The DXF diagrams can be downloaded from our website.

Steel wall-mounting enclosures

Introduction

> You need an enclosure for indoor non-clean industrial environment.

CRN

PE500369-68

PE500377-48

Time Lasting

- Industrial welding process.
 - Epoxy-polyester painting.
 - Foamed-in polyurethane gasket.
- All of the above guarantees quality, water and dust tightness for years.
Front folded gutter prevents the entry of water, oil or liquids, ensuring IP66 protection.

PE500379-44

Safety

- For people:**
- Two welded M6 x 15 earth studs welded to the back and one M6 x 15 stud on the door.
- For your installation:**
- Water and dust tightness IP66.
 - Ruggedness IK10 to protect your component from external impact.
 - Hidden hinges to prevent the removal of the door.

PE500376-64

Smart

Welded door reinforcement profile allowing the mounting of equipment in models from 500 mm high.

CRNG

PE500373-70

PE500110-35

Sealed

Glazed tempered glass door and fully water and dust tight, maintaining IP66 and IK08 protection.

PE500366-187

Practical

4 welded M8 x 15 back studs shouldered 10 mm for direct installation of mounting plate.

PE500278

Convenient

- Large embedded cable-entry plate with a neoprene seal, flush with the back of the enclosure.
- Direct mounting or using the brackets fixed from outside.

This range can be configured according to your needs

(1) Enclosure without mounting plate.

(2) Two cable gland plates, one on the top, one on the bottom.

(3) Except glazed door in single door.

(4) With two holes.

(5) For flange openings type E, two NSYTSACRNC are required.

(6) Ref. NSYEMR mandatory.

Steel wall-mounting enclosures

Mounting

Characteristics	Wall-mounting kit for Spacial CRN enclosures	Wall-mounting brackets	Kit for heavy loads
	They are fixed from the outside and can be positioned vertically or horizontally indistinctly. Not included in the standard supply.	Set of 4 wall-mounting brackets. Mounted directly on the rear of the enclosure, either in horizontal or vertical position. Two types of position, for a wall-enclosure separation of 10 mm. Do not use for dynamic loads.	Kit made up of 2 reinforcement pieces. To be mounted before installing the mounting plate in top position with the standard lugs (to be ordered separately).
Material	Passivated zinc-coated steel or stainless-steel	Steel	AISI 304 stainless-steel
Maximum load	150 kg	150 kg	400 kg
Supply	4 wall-mounting brackets	Supplied with mounting screws and pre-mounted sealing gaskets	-

References	Steel	Stainless-steel	NSYAEFPFSC	NSYAEFPFXSC	NSYAEFAHLBSC

You will find the weights of the Spacial CRN - CRNG enclosures without mounting plate in the selection guide on page 86.

Mounting

Characteristics	Post-mounting device for Spacial steel enclosure	
	For indoor installations on posts with a maximum circumference of 675 mm (minimum diameter 150 mm and maximum diameter 215 mm). Rail fixed to the inserts in the rear of the enclosure with 8-mm screws. They allow the mounting of protection canopies.	
Material	Galvanised steel	
Maximum load	100 kg

Mounting

Characteristics	Support pillar	Support bracket for enclosure with anti-tilt kit and reinforcement	Floor Stand Kit for wall-mounting enclosure																																										
	The support pillar is fixed directly to the bottom face of the Spacial steel enclosure by means of an adapter plate. The latter, to be ordered in addition to the pillar, replaces the cable-gland plate. Overall height of the support foot: 800 mm. Mounting possible on all enclosures with dimensions up to 600 x 400 x 250 mm (except 200 x 200 x 150 and 250 x 200 x 150 enclosures).	The support bracket for Spacial S3D and Spacial CRN steel enclosures is used when the enclosure cannot be hung from a wall or a post. Suitable for outdoor use. Compatible with other enclosure ranges: <ul style="list-style-type: none"> ■ S3X (stainless-steel), ■ S3HF (EMC), ■ Thalassa (polyester). Maximum enclosure dimensions: 1000 x 800 x 300 mm. Floor attachment by standard M12 fastenings.	Set of 2 feet, elevating wall-mounting enclosures. Cut-outs needed on enclosure – drilling template provided with the kit.

Version without cable entry.

Hoisting

Characteristics		Eyebolts
		Set of two M8 eyebolts. They are fixed directly to the body of the floor-standing enclosure. Cannot be installed with the canopy in place.
Material	Zinc-coated moulded steel	
Maximum load	210 kg per enclosure when slinging at 60°	
Options	Have your cut-outs made by our configured service, page 6. Paint touch-up pen, page 303.	
Supply	Reinforcing brackets attached to the rings (these brackets also act as a drilling template)	
Reference		
Batch of 2 M8 eyebolts	NSYAELYTCR8	

Protection

Characteristics		Protection canopy			
		Direct mounting to the body of the enclosure by 4 M6 screws. To be used for all outdoor installations.			
Material	Sheet steel				
Finish	Painted galvanised steel, structured finish				
Colour	RAL 7035 grey				
Supply	Delivered with the mountings required for installation

SM

> Multi-purpose **IP55 compact steel enclosure** for fast and simple solutions.

Robust

- Body made as a single piece with welded rear panel.
- Front part forming a rigid frame with welded corners.

Practical

- Door rails, which can be height-adjustable and used for mounting cables.
- The adaptation profile installed in the front of the enclosure and the universal 40-mm cross rail (1 row) in the rear provide the same mounting points as the modular enclosure.

Protection

- IP guaranteed by the rigidity of the enclosure, the expanded-polyurethane sealing gasket of the enclosure and the subsequent welding.
- Double-door enclosures with inner lock on the left door.

Comfort

- Handle with sturdy design for easily activating the locking system, allowing the installation of any shape insert and any cylindrical combination key.
- Easily interchangeable insert with one click.

This range can be configured according to your needs

➤ Multi-purpose **IP55 modular steel enclosure**.

SF

Adapts to all your needs.
Assembled delivery for a ready-to-use solution.

SF kit

Adapts to customer needs.
Delivered as kit, with up to 600 different possible configurations.

Robust

- Structure formed from a single 15/10°-mm galvanised-steel section, with a high rigidity.
- Vertical uprights screwed together with connections of full steel. Placement and screwing of the 4 vertical uprights at the corners of the top and bottom frames. Mounting by 8 screws, one at each corner of the enclosure.
- Capable of withstanding 1000 kg distributed in its volume.

Reliable

- The design of the profile creates a double protective barrier against the entry of water and dust when coupling two enclosures.
- The first barrier is the metal connection of the sections, and the second barrier is the EPDM gasket that guarantees the sealing.

Aesthetics

The built-in panels and handle with new design give the enclosure a new appearance.

Comfort

- Handle with robust design for easily activating the locking system, allowing the installation of any shape insert and any cylindrical combination key.
- Panels with captive screws for easier assembly and dismantling.

Practical

Suspension of the rear panel using a self-centering piece to facilitate screwing.

Simple

The new design allows enclosures to be coupled in any direction, adapting to all installation surfaces.

Accessible

The symmetric design of the profile allows doors to be installed on any side of the enclosure, opening to right or left, providing full accessibility to the enclosure.

Fast

- The double system of cut-outs on the structure allows most accessories to be installed using self-tapping TORX T30 M6 screws or nuts.
- Clip-on quick-mounting cross rails, fixed with self-tapping screws.
- Door installation inserting the captive pins of the hinge in their housing in the door.

Floor

Plinth in kit form

Front and rear kit

Side panels

Complete plinth

Plinth height 100 mm

Plinth height 200 mm

The complete plinth consists of two elements, one is the front and rear kit, determined by the length of the enclosure, and the other consists of the side panels, which determine the depth of the enclosure. The number of side panels required is decided according to the desired plinth combination.

- ⊕ Robust design.
- ⊕ The modular plinth system makes it possible to reduce the number of references in stock.

Floor

Possibility of joining plinths

1 - The surfaces between corners are always in contact.
They are joined by an M8 screw and nut, not included in the standard supply.

- + Longitudinally free space for passing cables.
- + Greater rigidity of the resultant assembly unit.

2 - By side panels, the M6 screws and caged nuts, not included in the standard supply, reference **NSYSPM6 and reference **NSYCN9M625**, which can be mounted above and/or below.**

- + Improves rigidity in the depthwise direction during transport.

3 - Vertical plinth assembly by means of M12 screws and nuts, not included in the standard supply.

- + The two heights of corners can be combined.

Possibility of mounting the enclosure to the plinth

1 - Mounting from the inside of the enclosure by means of an M12 screw, screwing directly into the corner of the plinth.

- + Mounting convenience and speed.

2 - Mounting from the outside of the enclosure with a M12 screw, screwing directly onto the vertical upright.

- + Maximum rigidity of the enclosure-plinth assembly.

Floor

Possibility of mounting the plinth to the floor

1 - Mounting from the inside of the enclosure.

The machining angle varies according to the plinth model:

Plinth height 100 mm $\alpha = 18^\circ$.

Plinth height 200 mm $\alpha = 9^\circ$.

2 - Mounting from the outside of the enclosure, optimum point for the rigidity of the assembly.

The machining angle varies according to the plinth model:

Plinth height 100 mm $\alpha = 22^\circ$.

Plinth height 200 mm $\alpha = 11^\circ$.

3 - It is also possible to use floor-mounting supports, reference **NSYSGF**, to fix the corner or the panel and the corner to the floor.

The corners of the ends can be rotated in the event of needing to remove the side panels of the plinth and/or to obtain access to the mounting outside the floor, when the set is installed against the wall.

Mounting the enclosure to the plinth

Mounting from the inside of the enclosure by means of an M12 screw, screwing directly into the corner of the plinth.

⊕ Mounting convenience and speed.

Mounting the enclosure to the ground

Mounting from the outside of the enclosure, optimum point for the rigidity of the assembly.

The machining angle varies according to the plinth model:

Plinth height 100 mm $\alpha = 22^\circ$.

Plinth height 200 mm $\alpha = 11^\circ$.

Enclosure against a wall

Thanks to the design of the corners, when the enclosure is installed against the wall, the following is possible:

- to remove the side panels (turning back corners),
- to access the external mounting to the floor.

It is also possible to use floor-mounting supports, reference **NSYSGF**, to fix the corner or the panel and the corner to the floor.

Assembly of the plinth panels

The panels are fixed with an M6 screw to the corner, included in the standard supply of the side panels.

The front and rear panels are delivered mounted on the corners.

Floor

Mounting options			
Characteristics	Screw M6 Torx T30 M6 x 10 screws.	Caged nuts M6 caged nuts.	Levelling the plinth The plinth allows levelling by means of an M12 screw.

FL21 cable-entry membranes (1)

Membrane plate for watertight cable entries made from insulating material (fire resistance level UL94-V0).
 Direct installation in the FL21 cable-entry plate adapter.
 4 models: plain plate and membrane plates from 7 to 35 cable entries.

- **Material:** grey plastic.
- **Ingress protection rating:** IP65.
- **Supply:** membrane plate and mounting elements.

Doors

Characteristics		Inner door	Side door
		Door for additional protection. Prevents the switchgear from being manipulated by unauthorised personnel. Allows the installation of switchgear mounted directly on the door. Mounting on the top and bottom frame of the enclosure. Depth adjustable with a pitch of 25 mm, from first mounting point. Opening to right or left, with two locks, 3-mm double-bar, with central handle. Reinforcement frames on the rear, cut-outs with a 25-mm pitch, for equipping the door. Maximum acceptable load: 15 kg.	Door for the side of the enclosure, replaces the side panel. Installation directly on the structure of the enclosure, opening 120°. Lock with handle and 5-mm double-bar insert. 4 locking points. Reinforcement frame, cut-out with a pitch of 25 mm. Opening to right or left.
Material		Steel	Steel

Locking system

Handles for insert types DIN, KABA, ASSA		Flat escutcheon lock
Insert handle	Double-insert handle	Optional flat escutcheon lock. Replaces the handle lock. Easy to change the opening direction of the door, right/left. Possibility of changing the turning direction of the insert.
The inserts are easily and quickly mounted without any screws and allow the installation of profiled DIN, KABA and ASSA locks. To install shape inserts or cylindrical barrels, it is necessary to add adapter ref. NSYLADP. Easy to change the opening direction of the door, right/left. Space reserved for enclosure identification, 21 x 27 mm, protected by a label frame.	The double insert handle can perform the "AND" and "OR" functions (are supplied with the handle). - "AND" function: one insert blocks the activation of the other insert. - "OR" function: either insert can release the handle. Easy to change the opening direction of the door, right/left. Space reserved for enclosure identification, 21 x 27 mm, protected by a label frame. To install shape inserts or cylindrical barrels, it is necessary to add adapter ref. NSYLADP.

Stainless-steel wall-mounting enclosures

Introduction

PE501229.eps

What is stainless steel?

How is the stainless steel grade determined?

These enclosures have been specially designed for the chemical, oil and food and beverage industries, among others, which are particularly demanding in terms of hygiene and resistance to corrosion.

Thanks to an elaborate composition

■ The following table shows the percentages of the main alloy elements that make up stainless steels. The resistance of the material to aggressive agents in the environment depends mainly on these alloys.

Stainless-steel type		Chemical composition (%)			
AISI grade	N. Europe	Carbon	Chromium	Nickel	Molybdenum
304L	1.4307	< 0.03	17 - 19	8 - 10	0
316L	1.4404	< 0.03	17 - 19	10 - 13	2 - 2.25

PE501230

Choosing a stainless steel grade

AISI 304L stainless steel

(known as food and beverage stainless steel)

The most commonly used type in the food and beverage industry for its resistance to corrosion and easy cleaning.

- Prevention against corrosion, especially in the presence of organic acids.
- Resistance to the action of nitrous gas in the presence of condensation water and in most aggressive environments.

PE501231

AISI 316L stainless steel (known as marine stainless steel)

Recommended in salty or chlorinated environments due to its very high resistance to corrosion thanks to the presence of molybdenum.

- Improved resistance to corrosion.
- Particularly well adapted to environments charged with acidity, bromine and saline halides or which use very corrosive additives and solvents.

Stainless-steel wall-mounting enclosures

Introduction

The finish

The finish: 3 solutions against aggressive environmental agents

Surface condition plays an important role in the fight against bacteria.

The lower the roughness, the fewer bacteria become incrustated.

Reduced roughness means fewer bacteria, less adherence of materials and an impeccable finish.

To choose a finish is also to choose an appearance of the enclosures that matches the environment of other machines and equipment.

> Solution 1: Scotch-Brite® brushing

The method used consists of brushing as defined by the ASTM (American Society for Testing and Material).

- Finish very commonly used for the chemical and food and beverage industries.
- Surface roughness is improved thanks to an additional polishing process which offers more efficient characteristics against polluting elements.
- Surface roughness, $Ra \leq 0.8 \mu\text{m}$.

> Solution 2: Micro-beading (on request)

Exclusiveness, an impeccable finish with smooth silky appearance.

The method:

- Bombardment with miniscule ceramic balls of the entire surface to be treated at very high speed.
- Closes micro-cracks caused during lamination by flattening.

The result:

- Increased hardness.
- Compared to Solution 1, reduced surface roughness ($Ra \approx 0.8 \mu\text{m}$). A perfectly even surface, with a silky appearance (no scratches and no burrs).
- Reduces the adherence of materials.
- Allows disinfection.

Typical application: pharmaceutical and food and beverage industries.

> Solution 3: Protective painting (on request)

The highest protection against aggressions, external pollution and projections of metal particles.

- Provides the ultimate protection against corrosion.

Typical applications: marine, seaside, off-shore.

Stainless-steel wall-mounting enclosures

Introduction

➤ These enclosures have been specially designed for the chemical, oil and food and beverage industries, among others, which are particularly demanding in terms of hygiene and resistance to corrosion.

PB60075-75

PB601225-31

Finishes

- Two types of steel offered as standard: 304L and 316L, with Scotch-Brite® brushed finish.
- Painted or micro-beaded finish (on request).

PB601239

Large range of accessories

- Stainless-steel accessories: canopy, wall-fixing lugs.
- Accessories of the standard offer: mounting plate, inner door, modular chassis and step slides.
- Large selection of locks.

PB601240-60

Sealing

- Protection rating of IP66 (1 door) or IP55 (2 doors) according to IEC 60529: complete protection against dust and water sprays.
- Polyurethane gasket.
- Gutter-shaped front profile.
- Three closure points for the double door.

PB601241

Robustness and durability

- Resistance to external mechanical impacts:
 - IK10: plain door,
 - IK08: glazed door.
- Door reinforcement frame or profile.
- Stainless-steel hinges.

PB601242-45

Convenience and time saving

- 304 or 316L stainless-steel wall-mounting brackets.
- Vertical reinforcement perforated profiles, which make it easier to equip the door.
- Reversible door opening to 120°.
- Easy installation directly on the machine thanks to the 4 rear drill holes.

This range can be configured according to your needs

Stainless-steel wall-mounting enclosures

Characteristics

Characteristics		304L stainless-steel		316L stainless-steel			
		Enclosure with plain door.	Enclosure with glazed door, Securit® glass, 4 mm thick.	Enclosure with plain door.			
Material	AISI 304L		AISI 316L				
Finish	Scotch-Brite® brushed						
Thickness	10/10° - 15/10° mm						
Ingress protection rating	IP66 (1 door) or IP55 (2 doors)						
Mechanical protection rating	IK10	IK08	IK10				
Standards	<ul style="list-style-type: none"> ■ IEC 62208 ■ UL 508A ■ CSA-C22.2 No. 14 ■ NEMA □ 1 door enclosure: type 1, 2, 3, 3R, 4, 4X, 5, 12, 13 □ 2 doors enclosure: type 1, 12, 12K 						
Certifications							
Installation	Outdoor installation: compliant with IEC 62208 regarding type tests specified in §9.12 (resistance to ultra-violet (UV) radiation) and §9.13 (resistance to corrosion). It is always advisable to install a canopy to avoid water stagnation on the upper part of the enclosure						
Other characteristics	<ul style="list-style-type: none"> ■ Single-piece body (cross-shaped structure). Gutter-shaped front profile ■ 4 rear studs for mounting the material ■ 2 cut-out vertical profiles on the door (from a height of 600 mm), with drill holes with a diameter of 4.25 mm and a pitch of 25 mm for installing accessories ■ Door strengthening frame (from a height of 1000 mm), cross-section of 20 mm x 15 mm, with drill holes with a diameter of 5 mm and a pitch of 25 mm ■ Standard lock with 3-mm double-bar lock (chrome-plated zamak) ■ 2 locking points for heights of more than 500 mm or three points for two-door enclosures ■ Stainless-steel hinges screwed to the body of the enclosure. They make it easier to remove and invert the door. Opening angle: 120° ■ Maximum load on the door: 50 kg/m² ■ Polyurethane gasket ■ M6 x 16 screws on the door and on the body, allowing equipotential connection between the earth connections (on request) ■ 4 holes for mounting to wall directly or with the help of mounting lugs (on request), blocked by sealing plugs

Stainless-steel floor-standing enclosures

Introduction

➤ These enclosures have been specially designed for the chemical, oil and food and beverage industries, among others, which are particularly demanding in terms of hygiene and resistance to corrosion.

SMX

PB500138-63

SFX

PB502730-30

PB501232-36

PB500958-20

PB500141-80

PB501255-20

PB501228-85

PB501241-40

PB501232-36

Material and finishes

Stainless-steel grade:

- AISI 304L and 316L as standard (Spacial SMX).
- AISI 316L (on request) (Spacial SFX).

Finishes:

- Scotch-Brite® brushed (standard).
- Micro-beaded (on request).
- Painted (on request).

Convenience and time saving

- Complete range of accessories for installation, cable management, etc.
- 316L stainless-steel plinth: easy cable entry (Spacial SMX).
- 304L or 316L stainless-steel plinth: easy cable entry (Spacial SFX).
- Reversible door opening to 120°.
- Padlock lock with key or form insert.
- Adjustment rails perforated with a pitch of 25 mm.
- Perforated reinforcement frame allowing accessories to be mounted on the door.

Sealing

- Protection rating of IP55 (IEC 60529): complete protection against dust and water sprays.
- 3-point closures.
- Canopy (optional):
 - protects the sealing plane of the door,
 - guarantees correct water drainage,
 - no stagnation on the top.
- Single-piece cable-gland plate with polyurethane gasket.

Compatible with the other ranges

- The mounting plates and other accessories of the Spacial SM and SF standards metal offers.

Hygiene

- The high quality of the standard finish enables very easy maintenance while avoiding contamination.
- The hygienic feet made from 316L stainless-steel, adjustable between 140 mm and 200 mm height, make it easier to clean under the enclosures.

Robustness and durability

- Resistance to external mechanical impacts: IK10 according to IEC 62262.
- 3 hinges made entirely from stainless-steel.
- Door reinforcement frame.

Resistance to corrosion

- High resistance to corrosion. 304L and 316L stainless-steels provide the best solutions for applications in extremely demanding environments.

This range can be configured according to your needs

New

Early 2016, the PLS range changes color

> **Why change?**
To harmonize the Schneider Electric Universal enclosures offer. Answer to customer requests and to the the market trends.

> **What happen with the part numbers (references)?**
Every product that has changed in colour also has a changed part number. The letter "G" has been added at the end on reference. *Example:*

RAL 7032	RAL 7035
NSYPLM43	NSYPLM43G

> **How can I obtain RAL 7032 enclosures?**
Consult us.

> **Will the new RAL 7035 colour offer the same properties as RAL 7032?**
Yes, all mechanical properties will be the same. The light reflexion is even improved.

> Insulating industrial boxes:

- ABS for conventional applications (IK07) with the usual constraints,
- polycarbonate for enhanced impact resistance (IK08) and for outdoor applications or applications directly exposed to UV,
- polycarbonate certified UL,
- IP55 rating for all ranges,
- Protection against electrical impacts Class II.

PB500248E55

PB500271-32

Easy to install

3 methods of mounting the box to its support.

PB500273-72

Easy to use

Only one tool is required: a flat screwdriver.

PB500091

Smart

Mounting studs on the cover.

This range can be configured according to your needs

4 different services available:

Assemble to order

Mounting of standard accessories

Painting

Machining

(1) Ref. **XALEK1702** houses an emergency switching off palm button with mechanical locking according to standards IEC 60364-5-53 and 60947-5-5.

Button description

- Emergency switching off function with a red, Ø 40 mm, "turn to unlock" palm button.
- Start / Stop function with 2 push buttons.
- Up / Down / Stop function with 3 push buttons.
- Technical features of the switches:
 - "NC" switch with positive opening manoeuvre according to IEC 60947-5-1 appendix K,
 - mechanical durability of the emergency switch: 0.1 million cycles,
 - mechanical durability of the "NC" and "NO" switches: 5 million cycles,
 - protection against short circuits: 10 A.

(1) Air flow under $\Delta P = 0.7$ bar.
(2) Condition for IP68.

Cover accessories

Characteristics			Set of 4 shape screws			Pack of 4 handles		
			<ul style="list-style-type: none"> The Thalassa boxes are delivered as standard with slotted-head screws for flat screwdrivers from 4 to 5.5 mm. With box sizes from 138 x 93 x 72 mm, these screws can be replaced for screws with different standardised heads, to comply with most cases. After removing the standard screw, simply position the new screw by pressing on it. The adapter clips (intermediate parts for tightening the cover on the body of the box) are the same as those for the standard screws. They are not delivered with the shape screws (see drawing on page 180). A single key for opening the boxes as well as the other enclosures of your installation. 			<ul style="list-style-type: none"> The handle (or thumbwheel) allows the screws to be handled without any tools. It is ideally associated with a box equipped with hinges. It snaps onto the head of the standard plastic screw.

Insulating modular boxes

Introduction

> **PLS boxes:** polyester rear and PC transparent cover with hinges and wing screws for manual opening.

Modular

The dimensions of the sides, multiples of 9 cm, allow the creation of assemblies.

Protection

- IP65.
- Gasket between body and cover.
- IK09.
- Insulation Class II.

Easy

Bosses with inserts, at the rear of the body, for mounting plates or various supports.

This range can be configured according to your needs

Insulating modular boxes

Characteristics

Class II

Characteristics	Complete box	Insulating modular boxes with modular distribution chassis	Modular distribution chassis
	<ul style="list-style-type: none"> ■ Insulating boxes that can be coupled by all their side surfaces, allowing the creation of the greatest variety of modular assemblies. ■ The product references show the two lateral dimensions in cm. ■ 14 sizes of insulating boxes; the sides are multiples of 9 cm. ■ Rear made from polyester reinforced with fibreglass, moulded by hot compression, 9 sizes. ■ 3 types of cover available according to the sizes: <ul style="list-style-type: none"> □ standard cover, made from transparent polycarbonate with neoprene gasket, 45 mm high, or 95 mm high (final index A) according to the sizes, □ opaque polycarbonate cover (index C), with neoprene gasket, 45 mm high, or 95 mm high (final index A) according to the sizes, □ polyester reinforced with fibreglass cover (index P) with PUR gasket, 45 mm high. ■ Complete box includes rear, cover, locking screws and sealing device. ■ The rears (prefix F) and the covers (prefix T) are supplied separately as standard references. The separate covers are supplied without locking screws or sealing accessories. ■ The PLS enclosures with transparent cover are also offered in batches; the reference refers to the complete batch. ■ Excellent resistance to corrosion; can withstand most chemical agents. ■ Full insulation to create class II assemblies. ■ Standard lock with slot screws outside the volume of the boxes. Delivered with sealing system. ■ External wall-mounting by 4 lugs, to be ordered separately. ■ Service temperature: -30 to +70°C. ■ Bosses with M6 inserts for mounting the mounting plate. ■ Halogen-free and compliant with the RoHS directive. 	<p>PLS boxes, polyester rear and PC transparent cover with hinges and wing screws for manual opening.</p> <p>Built-in DLS modular chassis, made up of an insulating protection panel, RAL 7011 colour, 35-mm DIN rails and a 2 x 16 + 5 x 6 mm² neutral/earth connection strip.</p> <ul style="list-style-type: none"> ■ Opening for cable entry, delivered with lock plate, ref. NSYTL27270. ■ Double-insulating installation. ■ Plastic external hinges, allowing opening to 180°. ■ Removable 36-mm blanking covers (2 modules): 1 per row in the standard offer. 	<p>Built-in DLS modular chassis, made up of an insulating protection panel, RAL 7011 colour, 35-mm DIN rails and a 2 x 16 + 5 x 6 mm² neutral/earth connection strip.</p>
Colour	RAL 7032 grey* (opaque rears and cover)	-	-
Ingress protection rating	IP65	-	-
Mechanical protection rating	IK09	-	-
Certifications	<ul style="list-style-type: none"> ■ Certification according to standard IEC 62208, guaranteeing IP, IK, resistance to heat and fire (self-extinguishing), insulation to 5000 V, and load of the mounting plate, 100 kg/m² ■ UL508A** CAN/CSA-C22.2 - Types 1, 2, 3, 3R, 3S, 4, 4X, 12 and 13 	-	-
Installation	Outdoor installation: compliant with IEC 62208 regarding type tests specified in §9.12 (resistance to ultra-violet (UV) radiation) and §9.13 (resistance to corrosion). It is always advisable to install a canopy to avoid water stagnation on the upper part of the enclosure	-	-
Options	-	The boxes can be equipped with a double-bar lock and handle ref. NSYCL27M , or a lock with key ref. NSYCL27L405 , by specific demand	-
Supply	-	The modular chassis can be ordered separately	-

* RAL 7035 from 2016.

New

Early 2016, the PLM range changes color

> **Why change?**

To harmonize the Schneider Electric Universal enclosures offer. Answer to customer requests and to the the market trends.

> **What happen with the part numbers (references)?**

Every product that have changed in colour have also changed the part number. It is done just adding a letter "G" at the end on reference. *Example:*

RAL 7032	RAL 7035
NSYPLM43	NSYPLM43G

> **How can I obtain RAL 7032 enclosures?**

Consult us.

> **Will the new RAL 7035 colour offer the same properties as RAL 7032?**

Yes, all mechanical properties will be the same. The light reflexion is even improved.

Insulating wall-mounting enclosures

Introduction

> Monobloc wall-mounting enclosure

- made from polyester reinforced with fibreglass, moulded by hot compression.
- Degree of protection IP66,
- Impact resistance IK10 for the plain doors and surfaces and IK08 for the glazed doors of the polyester versions,
- UL certification and NEMA classification 4x and 13 for the polyester wall-mounting enclosures,
- Total insulation to produce class II units,
- Complies with RoHS and REACH Directives

P1237102-32

Service life

High resistance to corrosion in harsh environments, maintaining its mechanical properties and insulation.

PB501327-40

Easy

- Door easily reversible by turning it over.
- Opening to 120° or 180°.
- Easy machining with no corrosion.
- Lightness.
- Polyamide hinge pin, easily removable and captive.

PB501325-95

Smart

- Notches for easy mounting of DIN rails.
- Grid pattern on the rear of the door for marking the machining operations.

PB501325-60

Insulating wall-mounting enclosures

Specific accessories

Base accessories

Characteristics				ZM plinth for PLM enclosure						
				Designed to support and raise enclosures NSYPLM75G , NSYPLM86G and NSYPLM108G . <ul style="list-style-type: none"> ■ Plinth height of 200 mm; stackable to obtain a 400-mm plinth. ■ Four floor-attachment points; the symmetry of the parts prevents incorrect assembly. The frontal parts of the plinth (front and rear) have two stainless-steel screws protected by a plastic cap; these screws make it possible (using an Allen key) to open and remove the frontal parts for easier cable installation. In stacked position, the bottom plinth can be partially buried. It is provided with one transverse reinforcement rail, adjustable to adapt to the position of the cables. The reference of the plinth contains all the accessories required for attaching the enclosure to the plinth and for stacking two plinths.						
Material				Polyester reinforced with fibreglass, moulded by hot compression						
Ingress protection rating				IP44						
Mechanical protection rating				IK10						
Standards				Guarantees total insulation according to IEC 61439-1						
For enclosure				Cabling area		Plinth

Accessories	Cable supporting cross-rail		Kit for IP54	Feet for partially buried installation
	The lateral sides of the plinths are provided with bosses for attaching cross-rails with cut-out profiles, for supporting cables. The reference of the cross-rail includes all the elements required for assembly.		Makes it possible to obtain IP54 for the plinth and the plinth-enclosure coupling.	Allows the partially buried installation of plinths before completion of the floor. The plinths are attached by four feet with a standard length of 750 mm. Possibility of horizontal adjustment of the plinth. The reference includes a kit made up of four feet and mountings.

Insulating wall-mounting enclosures

Specific accessories

Locking system

Characteristics

Locks and inserts for enclosures with H ≤ 847 mm

- The ABS/PC 310 x 215 mm enclosure is supplied with a lock with a double-bar insert as standard.
- The 308 x 255 mm enclosure is supplied with two locks with a double-bar insert as standard.
- The polyester enclosures from 430 to 847 mm high are delivered as standard with:
 - 2 locks with double-bar insert, ref. **NSYCDBPLM**,
 - or a 3-point closure with handle and lock with key 1242 E (enclosures **NSYPLM●●V**).
- Double-bar insert ref. **NSYTDBCRN**, is placed in a rectangular escutcheon.
- A plastic key, ref. **NSYDBP**, enabling the opening of the double-bar insert, is included in the standard supply. This key can be fixed to the double-bar system to remain on the enclosure and be used as a handle.

Options

Options to transform the locks with double-bar inserts

Changing the shape inserts for locks with keys according to the following table.

Replacement for locking handle with cylindrical barrel, delivered with all the parts required to change the lock.

New Early 2016, the PLA and PLD ranges change color

RAL 7032

➔

RAL 7035

> Why change?
To harmonize the Schneider Electric Universal enclosures offer. Answer to customer requests and to the the market trends.

> What happen with the part numbers (references)?
Every product that have changed in colour have also changed the part umber. It is done just adding a letter "G" at the end on reference. *Example:*

RAL 7032	RAL 7035
NSYPLM43	NSYPLM43G

> How can I obtain RAL 7032 enclosures?
Consult us.

> Will the new RAL 7035 colour offer the same properties as RAL 7032?
Yes, all mechanical properties will be the same. The light reflexion is even improved.

New dimensions
2000 mm height
620 mm depth

Polyester floor-standing enclosures

Introduction

> The **floor-standing enclosures** are made from **polyester reinforced with fibreglass**, moulded by hot compression. High resistance to corrosion in harsh environments, it maintains its mechanical and insulation properties.

Bigger dimensions

The new options with **2000 mm** height and **620 mm** depth have been created to meet industry and infrastructure demands for motor control, power distribution, electronics or telecom applications.

PLAT version

Ventilation

Open top part with canopy allowing for ventilation.

Easy

Various bosses for M8 inserts.

PLAZ version

Open bottom

Big open bottom to be mounted directly on the floor or on a plinth.

Smart

Plain mounting plate installed on step slides and compulsory adapter plates in all the enclosures with open bottom part.

PLAZT version

Easy

Door opening to 180°.

Resistant

Anti-lever security system.

This range can be configured according to your needs

* Not valid for coupling 2 enclosures using ZZ or ZH type plinth.

[!] Enhanced depth enclosure

- After industrial machining, the frames of the standard enclosures are coupled in the factory to obtain enhanced depth floor-standing enclosures.
 - The internal volume of the standard enclosures remains unaffected.
 - Possible for the 4 enclosure versions, in particular for 19" applications with widths of 750 and 1250 mm.
 - IP44 in the version with ventilated canopy, IP54 for the other versions.
 - A rear door can be installed in the coupled enclosures.
- Option of installing 2 sets of step slides (at the front and at the rear).
- Supply or installation in the enclosures of a 19" chassis with side trim plate installed on the step slides:
 - 19 U, height 1000 mm,
 - 23 U, height 1250 mm,
 - 25 U, height 1500 mm.

Mounting

Mounting plates for floor-standing enclosures

Dimensions

Plain mounting plate

+ Advantages

- The Spacial.pro tool helps determine the optimum dimensions of the mounting plate.

- The triple fold of the vertical edges of the mounting plate contributes to increasing the latter's rigidity and increases handling safety by preventing finger cuts.

Perforated mounting plate "Telequick"

(1) Cut-outs 11 x 26 with a pitch of 15 x 30.

Bracket for mounting uprights

- Brackets for mounting the uprights, standard or technical, at the same level as the structure, obtaining a greater working surface inside the enclosure.
- They allow two pairs of uprights to be fixed back to back, doubling the working surface.
- The brackets are fixed to the structure by means of M6 self-tapping screws.
- Adjustable depth with a pitch of 25 mm.
- **Material:** zinc-coated steel.
- **Supply:** four brackets for mounting uprights and mounting elements.

Mounting

Cross rails and profiles for floor-standing enclosures

In the **Spacial SF**, **SM**, **SFX** and **SMX** enclosures, it is possible to create a mounting at any point of the inner volume, providing mounting planes with different widths, heights and depths.

In the case of the **Spacial SM**, it may be necessary to install vertical/horizontal adaptation profiles and 40-mm universal cross rails (1 row).

For the formation of structures inside the enclosure, it is possible to combine three types of cross rails:

- Universal cross rails of 40 (1 row), 65 (2 rows) and 90 mm (3 rows).
- Quick-mounting cross rails of 40 (1 row), 65 (2 rows) and 90 mm (3 rows).
- Light cross rails.
- Mounting plate sliding rails, see page 247.

★ Combination examples

Spacial SF and SFX: the cross rails can be fixed to the structure and among each other, offering multiple possibilities.

The universal cross rails allow installations at the same level, around the entire perimeter of the enclosure. To perform this type of installation in a **Spacial SM** enclosure, the vertical adaptation profile and the vertical 40-mm universal cross rail (1 row) are required, mounted in the back of the enclosure.

Spacial SF: the universal cross rails can be installed in vertical position.

Mounting

Cross rails and profiles for floor-standing enclosures

Combination examples

PB500838-26

The quick-mounting cross rails can be fixed directly to the structure, quickly and easily.

■ **Spacial SF and SFX*:**

□ They clip onto the structure and are fixed by M6 self-tapping screws, or optionally with M6 caged nuts.

■ **Spacial SM:**

- Possibility of clipping onto the adaptation profile or another cross rail.
- Mounting by means of M6 self-tapping screws.
- Mounting by means of M6 caged nuts.

* In enclosures Spacial SFX is not possible to mount it in depth.

PB500839-30

The quick-mounting cross rails can be used as a support for equipment in the back of the enclosure or offset with a pitch of 25 mm, using two universal cross rails in vertical position.

PB500841-24

The 40 mm universal cross rails (1 row) used as depth-adjustable uprights with a pitch of 25 mm allow the installation of a multitude of supports for installing switchgears. The height may be adjusted with a pitch of 25 mm.

PB500842-30

The main mounting point to the quick-mounting cross rails is the 5.2 mm drill hole for M6 self-tapping screw, although they can also receive M6 and M8 caged nuts.

(2) Cross rails only for mounting cables.

Mounting

Cross rails for floor-standing enclosures

SM SF SFX

Characteristics

Light cross rails

- **Spacial SF and SFX:** direct mounting to the structure or between cross rails.
- **Spacial SM:** mounting by means of adaptation profiles and 40 mm universal cross rails (1 row), or between cross rails in any other position.
- Adjustable with a pitch of 25 mm.
- The light cross rails are equipped with a row of drill holes with a diameter of 5.2 mm and a pitch of 25 mm, which allows mounting with an M6 self-tapping screw, ref. **NSYST30M6S**.

Material

Zinc-coated steel

Thickness

-

Supply

Two light cross rails and mounting elements

Mounting

Connectors for symmetric C-shaped rails

Examples

Combinations with connectors for symmetric C-shaped rails

- The connectors enable the formation of chassis or frames and structures for mounting switchgear, in any position inside the enclosures, allowing the mounting of DIN rails or other elements.
- See symmetric C-shaped rails.

Characteristics	EMA connectors	EVA connectors	UCA connectors
-----------------	----------------	----------------	----------------

	To joint two symmetric C-shaped rails, C20 and C40 types, at right angles; they can also be used to obtain a T-shaped assembly.	To join two symmetric C-shaped rails, C20 and C40 types, forming an overlapping assembly with plane change, or also at right angles for the formation of spacers supports at a different level.	To join symmetric C-shaped rails, types C20 and C40, forming a cross-shaped assembly of three rails located on the same plane, for example inside a frame.

Cable management

Cable entries

Key features when selecting a cable entry

1 - Multiple cable entries or single cable entries

Your choice depends on:

- The amount of cables going through the cable entry: generally for 3 or more cables, choose a multiple cable entry. It will make your installation faster and more economical.

In other words, your final bill will not necessarily be lower with single cable entries!

- Flexibility of installation: for high flexibility, the multiple cable entry is the right choice.

Multiple

Single

2 - Entry cable material

- **Soft membranes** allow cables to be easily pushed through, but still offer a good IP rating, protecting from moisture as well as physical intrusions. Cable retention force, however, is lower than with other alternatives.

Push the membrane into a standard hole.

Make a small hole in the membrane.

Push the cable or tube through the guide hole.

Pull the cable or tube back some 20 mm to lock it.

- **Hard plastic** needs specific tools to create the opening (drill or knife) but, thanks to the cable gland, offers a very high retention force. Another use of this solution is for public places, since the hard surface prevents objects being pushed in.

- **Combined:** the material of the cable entry plate is hard plastic, but the cable is pushed through a soft membrane. In this case you have the advantages both of soft membranes (easy and fast installation, flexibility) and hard plastic membranes (high retention force, when using specific cable clamps).

PB6502707-70

PB6501702

PB6501703-30

PB6501704-35

3 - Cable glands to be fitted

- Some multiple cable entries require a cable gland to be able to retain the cables and ensure the degree of protection.

PB6502706-68

4 - Installation possibilities

There are 4 ways to install your cable entries on the enclosure:

■ **By replacing the cable gland plate:** the standard cable gland plate of your S3D wall-mounting enclosure is unscrewed and replaced by the cable entry. A gasket between enclosure and cable entry will provide full water and dust tightness.

■ **On modified cable gland plate:** the standard cable gland plate is unscrewed and machined. A cut-out is created in it.

■ **On cable gland plate adapter:** this plate, which has the outer dimensions of a standard cable gland plate, has one or more pre-cut cut-outs of standard dimensions (FL13 and FL21).

On steel wall-mounting enclosures, the plate can replace the standard cable gland plate once the cable entry is fitted into it. On polyester enclosures, a cut-out must be created. Schneider Electric provides this service: a precise laser cut-out is factory-created upon request.

On steel floor-standing enclosures, you may either use the specific cable gland roof or create a cut-out (see expert's tip 1, page 277).

Cable gland plate adapters				
Enclosure range	1 membrane	2 membranes	3 membranes	4 membranes
Spacial S3D	PB500604-16  NSYTL•FL	PB500604-15  NSYTL•2FL	-	DB300718-15  NSYTLG4FL
Spacial SF	PB502708-10  NSYSFLR●● NSYSFLR●●●	PB502709-12  NSYSFLR●● NSYSFLR●●●	PB500597-15  NSYSFLR●●●	-

■ **Directly on the enclosure:** a cut-out is created on the enclosure's side according to the cable entry's dimensions (see expert's tip 1, page 277).

Zoom on...

FL13 and FL21 are standard cut-out dimensions frequently used in northern European countries and also used by our enclosures for several years now.

Cable management

Cable entries

PE602710-32

Full flexibility

PE600946-35

Medium flexibility

5 - Flexibility of the installation

■ **Full flexibility:** this means that cables can be added/removed easily, changing:

- quantity
- diameter
- position

(see expert's tip 2, page 277)

■ **Medium flexibility:**

- the amount, diameter or position of cables can be changed to a limited extent.

■ **Low flexibility:**

- it is not possible to change the above parameters.

6 - Reversibility

■ **Full reversibility:** this means that cables can be added/ removed easily without losing their initial characteristics, such as water tightness.

■ **Medium reversibility:** for soft membranes, once the cable has been removed, there may be a loss of IP depending on the size of the cable and the cut. For hard plastic entries or combined material entries, initial characteristics are regained by adding plugs.

■ **Low reversibility:** the cable entry must be completely replaced in order to regain the initial characteristics.

7 - Degree of protection (IP)

If an enclosure is to be used in a clean, dry and well insulated environment, lower levels of IP may be acceptable (IP54 or IP55).

In a dusty environment you may require higher IP levels, such as IP65 or IP68 (see expert's tip 4, page 277).

8 - Cable retention

Choose the right level of cable retention according to your needs. For locations accessible to the public, preferably choose a high level of cable retention.

9 - Cable diameter

Choose the cable entry seal according to the cable diameter.

Take into account cable diameter tolerances.

10 - Cable installation time

Each cable entry has different installation characteristics. Some can be installed easily and quickly thanks to the soft membrane. Take this into account depending on labour costs in your region.

DB300413-53

Cable management

Cable entries

PB502711-30

PB502712-31

11 - Quantity of cables to be fitted for a given surface

For some installations, a large quantity of cables must go through the cable entry. Some cable entries can receive a high density of cables, which can result in more economical installation (fewer cable entries to be bought).

For small enclosures, it may simply be impossible to install too many cable entries due to the available space on the enclosure's wall (see expert's tip 3, page 277).

PB502713-34

12 - Cable entries for cables with connectors

Some cables have large connectors which cannot be pushed through tight cable clamps or cable seals.

These cable entries have the unique advantage of not requiring the cable to be cut, thanks to the snap-fitting system.

DB300410

DB300410

PB502714

PB502715

A high cable retention force is provided thanks to the integrated cable fastener.

Expert's tip

Specific

Configured

1 Some cable entries require cut-outs to be machined on the enclosure or cable gland plate. Our customized offer provides this service. The quality of your enclosure will therefore be guaranteed since the painting operation is performed after creating the cut-outs.

3 When the cable entry has been defined, the next step is cable management inside the enclosure. For correct thermal management, all wires must be fitted and attached so as not to create an obstacle for correct air flow. Consult our Universal Enclosures catalogue for cable management accessories (such as cable ducts) and consumables (such as cable ties).

2 Installing a cable entry with full flexibility is the solution when a large series of enclosures is being prepared for different types of installations. By using one combination of enclosure-cable entry, you can cover a large variety of installations!

4 When your environment requires a high level of IP for your installation, make sure you have an appropriate thermal management system to avoid condensation or overheating problems. Consult our Thermal Management offer in our Universal Enclosures catalogue and our Control Panel Technical Guide related to this issue.

New

- Thalassa PHD is suitable for outdoor public areas thanks to its multiple virtues:
- pressure and shock resistant (IEC 61439-5: 2010),
 - anti-posting thanks to its special ribbed-surface door,
 - insulated (ready to be Class II according to IEC 61439-1: 2011).

- Spacial S3HD and SFHD are designed for outdoor private areas. They are engineered to resist aggressive environments (anti-corrosion certification class C4H, ISO 12944:1999).

PB502611-34

Tough

PHD: Heavy Duty polyester reinforced with a double layer of fiberglass. Ultra-resistant, anti-vandalism.

PB502673-29

Heavy Duty accessories

Dedicated accessories to resist outdoor, harsh environments: the all-new, slim fanbox (see page 310 and 312).

PB502648-11

Simplicity

Installation simplified: easy to be lifted with up to 1000 kg-loaded equipment. HD lifting accessories also available.

DB300824-120

Thermal management solutions

3 ventilation architectures studied to help protect the equipment installed inside from overheating and humidity.

PB502662-30

Fully equipped

Standard, pre-installed equipment includes:

- a curved canopy to avoid water stagnation
- a door retainer to keep the door open even with strong wind or when a vehicle passes by
- an aluminium cable gland plate to easily drill holes and avoid corrosion
- a document pocket to stock your documents in a practical place.

PB502670-29

Upper ventilation module

The newly engineered roof ventilation accessory helps to prevent creation of condensation (one of the causes of corrosion).

PB502674-25

Anti-vandalism

PHD and SFHD: the handle with keylock and additional padlock hole (padlock not included) helps to secure the equipment inside. It is standard equipment.

This range can be configured according to your needs

S3D

General overview

■ **Introduction**

Schneider Electric's Spacial range offers enclosures (SF cubicles and S3D boxes) certified for installation in seismic risk zones of various intensities. The zones used to classify the enclosures are those defined by the Uniform Building Code (UBC).

■ **UBC zones**

The UBC has defined 6 zones (0, 1, 2A, 2B, 3, 4, 5) according to ground acceleration. The illustration below, taken from IEC 60721-2-6 (Figure 5), uses the zones defined by the UBC, combining, for greater clarity, zones 2A and 2B in zone 2.

■ **Certification of Spacial enclosures**

The tests used for certification are those specified by the international standard and adapted for the requirements of nuclear industry. The reference documents are as follows:

- M12D0168610 (EDF): Earthquake resistance tests specified for the nuclear industry. This document is the update of document CRT 91-C-112-00 produced following the Fukushima accident
- IEC 60068-3-3 (first edition): international standard.

Certification of Spacial enclosures

■ **Enclosures for weak to medium earthquakes:**

The standard offer of SF cubicles and S3D* boxes is certified to withstand all seismic risks up to UBC zone 3 for the following applications:

- SF cubicle applications:
 - Control and automation;
 - Industrial electronics (19" frame);
 - LV power distribution (Spacial SFP).
- S3D box applications:
 - Control and automation.

■ **Enclosures for medium to strong earthquakes:**

The Spacial SF 5G cubicle is certified to withstand any seismic risk up to UBC zone 4 thanks to its reinforced structure, its special panel mounting system and its locking system. It has been tested for the following applications:

- Control and automation;
- Industrial electronics (19" frame);
- LV power distribution (Spacial SFP 5G).

■ **Enclosures for very strong earthquakes:**

The Spacial SF S3D 6G cubicle is certified to withstand any seismic risk up to UBC zone 4 thanks to its panel thickness, its locking system, its wall mounting brackets and its reinforced chassis mounting. It has been tested for the following application:

- Control and automation.

*Except larger enclosures. Consult us.

S3D

Technical information

Definitions

Ground acceleration:

Ground acceleration resulting from a given earthquake.

Note: In practice, ground acceleration can be broken down into horizontal and vertical components.

Floor acceleration:

Acceleration of a particular floor in a building (at the location of an equipment item) resulting from a given earthquake.

Note: In practice, floor acceleration can be broken down into horizontal and vertical components.

Test results

Spatial SF and S3D offer				Earthquake characteristics			Floor acceleration (m/s ²) (2)							
Standard		5G (5)	6G (5)	IEC 60068-3-3 (Table 3)		Ground acceleration a _g	Required response spectra (RRS)			Test response spectra (TRS)				
S3D	SF, SF 19", SFP	SF 5G, SFP 5G	S3D 6G	Seismic zones	Intensity scales		IEC 60068-3-3	EDF		Specification				
				UBC (3)	Richter	MSK (4)	Horiz.	Vertic.	Horiz.	Vertic.	Specification	Horiz.	Vertic.	
				0	< 5.5	< VIII			N/A					
				1-2			2	6	3					
				3	≥ 5.5 and ≤ 7	VIII to IX	3	9	4.5	6	4.8	HN 20-E-53	9	9
				4	> 7	> IX	5	15	7.5	10	8	CRT 91-C-112-00	15	12
							(1)	(1)	(1)	20	24	M12D0168610	29.6	40

- (1) The IEC 60068-3-3, 1991-02 standard has not yet been updated since the events at FUKUSHIMA.
- (2) Floor acceleration = a_g x K x D (§8.2.7), where:
 K = amplification factor = 3 (Table 4 of IEC 60068-3-3)
 D = direction factor = 1 for the horizontal direction, = 0.5 for the vertical direction (Table 5 of IEC 60068-3-3).
- (3) Approximate Uniform Building Code values for the zone.
- (4) MSK (Medvedev-Sponheuer-Kamik, corresponding to the modified Mercalli intensity scale).
- (5) The 5G and 6G designations refer to the amplified maximum acceleration value read respectively on the horizontal RRS of the EDF standard CRT91C11200 and on vertical RRS of the EDF MRI standard for large equipment.
- (6) Except larger enclosures. Consult us.

Comment: g = acceleration due to gravity rounded off to the nearest whole number (1g = 10 m/s²).

Test Response Spectra (TRS)

Spectra for SF 3G cubicles

Spectra for SF 5G cubicles

Spectra for S3D 6G boxes

— TRS_x — TRS_y — TRS_z
 x = front-rear horizontal axis
 y = left-right horizontal axis
 z = vertical axis

○ Amplified maximum acceleration: acceleration expected at the center of gravity of the equipment
 ○ Maximum floor acceleration: unamplified acceleration

New

SF

> **Spacial SF 5G** cubicles (for control and automation) and **Spacial SFP 5G** cubicles (for LV power distribution) have been designed to withstand earthquakes up to UBC zone 4.

Reinforced crosspieces

- Two reinforced crosspieces ensure the structure's mechanical strength.

Panel mounting

- Mounting systems prevent loosening of the screws.

Security locking system

- Seismic locking system.
- Special bars and handle to prevent any accidental door opening under severe vibration conditions.

Reinforced plinths

- New reinforced monobloc plinths.

S3D

> **Spacial S3D 6G** cubicles are designed to withstand earthquakes up to UBC zone 4.

Strength

- Panel thickness:
- Casing + door: 20/10 mm;
- Entry flange: 15/10 mm.

Security locking system

- EDF 1600 security locking system with captive key.

Reinforced mounting plate

- Mounting plate reinforcement.
- Increased number of attachment points.

Wall mounting

- Reinforced bracket for wall mounting.

New

➤ The **Spacial S3D 6G K3** cubicle meets K3 requirements in accordance with RCCE 2012.

Strength

- Panel thickness:
- Casing + door: 20/10 mm;
- Entry flange: 15/10 mm.

Decontaminatable smooth paint, PID 100 series

- In compliance with CCTR 91.C.031.06 Two coats of paint (minimum thickness: 60 μ).
- Epoxy-polyester powder, PID 100 series.
- PIA-PIC 100 on request.

Security locking system

- EDF 1600 security locking system with captive key.

Reinforced mounting plate

- Mounting plate reinforcement.
- Increased number of attachment points.

Earth continuity

Earth continuity between the interior and exterior of the cubicle is provided by 2 opposite welded studs (external earth screw principle).

Wall mounting

- Reinforced bracket for wall mounting.

New

Seismic and nuclear enclosures

A demanding nuclear market

New

Our range of **Spacial 3D nuclear** cubicles meets the K3 requirements of RCCE 2012. The Schneider Electric cubicle production plant has established processes to ensure K3 certification.

➤ Establishment of a line architecture adapted to the requirements mentioned in RCCE 2012, implying:

- Hold points;
- Check points;
- Control of "AIP" activities that are important for protection

➤ Manufacturing completion report with:

- Declaration of conformity.
- Monitoring document.
- Report and test report.

➤ Establishment of a Particular Quality Assurance Plan (PQAP)

➤ Reference documents for the nuclear industry: RCC-E, CCTR, FNP, packaging technical specification, "PMUC" (products and materials used in nuclear generating stations), SGAQ-2013-03, Arrêté INB 2012

New

Nuclear safety has 3 objectives

Technical choices and safety rules

The technical choices and safety rules are stipulated by the operator with full responsibility relative to the French nuclear safety authority (ASN) (representing the state) depending on the location in the installation and whether or not they form part of the safety circuits. The products undergo tests to ensure their operation in accidental conditions.

A safety circuit consists of several equipment items. Their certification depends on their location. Equipment interfacing between the core and the other buildings is always K1 (risk of radioactive leakage).

Certifications necessary to work in the nuclear industry

2 certifications are necessary to work in the nuclear industry

- Product and equipment certifications imply demanding performances validated by technical documents and by tests. In the event of a change in the product, it must be **explained and justified** that the initial certification is maintained.
- Certifications of industrial organizations and services related to products and equipment.

The products equipping French nuclear facilities in this catalogue comply with the RCC-E 2012 standard.

Terminology of equipment classifications used in nuclear power stations

EIP: Equipment Important for Protection.
 IPDE: Important for operating availability.
 CDS: safety-classified.
 Schneider is concerned only by E1 (elec. classification).

Tests corresponding to specific classifications for EIP equipment

- K3 > ref. tests + functional operating limits + ageing + earthquake
- K3AD > K3 + environmental resistance (irradiation, heat, spraying)
- K2 > K3 + resistance to ageing irradiation (250 Kgy)
- K1 > K2 + resistance to accidental irradiation (600 Kgy) + ADR
- AG > K1 reinforced only for EPR power stations

Electromagnetic protected steel enclosures

Introduction

General

The increasing presence of electromagnetic interference in industrial environments, together with the use of equipment susceptible to such interference requires the use of suitably protected enclosures.

In order to suppress electromagnetic interference, S3HF enclosures, due to the type of sheet metal and special gaskets used, fulfil two functions:

- Provision of adequate screening, with the effectiveness of a Faraday cage.
- Ability to provide effective protection of sensitive equipment by using galvanised sheet metal chassis, and by following recommended installation procedures.

Electromagnetic interference

Electromagnetic disruptions comprises an electrical field E generated by a differing potentials, and a magnetic field M, caused by current circulation, which combine to form electromagnetic field.

The electromagnetic interference or "noise" is a disruptive electrical signal which affects the useful signal and it likely to cause a malfunction.

Interference can be carried through the conductors or emitted through the environment.

Main sources of electrical interference and equipment sensitive to it

- Programmable controllers.
- Electronic circuits or boards.
- Regulators.
- Input signal cables (detectors, sensors, measurement probes).
- Analogue signal cables.

Main sources of electrical interference

Material	Frequency range
Motors	10 kHz... 100 MHz
Transformers/rectifiers	10 kHz... 100 MHz
Inductive load switching	50 kHz... 10 MHz
Spot welders	10 kHz... 50 MHz
Fluorescent lamps	100 kHz... 3 MHz
Relays, contactors	10 kHz... 200 MHz
Switching power sources	10 kHz... 30 MHz
Computers (internal clock)	50 kHz... 200 MHz
Variable speed drives	10 kHz... 100 MHz
Induction furnaces	0... 10 kHz
Power cables, etc.	0... 10 kHz

Attenuation level of EMC fields

The waves of electrical or magnetic fields are reflected when they meet the sheet metal of the enclosure.

The effective rate of the screening or dampening "a" of the incident wave is measured in decibels (dB) using the following formulae:

$$a = 20 \log \frac{E_0}{E_1} \text{ (dB) for electrical fields,}$$

$$a = 20 \log \frac{H_0}{H_1} \text{ (dB) for magnetic fields,}$$

- E_0 and E_1 are the current values of the electrical field, before entering and after entering the enclosure respectively.
- H_0 and H_1 are the magnetic field values.

Electromagnetic protected steel enclosures

Introduction

Installation

According to the type of interference generated by the devices:

- Low frequencies, "conducted interference" (up to 30 MHz),
 - High frequencies, "radiated interference" (higher than 1 MHz),
- the rules to be taken into account relate to the choice of components that provide the most economical solution to complete the installation.

Low-frequency interference

- Importance of the protection systems:
 - filters, overvoltage suppressor, isolating transformer for the power supply,
 - cable length.

High-frequency interference

- Importance of the installation method:
 - earth connections, cable length and section,
 - cable selection and rules, cable runs, connections,
 - enclosures and installation.

Specifics

Screen connections

It is recommended to earth screens at both ends. In addition, it is advisable to increase the number of intermediate earth connections.

If the screen is only earthed at one end, there can be a considerable difference in potential between the two ends. In addition, this screen will be ineffective against external high-frequency interference.

Transformers

The transformer chassis must be mounted, metal to metal, on the reference potential plate, that is, on a plain chassis supporting the equipment.

Cable runs

The metal ducts and conduits, when correctly connected, provide an extremely effective second screen for the cables. Cable ends must be screwed to the metal enclosures in order to provide an effective connection.

Enclosures

The interfering and sensitive components, cables etc. should be installed in separate enclosures or located at some distance from each other.

Note: For further information, consult your local sales office or our educational leaflet entitled "Electromagnetic compatibility".

Electromagnetic protected steel enclosures

Introduction

PE50205-46

EMC box, IP55.

Spacial S3HF wall-mounting enclosure IP55 IK10

From H 400 x W 300 x D 200 to H 1200 x W 800 x D 300 mm

- Metal monobloc enclosures constructed from special ALU-ZINC 150 sheet. Body constructed from single folded and welded sheet.
- The enclosure surface, comprising 55 % aluminium ensures good reflection of radiated electromagnetic interference.
- Textured epoxy polyester external paint finish, colour grey RAL 7035.
- Integral, galvanised, sheet steel, plain chassis (reference potential plate). The low resistivity of this plate facilitates earth continuity. Special body/door gasket (IP + EMC) providing both environment protection and continuity between the door and body of the enclosure. Body completely sealed, without any cable entries or apertures. Integral earth braid between enclosure body and door, ensuring good earthing and, in consequence, good electromagnetic compatibility. Metal closing points with earth continuity, thus improving overall screening.

PE501663-46

EMC enclosure, IP55.

Spacial SMHF floor-standing enclosure IP55 IK10

From H 1800 x W 800 x D 400 to H 2000 x W 800 x D 600 mm

- Metal monobloc enclosure constructed from special ALU-ZINC 150 sheet. The enclosure surface, comprising 55 % aluminium ensures good reflection of radiated electromagnetic interference.
- Exterior painted with an epoxy polyester external powder paint finish, colour grey RAL 7035.
- Integral galvanised sheet steel plain chassis (sheet potential reference). The earth continuity is much easier thanks to its weak resistance.
- Special body-door seal (IP + EMC), providing not only water tightness, but also electrical continuity between the door and the body, necessary for those assemblies. Cable gland plate with special built-in seal (IP + EMC).

PE501662-46

EMC floor-standing enclosure, IP55.

Spacial SFHF suitable enclosure IP55 IK10

From H 1800 x W 600 x D 600 to H 2200 x W 800 x D 800 mm

- Metal, extendable enclosure constructed thanks to a closed triangular profile, door and panel from special ALU-ZINC 150 sheet. The enclosure surface, comprising 55 % aluminium ensures good reflection of radiated electromagnetic interference.
- Exterior painted with an epoxy polyester external powder paint finish, colour grey RAL 7035.
- Integral galvanised sheet steel plain chassis (sheet potential reference). The earth continuity is much easier thanks to its weak resistance.
- Special body/door gasket (IP + EMC) providing both environmental protection and electrical continuity between the door and body of the enclosure.
- Integral earth braid between enclosure body and door, ensuring good earthing and, in consequence, good electromagnetic compatibility.
- The suite joining set is also available for the EMC enclosures, IP55.

Electromagnetic protected steel enclosures

Introduction

The presence of 55 % aluminium on the surface of the sheet metal ensures good reflection of electromagnetic waves.

The next illustrations indicates the attenuation (dB) curves related to the frequency (MHz).

Attenuation of the Spacial S3HF enclosure

General information on Electromagnetic Compatibility, see pages 338 and 339.

Floor-standing compact enclosure

The enclosure is tested with earth braids mounted on all claddings (test performed following IEC 61587-3).

Floor-standing suitable enclosure

Enclosure is tested with its sides panels and earth braids mounted on all claddings (Test performed following IEC 61587-3).

Electromagnetic protected steel enclosures

Characteristics

Characteristics			Spacial S3HF		
			Single-piece metal enclosures made from special sheets of ALUZINC 150. The presence of 55 % aluminium on the surface of the sheet metal ensures good reflection of electromagnetic waves.		
			■ Body <input type="checkbox"/> single-piece body, folded and welded, <input type="checkbox"/> entirely sealed body with no cable entry and no opening.		
			■ Equipped with four shouldered backstuds allowing direct mounting of the mounting plate <input type="checkbox"/> built-in plain mounting plate made from galvanised sheet steel (potential reference sheet), <input type="checkbox"/> its low resistivity promotes earth continuity, <input type="checkbox"/> direct mounting or using wall-mounting brackets, ref. NSYPFCR (to be ordered separately).		
			■ Door <input type="checkbox"/> the special body-door gasket (IP + EMC) provides, in addition to water and dust tightness, electric continuity between the door and the body of the enclosure, <input type="checkbox"/> the metal lock with earth continuity helps improve the general shielding, <input type="checkbox"/> an earthing braid added to the enclosure between the body and the door guarantees a good earth connection and, consequently, good electromagnetic compatibility, <input type="checkbox"/> 3 mm double-bar lock as standard delivery (if a 405 key is needed it is possible to mount ref. NSYCLL405CRN).		
			■ Enclosure delivered with solid mounting plate. Other sizes: consult us.

Enclosures for explosive atmospheres

Introduction

Potentially explosive atmospheres: important information

> What is ATEX?

- It is a term commonly used to describe potentially EXplosive ATmospheres and standards for protection systems and equipment.
- Two European directives, ATEX 99/92/CE and ATEX 94/9/CE, and international standards IEC 60079 and IEC 61241, harmonized with EN European standards, apply to this field.

> How is a potentially explosive atmosphere defined according to ATEX?

- An potentially explosive atmosphere is defined as a mix of flammable substances in the form of gas, vapour, dust (cloud or deposit) which, in air and under normal atmospheric conditions, can completely or partially catch fire in the form of an explosion when exposed to a source of ignition.

> Classification of an explosive atmosphere

- They are classified into groups and zones according to directive 99/92/CE and IEC standards as follows:

Destination	Categories/presence of potentially explosive atmosphere	Hazardous zones	Atmosphere
Group I Mines	M1 and M2	Gas and dust (G & D)	
Group II surface Industries	1 Permanent or frequent	Zone 0: gas and vapour	G
		Zone 20: mist and dust	D
	2 Occasional	Zone 1: gas and vapour	G
		Zone 21: mist and dust	D
	3 Rare	Zone 2: gas and vapour	G
		Zone 22: mist and dust	D

Equipment for potentially explosive atmospheres

- Since 1st July 2003, European directive ATEX 94/9/CE has made it compulsory to use certified electric or non-electric equipment when it must be installed in zones with explosive atmospheres (gas or dust).
- Certification must be provided by a body which is notified according to the same directive.
- The body notifies its assessment of the quality of the production and certifies that the product complies with the health and safety demands defined in the directive and the international standards.
- The certificate shows the category of the product by marking, and thus the zone and atmosphere in which it can be used.
- The standards define the following types of protection for electric equipment:

Electrical equipment				
CENELEC	IEC	Gas: symbol of the types wof protection	CENELEC/IEC	Powder: symbol of the types of protection
EN 60079-0	IEC 60079-0	General rules	IEC/EN 61241-0	General rules
EN 50015	IEC 60079-6	0-oil immersion	IEC/EN 61241-1	tD-protection by enclosures
EN 50016	IEC 60079-2	p-pressurised enclosures	IEC/EN 61241-4	pD-protection by pressurisation
EN 50017	IEC 60079-5	q-powder filling	IEC/EN 61241-11	iD-protection by intrinsic safety
EN 60079-1	IEC 60079-1	d-flameproof enclosures	IEC/EN 61241-18	mD-protection by encapsulation
EN 60079-7	IEC 60079-7	e-increased safety		
EN 50020	IEC 60079-11	i-intrinsic safety		
EN 60079-15	IEC 60079-15	n-type of protection "n"		

- Enclosures are certified as components. They will be assembled with other ATEX electrical, pneumatic and hydraulic components, among others to form a final solution which, in turn, must be ATEX-certified and subject to a declaration of conformity.

Definition

Product directive 94/9/CE: defines the manufacturers' obligations.

Personal protection directive 99/92/CE: defines the users' obligations.

Degree of protection:

In hazardous areas, equipment is required to offer a minimum degree of protection of IP54, but it can be tested or certified with a higher degree of protection.

Enclosures for explosive atmospheres

Introduction

Fields of application of Schneider Electric ATEX enclosures

> 3 Material solutions for wall-mounting enclosures

Steel

Stainless-steel

Polyester

Three types of enclosures

- All the wall-mounting enclosures presented in this brochure comply with standards for protection against the increased risk of explosion in atmospheres charged with gas (G) and/or dust (D).
- The Schneider Electric offer, designed to be used in group II, is classified as category 2.

Destination	Categories/presence of potentially explosive atmosphere	Hazardous zones	Atmosphere
Group I Mines	M1 and M2	Gas and dust (G & D)	
Group II surface Industries	1 Permanent or frequent	Zone 0: gas and vapour	G
	2 Occasional	Zone 20: mist and dust	D
		Zone 1: gas and vapour	G
	3 Rare	Zone 21: mist and dust	D
Zone 2: gas and vapour		G	
		Zone 22: mist and dust	D

Zone of application of Schneider Electric ATEX wall-mounting enclosures.

- Category 2 products can be used as category 3.
- Our products are qualified for increased safety "e" (Ex e) but not for explosionproof safety "d" (Ex d).
- The marking of the wall-mounting enclosures is shown page 488.
- The wall-mounting enclosures offer a degree of protection IP66 according to EN 60529, exceeding the recommendations of the ATEX directive.
- Certification of our production sites and inspection procedures guarantees observance and consistency of the quality level.

Enclosures for explosive atmospheres

Introduction

PE601817-54

> Industrial environments, equipment rooms

Spacial S3DEX steel enclosure

- The **Spacial S3DEX steel enclosure** is certified by the LCIE with no. LCIE 02ATEX0037U (component certification).
- Ten sizes: from 300 x 200 x 150 mm to 1000 x 800 x 300 mm.
- Degree of protection: IP66.
- Ambient temperature limits: $-20^{\circ}\text{C} \leq T_a \leq +40^{\circ}\text{C}$.
- Resistance to external mechanical impacts: IK10.
- Structured finish, epoxy-polyester powder paint, RAL 7035 grey colour.

PE601818-56

> Laboratories, agri-business industry, specific hygiene and corrosion demands

Spacial S3XEX stainless-steel enclosure

- The **Spacial S3XEX stainless-steel enclosure** is certified by the LOM with no. LOM 09ATEX3068U (component certification).
- Seven sizes: from 300 x 200 x 150 mm to 1000 x 800 x 300 mm.
- Degree of protection: IP66.
- Ambient temperature limits: $-20^{\circ}\text{C} \leq T_a \leq +60^{\circ}\text{C}$.
- Resistance to external mechanical impacts: IK10.
- Scotch-Brite® brushed finish.

PE601819-58

> Seaside, petrochemical, severely corrosive environments

Thalassa PLMEX polyester enclosure

- The **Thalassa PLMEX polyester enclosure** is certified by the LOM with no. LOM 10ATEX3051U (component certification).
- Seven sizes: from 307 x 255 x 164 mm to 1056 x 852 x 350 mm.
- Degree of protection: IP66.
- Ambient temperature limits: $-20^{\circ}\text{C} \leq T_a \leq +60^{\circ}\text{C}$.
- Resistance to external mechanical impacts: IK10.
- Black colour.

[!] In accordance with the ATEX directive

- The enclosures bear the marking shown page 488.
- The enclosures offer a degree of protection of IP66 according to EN 60629, reaching the highest dust protection according to ATEX standards.
- The certification of our production sites and inspection procedures guarantees the observance and regularity of the quality level.

Protective of all applications in ATEX II2 or II3 areas –surface installations with occasional or rare risks– thanks to ATEX-certified steel, stainless-steel and polyester enclosures.

Enclosures for explosive atmospheres

Introduction

PB500411-32

Personnel safety
Blind nut for external earth connection.

PB500407-32

Earthing studs welded to the door and inside the body.

PB502596-32

Robust
The chassis is mounted on four 10-mm shouldered backstuds.

PB500413-32

The 4 mounting holes are blocked by 4 crimped blind nuts.

DB300871

Label
Example of specific ATEX marking (description: page 488).

DB300073-Z7

Delivered in reusable cardboard with assembly instructions enclosed.

Control Desks

PC racks

PB502000-32

Spacial S3CM Control enclosure with suspension system

The Spacial S3CM offer for human-machine interface combines **robustness** with **aesthetics** and **ergonomics**. Consist of:

- **control enclosure,**
- **a keyboard-box,**
- **a suspension system** of arms and joints, for a fixed or rotating solutions,
- **and support accessories.**

> See page 358

PB500086-61

Spacial SD Control desks

The range of Spacial SD control desks provides all the functions required of a workstation intended for industrial and infrastructure applications.

Spacial SD offers two clearly differentiated solutions:

- **the SD Compact control desk,**
- **the SD Control desk with console.**

The range has protection ratings of IP55 and IK10, which guarantee the safety and the protection of the installed devices.

> See page 368

PB502208-16

Spacial SF suitable PC rack

The Spacial SF PC rack is designed to protect and control computer equipment in an industrial environments.

Access to the various functions and working heights, guaranteeing optimum comfort. The roof and panels, fixed from the inside, prevent access by unauthorised personnel.

> See page 384

PB501287-30

Spacial SDX Control desks

The Spacial SDX range of control desks offers all the functions required to set up a control station that meets the industrial or infrastructural needs of applications in harsh environments or in the food and beverage sector.

Easy to implement, compatible with dialogue components, guaranteeing the security and protection of control devices, these control desks, with their range of dimensions, meet the strictest needs of their users.

> See page 369

PB501223-55

Spacial SMX monobloc PC rack

The stainless-steel monobloc PC racks have been especially designed to protect computer equipment installed in corrosive or specially environments that require washing or exposure to sprays of liquid.

Access to the various functions and working heights, guaranteeing optimum comfort.

> See page 388

➤ The **Spacial S3CM offer** for human-machine dialogue consists of:

- control enclosures
- a box-keyboard
- a system of arms and joints fixed or rotating
- accessories.

The global dialogue system combines robustness with aesthetics and ergonomics.

Human-Machine Interface Solutions

PB500433-33

Robust

- 2 tube sizes in extruded steel, 50 and 80 mm square, thickness 40/10^e mm.
- Top wall reinforced by a plate with a thickness of 30/10^e mm.

PB500418-29

Aesthetics

- Extruded aluminium rail frame.
- RAL 7040 paint: frame.
- RAL 7035 paint: enclosure.
- Customisation to your image or the aesthetics of your machine: consult us.

PB500446-37

Ergonomics

Frame designed for handling the enclosure and facilitating the usage by the operator.

PB500439-21

Easy

Easy access to the equipment by a rear door, opening to 120°.

- Direct installation of accessories on the enclosure frame rail:
 - vertical document support,
 - keyboard support,
 - laptop computer support.
- A box-keyboard is installed directly on the enclosure.

PB500300

Flexibility

Rotation through 170°; complete range of joints, fixed or rotating.

This range can be configured according to your needs

4 different services available:

Human-Machine Interface Introduction

Every model is suitable for tubes with a square section of:

- 50 mm for medium loads,
- 80 mm for heavy loads

(see selection table on page 366).

Steps to choose the suspension system (medium or heavy loads)

- 1 - Define the total load of the system*: a + b + enclosure + installed equipment (Y axis).
- 2 - Define the length of arm L (X axe).
- 3 - Define the configuration:

■ Suspension system **without** intermediate joint.

■ Suspension system **with** intermediate joint.

* The load (a + b + enclosure + installed equipment) must be less than the maximum load.

★ Example

- 1 - Total load (kg) = 80 kg.
- 2 - Length (L) = 1200 mm.
- 3 - Suspension system without intermediate joint.

Recommended system
> Medium loads □ 50.

Perforated rails installed on lateral studs.

Rear door with double-bar lock.

Detail of the reinforcement plate.

Mounting of the trim frame by screws.

Characteristics		Spacial S3CM			
		The control enclosures consist of: <ul style="list-style-type: none"> ■ A steel body equipped with: <ul style="list-style-type: none"> □ reinforcement plate: the top wall is reinforced by a plate (3 mm) and pierced with a hole Ø 54 or 87 mm (according to the reference) to allow hanging installation of the enclosure, □ 4 welded studs on the 2 inner vertical walls, for mounting rails, □ 2 rails (with drill holes) for installing equipment, □ a rear door, opening to 120° and closing with double-bar lock. ■ An aluminium front face (2.5 mm thick): <ul style="list-style-type: none"> □ this surface is protected on both sides by a plastic film, allowing the installation of the dialogue elements, □ a trim frame made from 4 extruded-aluminium rails: the frame and the front face are delivered assembled. Structured finish, epoxy-polyester powder, RAL 7040 grey colour (other colours on demand). <ul style="list-style-type: none"> ■ The design of these rails takes into account the accessory mounting functions (lamp, document support, keyboard support, laptop support, etc.), the ergonomics for handling the enclosure and its overall aesthetics.

Box-keyboard for control enclosure

Detail from the installation of the box-keyboard on the control enclosure.

Characteristics		Box-keyboard for control enclosure	
<p>The box is installed on the control enclosures with a width of 600 mm. It then has an angle of 120° with its front face. All the accessories required for installation are delivered with 2 brackets and 1 trim rail, 1 hose for cable entry. The box for the keyboard consists of:</p> <ul style="list-style-type: none"> ■ a steel body, structured finish, epoxy-polyester powder, RAL 7035 grey colour, with a screwed cover, ■ an aluminium front face (2.5 mm thick) for installing a keyboard, ■ a trim frame made from 2 extruded-aluminium rails guaranteeing ergonomic handling of the box and the aesthetics of the unit. The frame and the front face are delivered assembled. Structured finish, epoxy-polyester powder, RAL 7040 grey colour.

Suspension system

Characteristics	Fixed bracket	Rotating mounting on enclosure	Rotating mounting in bracket on enclosure	Tilting mounting on enclosure
	Our system of tubes and joints, fixed or rotating, enables all the solutions to respond to the installation needs of the control enclosures for human-machine dialogue. Device allowing the combination and mounting of a horizontal tube with a vertical tube.	Device allowing the mounting and rotation through 310° of tubes, with a square section of 50 or 80 mm, in vertical position. System for blocking in the chosen position. Mounting through the support surface by 4 screws.	Devices allowing the mounting and rotation through 310° of tubes, with a square section of 50 or 80 mm, in horizontal position. System for blocking in the chosen position. Mounting through the support surface by 4 screws.	This mounting allows the enclosures to be tilted up to 30°. System for blocking in the chosen position. It is installed on enclosures with depths of 200 and 250 mm. The installation on enclosures with a depth of 300 mm requires an adapter plate.

SD

> The range of **Spacial SD** control desks provides all the functions required of a workstation intended for industrial and infrastructure applications.

Steel control desks

Accessibility

There are two versions of the Compact control desk:

- Front accessibility: designed for straightforward solutions.
- Front and rear accessibility through a removable panel: enables the installation of two adjoining plates and to work at the rear.

The control desk with console offers full accessibility, since it is fully accessible from the rear thanks to the 3-point closure door it includes.

For Spacial SD, the accessibility which allows quick and easy work is one of its main priorities.

For this reason, its design excludes the central upright.

Easy

The console opens easily and safely thanks to the installed pneumatic opening lid stays.

Cable entry is optimised because all the models of the range include a cable-gland plate with two adjustable parts.

Convenience

The possibility of connecting the modular control desk to the modular consoles affords multiple combinations.

The opening direction of the door can be changed quickly thanks to the included hinges.

Compatibility

Furthermore, the Spacial SD control desk is compatible with most of the accessories of the Spacial SF and SM ranges.

This range can be configured according to your needs

4 different services available:

Assemble to order

Mounting of standard accessories

Painting

Machining

See page 396 for details or consult our web site www.schneider-electric.com

SDX

➤ The association of a monobloc control desk with one or more consoles enables all combinations. Complete accessibility to the inside of the control desk thanks to its design without intermediate crossbars.

Stainless-steel control desks

Hygiene

The high quality of the standard finish enables very easy maintenance while avoiding contamination. The hygienic feet made from 316L stainless-steel, adjustable between 140 mm and 200 mm height, make it easier to clean under the enclosures.

Resistance to corrosion

High resistance to corrosion. 304L and 316L stainless-steels provide the best solutions for applications in extremely demanding environments.

Compatibility with the other ranges

- Stainless-steel accessories:
 - plinths, locks.
- Accessories of the steel control desks offer:
 - mounting plate, pneumatic opening stay, etc.

Convenient

The desk lid and the console are equipped with pneumatic opening stays (opening to 75°) allowing complete access to the inside and preventing sudden falls of the console or the hinged cover. Equipped with adjustment rails for adjusting the depth of the mounting plate. Removable rear panel.

➤ The **Spacial SF PC rack** is designed to protect and control computer equipment in an industrial environments.

PB500901-54

Steel PC racks

PB500684-28

Convenience

- Anti-glare glazed door designed for viewing until 25,5" screens.
- Cable entry made easier by a cable-land plate in 2 pieces.

PB500685-28

Ergonomics

- Access to the various functions and working heights, guaranteeing optimum comfort.
- Partial doors delimit the access to each function with a 3 mm double-bar lock.
- Built-in screen and CPU support.
- Built-in keyboard and mouse support.

PB500490-35

Robust

- Spacial SF structure formed from a single 1.5 mm galvanised-steel section, with a high moment of inertia.
- Vertical uprights joined with top and bottom frames, screwed together with connections of sintered steel.
- Panels built into the structure.

PB500495-21

Simple

The Spacial SF design allows enclosures to be coupled in any direction, adapting to all installation surfaces.

PB500667-35

Locking system

Locking system with flat escutcheon, made from polyamide 6 with 30 % fibreglass, RAL 9005 black, with 5 mm double-bar insert for the plain rear door, and small flat escutcheon with 3 mm double-bar insert for the partial front doors.

> The **stainless-steel monobloc PC racks** have been especially designed to protect computer equipment installed in corrosive or specially environments that require washing or exposure to sprays of liquid.

Stainless-steel monobloc PC racks

Convenience

- Anti-glare glazed door designed for viewing 14" and 17" screens by removing part of the silkscreen printing.
- Cable entry made easier by a cable-gland plate (at the rear) in 2 pieces.

Sealing

- IP55, even with the keyboard drawer open, thanks to the pivoting Plexiglas shutter.

Optional accessories

- Shelf mounted on telescopic rails.

Ergonomic

- Partial doors delimit the access to each function with a 3-mm double-bar lock.
- Access to the various functions and working heights, guaranteeing optimum comfort.
- Built-in screen and CPU support.
- Built-in mouse support.

Hygiene

- The high quality of the standard finish enables very easy maintenance while avoiding contamination.
 - The hygienic feet made from 316L stainless-steel, adjustable between 140 mm and 200 mm height, make it easier to clean under the enclosures, ref. **NSYPHX200**.
- More information on page 167 and 296.

Resistance to corrosion

- High resistance to corrosion. 304L and 316L stainless-steels provide the best solutions for applications in extremely demanding environments.

This range can be configured according to your needs

Variable speed drive flush-mounting kits

Introduction

New

➤ The variable speed drive flush-mounting kits have been designed to isolate the power part, which is an important source of heat. They are mounted in the Spacial range of steel enclosures (floor-standing and wall-mounting enclosures) and have been approved for Altivar Process variable speed drives in the ATV630 and ATV930 ranges (power range: 0.75 to 45 kW at 200/240 V, 0.75 to 90 kW at 380/480 V).

➤ The kits are available in five sizes and offer two methods of mounting variable speed drives:

- slide-rail mounting for sizes 1, 2 and 3
- bracket mounting for sizes 4 and 5.

➤ The kits can be installed:

- at the back of the enclosure. This installation provides full thermal insulation

Tightness
IP55 to IEC 60529 with polyurethane seal provided.

Ease of installation
Set of slide-rails allowing the variable speed drive to be mounted quickly and efficiently.

Strength
The rigidity of the kit allows it to be installed on Spacial S3D, SF and SM enclosures.

Maintenance of the variable speed drive fan (kit sizes 4 and 5)
Easy front-panel maintenance for fan servicing.

Configured offer

Services
Possibility of cutouts (enclosure and frame) by Schneider Electric: no risk of corrosion and cuts (cutout made before painting).

- inside the enclosure on a mounting plate. This installation may require the addition of a thermal control.

➤ The door of the "incoming" enclosure is interlocked by the control of the main switch or circuit breaker. A built-in interlocking system with runner rods prevents the opening of the "outgoing" enclosure doors. Access is only allowed when the main switch or circuit breaker is in "O" position and the main door is open. Manual activation of the rods unlocks the other doors and allows access.

➤ Designed to be associated with certain circuit breakers or switches:

- Square D (9422 A1).
- Schneider Electric.

➤ The system is limited for configurations up to 4 columns.

Secure

The built-in secure interlocking system for the door (on demand) of the "incoming"/"outgoing" enclosures allows Spacial SF enclosures to be adapted to the requirements of the American car industry.

The fixed panel in this example must be ordered through our customised service.

The customised solutions

Configured offer

Introduction

Configured

The **configured offer** is a standard offer enriched by **4 services**

Assemble to order

- Change the cladding composition (panels, doors...)
- Merge and assemble several enclosures (only for Spacial SF and Thalassa PLA)
- + Enclosure composition stick 100 % to customer needs
- + No need to have qualified personnel to merge enclosures

Painting

- Change the colour of the complete enclosure (choice of 36 colours)
- Modify the coating of the raw material (ex.: zinc, etc.)
- + Industrial painting ensures the best protection
- + Totally customized

Machining

- Make square and circle cut-outs **before** painting the enclosure (body, cable gland plate, sides) and mounting plates
- + Ensures safety and the best protection against rust
- + The enclosure is ready to be equipped

Mounting of standard accessories

- Pre-installation of accessories inside or out-side of the enclosure (ex.: mounting plate, plinth, canopy, etc.)
- + Enclosure ready to be equipped

*Minimum order: 1 to 5, depends on type of enclosure.
Manufacturing time: 3 to 10 days, depends on offer type.
Delivery time: varies with destination, please consult us for more information.*

Spacial.conf configuration tool

Spacial.conf is the configuration tool to be used to place your order. It gives you several benefits:

> Consistency & error free

- One configurator for 14 countries & all configurable offers
- Compatibility between enclosure & accessories

> Time saving & flexibility

- Users can indicate machining requests directly on our DXF drawing
- Decreasing price (depends on quantity)
- Manufacturing time adapted to each offer

> Autonomy & facility

- Availability of both on-line & off-line versions
- Illustrated products help you in your choice
- FAQ information for faster understanding

> Information back-up

- All data are provided to registered users (quotation, technical datasheet, etc.)
- Reusable smart code

Your order in 5 steps with Spacial.conf:

1 - Select country & language

- 14 countries
- 4 languages

2 - Select enclosure

- Select product range
- Select material
- Select enclosure type

3 - Select accessories

- Composition accessories
- Mounting accessories
- Thermal accessories

4 - Select services

- Mounting
- Machining
- Painting
- Assembly

5 - Validation & send offer

- Order summary
- Send order to get quotation confirmation from local sales representative

The customised solutions

Specific offer

Introduction

Specific

20

experts

specialized on
different materials
and different
products

The **specific offer** allows you to have a tailor-made product

- > Special dimensions, special needs for thermal system, special components adaptation, etc. All possibilities are open.
- > You can choose to modify any of our standard products (boxes or enclosures, wall-mounting or floor-standing) or start from a newly designed solution.
- > Co-engineer your solution with our design and engineering team (20 experts entirely dedicated to your specific needs).

★ Examples of Specific solution

- Special dimension
- Cut-outs on the body and the doors

- Cable-entry & door adaptation
- Special door shape

What to take into account

This page will help you define your needs for enclosure and streamline your design process. You will then need to contact your sales representative.

Step 1

Environment in which you'll install the enclosure(s)

- > Airborne debris; temperature variations; UV rays?
 - > Indoor or outdoor use?
 - > In wash down environment?
 - > In high traffic environment?
-

Step 2

Application(s) needs of your enclosure(s)

- > Access control; building automation; motor & motion control?
 - > Need to protect against electromagnetic disturbances?
 - > Use in potentially explosive atmospheres?
-

Step 3

Enclosure(s) description

- > Type of enclosure's installation?
 - > Total weight of equipments in the enclosure?
 - > Design: color / coating / finish / dimension?
 - > Body components' adaptations: cable entry / mounting plate?
 - > Thermal management adaptations?
 - > Other accessories adaptations?
 - > Additional information: labeling / packaging / logistic?
-

Step 4

Business profile

- > Total quantity of enclosures needed and quantity per batch?
 - > Frequency of your order: single order / repeat order?
 - > Delivery time and method demand?
 - > Stock needs?
 - > Other comments?
-

What is thermal control?

Technological evolution

The miniaturisation of components, the generalisation of electronics and the appearance of new electronically powered products have made temperature management into a growing need which must necessarily be considered when designing electrical and/or industrial control panels.

What are the advantages of efficient thermal management?

Thermal management of industrial control panels is a major factor for industrial maintenance.

Many risks are incurred by not having a suitable thermal solution, which can affect the service life of the components and the performance of the facilities to the extent of causing a halt in production.

The service life of the components also depends on the temperature and humidity conditions inside the enclosure. The ideal values range from +25 to +35°C for the temperature and 40 to 60 % for the relative humidity (RH).

Cooling, heating, controlling

For the same reasons as the IP/IK protection ratings, equipment installed in enclosures requires suitable thermal protection.

Various solutions to these problems have been put forward. They will be chosen according to environmental conditions, the type of components in the industrial control panel, etc.

In certain cases, it is sufficient to oversize the enclosure, use fans or air-air exchangers, etc. In other cases, where the ambient temperature is higher, it becomes necessary to install air-water exchangers or cooling units.

A solution for each need

We provide a complete Thermal offer to secure your installations.

Cooling

- 
➤ Forced ventilation systems
- 
➤ Air-air exchangers
- 
➤ Air-water exchangers
- 
➤ Cooling units

Heating

➤ Resistance heaters

Controlling

➤ Thermal control accessories

Thermal software

Risks associated with the lack of thermal control

Random breakdowns and production halts result in heavy losses

Thermal control of enclosures extends the service life of the components and reduces their breakdown rate.

Reduction of the service life of the components

The service life of the components is considerably reduced if the temperature and humidity in enclosures are not controlled. Repeated sudden variations speed up the aging process.

Example

Batteries – Accumulators

Manufacturers recommend installing batteries in environments where the controlled temperature is 15°C... 25°C. Cold slows down the battery charging and discharging cycles. Heat increases the evaporation of water in the electrolyte and speeds up the oxidation of the plates. Using batteries at temperatures above the recommended value therefore reduces their service life.

PB60/016-59

Sudden production halt

The appearance of hot spots increases the breakdown rate and endangers the production process.

Example

Electronic equipment

Most electronic industrial control systems are equipped with axial fans for their own thermal control. A failure of the fan can lead to a production halt.

Reduced service life of the fan is one consequence of the enclosure heating up. 24 V DC axial fan.

- Temperature range: -20... +70°C.
- Service life at 20°C (L10 at 20°C): 50000 h.
- Service life at 60°C (L10 at 20°C): 20000 h.

The service life of the equipment can drop from 50000 h to only 20000 h.

PB60/017-88

PB60/018-51

The internal temperature increases with a high degree of IP

In aggressive atmospheres: dust, humidity, chemical agents, high temperatures, etc., the equipment is installed in industrial enclosures (IP54) in order to protect it from the external environment. Nevertheless, it causes a reheating phenomenon which, if left unchecked, will be responsible in the short term for a halt in the operation of the components.

Example

Variable speed drives

A variable speed drive controlling a 45 kW (60 HP) motor is programmed to work at temperatures ranging up to 50°C or 60°C.

The power dissipated by this variable speed drive inside the enclosure can reach 1360 W. This contribution of heat inside the enclosure will cause the top temperature to rise to 60°C and probably cause a halt in production.

PB60/019-58

Our solution

Our new thermal offer includes a large range of solutions, suitable for all situations, from installing a ventilation system to exchangers or even a cooling unit. Do not hesitate to contact us to find out the best thermal solution for your installation.

Thermal management system Overview

System	Airing	Ventilating	Air-air exchanger
	Natural convection causes the temperature to drop inside the enclosure. Simple solutions for this case include installing grilles (without filter) or lifting the top.	Fans with filters are designed to evacuate a large amount of heat economically.	Air-air exchangers are equipped with an aluminium exchange cassette which separates the internal and external air circuits and prevents the entry of dust.
When should it be used?	This solution can only be used when the power to be dissipated is low, in an environment with small amounts of dust.	When larger amounts of heat need to be evacuated in a polluted environment.	The air-air exchangers are used in highly polluted environments or when it is necessary to evacuate large amounts of heat while guaranteeing the independence of the internal and external air circuits. It is important to have a difference of temperature of at least 10°C.
Ta: Ambient temperature Td: Desired temperature	<p>Ta < Td</p>	<p>Ta < Td</p>	<p>Ta < Td</p>
The internal and external air circuits must be independent	<p>No</p>	<p>No</p>	<p>Yes</p>
Advantages	<ul style="list-style-type: none"> ■ Economic solution. ■ No maintenance. ■ Quick and easy installation. 	<ul style="list-style-type: none"> ■ Economic solution. ■ Easy maintenance. ■ Quick and easy installation. ■ Even temperature inside the enclosure. ■ High protection rating: IP54 or IP55. 	<ul style="list-style-type: none"> ■ The internal and external air circuits are independent. ■ Easy maintenance. ■ High protection rating: IP55.
Disadvantages	<ul style="list-style-type: none"> ■ Small amount of heat evacuated. ■ Reduction of the IP protection rating. ■ Risk of entry of dust particles. 	<ul style="list-style-type: none"> ■ The temperature inside the enclosure is always higher than the external temperature. ■ The internal and external air circuits are in contact. ■ Maintenance required: filter replacement. 	<ul style="list-style-type: none"> ■ The temperature inside the enclosure is always higher than the external temperature.
Solutions	<p>Ventilation devices</p>	<p>Fans and outlet grilles</p>	<p>Air-air exchangers</p>

	Air-water exchanger	Cooling	Heating
	<p>Air-water exchangers reduce the temperature inside the enclosure by means of a water-cooled exchange cassette. Temperature control inside the enclosure is performed by a thermostat which opens and closes an electro-valve.</p>	<p>Air-conditioning device providing efficient cooling of the enclosure, regardless of the outside air, and prevention against hot spots.</p>	<p>The resistance heaters prevent the formation of condensation and guarantee the ideal temperature for the correct operation of the electronic components.</p>
	<p>The air-water exchangers are used to evacuate large amounts of heat. They require a cold-water circuit with stable temperature and flow rate. They are specially recommended in difficult, highly polluted environments where there is no external air circuit.</p>	<p>The cooling units can be used in the harshest environments, where the temperature can reach up to 55°C. These devices control the temperature inside the enclosure and include an alarm function for signalling operational anomalies.</p>	<p>The resistance heaters are used to reheat the industrial control panel when the ambient temperature is too low or to prevent the formation of condensation.</p>
	 <p>Ta > Td</p>	 <p>Ta > Td</p>	 <p>Ta < Td</p>
	 <p>Yes</p>	 <p>Yes</p>	
	<ul style="list-style-type: none"> ■ The temperature inside the enclosure does not depend on the external temperature. ■ The internal and external air circuits are independent. ■ Security device against possible leaks. ■ High protection rating: IP55 or IP54 according to model. 	<ul style="list-style-type: none"> ■ Even temperature inside the enclosure. ■ High protection rating: IP55 or IP54 according to model. ■ Use of an environmentally friendly gas. 	<ul style="list-style-type: none"> ■ Small dimensions. ■ Available in 3 versions: <ul style="list-style-type: none"> <input type="checkbox"/> insulated with low surface temperature, <input type="checkbox"/> in aluminium when the surface temperature is limited to 75°C, <input type="checkbox"/> ultra thin heaters. ■ The fan-equipped resistances guarantee an even temperature inside the enclosure.
	<ul style="list-style-type: none"> ■ A cold-water supply source is required. ■ Specific pumping installation. 	<ul style="list-style-type: none"> ■ Installation of a drain is recommended. ■ Maintenance required: filter replacement. 	
	 <p>Air-water exchangers</p>	 <p>Cooling units</p>	 <p>Resistance heaters</p>

> Large range of fans:

Ventilation Systems

FB501038-22

FB501040-42

Easy installation

Quick installation

- Safe, reliable mounting with the assisted mounting device and system of multi-thickness mounting-clips.
- Mounting also possible using screws.
- Easy to invert.
- To operate as extractors, all the motors can be inverted by simply removing four screws.

FB501041-27

Easy maintenance

Quick filter replacement

Quick, easy and safe replacement of the filter installed in the fan, even during operation.

FB501042-28

Quality of the components

Selection of the motors

- Improved flow rate and longer service life.
- Large range of input voltages available on all the motors delivered as standard, with alternating 50/60 Hz or direct current.

DB123816-26

Ventilation offer

With homologation UL available.

FB501032-38

Optimised flow rate: average increase of 50 %

- Maximum use of surface.
- Minimum loss of pressure.

High protection rating: IP54 as standard

1 - Mounting guide

- To centre the body of the fan on the wall of enclosure.
- To correct machining faults.
- To facilitate the correct operation of the mounting "clips".

2 - Multi-thickness mounting clips

- For easy and reliable mounting of the ventilation system.
- With a thickness of 0.8 to 4.5 mm, with no fixings.

3 - Inclined profile of the grille

- To protect the filter against vertical spraying:
 - each slat is protected by the slat above it,
 - the external dimensions remain small.

4 - IP54-55

A patented system allows the evacuation of water absorbed by the filter, in particular during high-pressure spraying.

5 - Hot-fitted sealing gasket

The polyurethane gasket, hot cast, guarantees a long-lasting seal.

6 - Effective system for retaining the filter

The system for holding the synthetic filter in the cavity of the filter holder guarantees a protection rating of IP54, in the most difficult conditions.

Thermal management system

Characteristics

Forced ventilation fan 38 m³/h	Forced ventilation fan 85 m³/h	Forced ventilation fan 165 m³/h	Forced ventilation fan 300 m³/h	Forced ventilation fan 560-850 m³/h
-----------------------------------	-----------------------------------	------------------------------------	------------------------------------	--

The fans comprise an axial motor, a protective housing on the front and rear surfaces and a filter designed to retain dust particles. This filter can be replaced during operation without risk of contact with the rotating element.

Injected thermoplastic (ASA PC), self-extinguishing according to UL 94 V-0

RAL 7035 as standard, with the option of RAL 7032

- The outside temperature (Te) must be 5°C lower than the desired temperature (Ts) inside the enclosure
- The filters that equip the fans must be cleaned and replaced regularly
- The surrounding environment must be relatively clean and overfrequent filter replacement should be avoided
- Bear in mind the pressure losses caused by the outlet element (grille with filter, ventilation louvre or simple opening) when determining the fan flow rate
- Storage Temperature: -40...+ 70°C

IP54

The cut-out template supplied with the device avoids the need for marking and protects the surface of the enclosure during handling

The device can be equipped with a filter that provides even more efficient protection for your sensitive facilities against dust particles

Characteristics				Covers IP55	Spare filter for cover	Fan	Grille	
				This solution protects the fan or the grille from any direct sprays. The cover is the preferred solution to guarantee the following: <ul style="list-style-type: none"> □ an efficient air flow for cooling, □ IP55 rating. 	-	-	-	
Material				2 materials available: <ul style="list-style-type: none"> □ sheet-steel painted with epoxy-polyester resin (RAL 7035) for outdoor applications □ stainless-steel 304L for food and beverage applications 	-	-	-	
Ingress protection rating				IP55	-	-	-	
Mechanical protection rating				IK10	-	-	-	
Certifications				UL508A	-	-	-	
Installation				Double insulation maintained if installed in an insulated enclosure. The cover is placed over the fan or the grille with a filter located at the bottom of the cover to prevent the entry of particles. Easy access to the filter: only two screws needed. When mounting: remove the external part of the fan or the grille as well as the filter.	-	-	-	
Supply				It is necessary to order 1 fan + 1 grille + 2 covers to have a complete system	-	-	-

New

> Choose **air-air exchangers** to take advantage of cooler ambient temperatures, such as food and beverage plants, to evacuate large amounts of heat while guaranteeing the independence of the internal and external air circuits.

A new range of energy efficient exchangers

Higher efficiency through improved design

With an updated external grill design, and by positioning cooling closer to critical equipment, such as speed drives, ClimaSys now provides **better flow, better cooling, and higher energy efficiency.**

Simplicity saves you time

Our free ProClima thermal calculation software **makes specification simple and fast.** A new thermal solutions module integrates calculation for cooling and control devices, helping you maximize the energy efficiency of your systems.

Faster installation

A number of design improvements reduce installation time. Mounting requires single cutouts and a minimum of screws. Wiring is accomplished with smart interconnects.

Protection

All side-mounted models are IP55 internally according to EN 60529.

> Choose **air-water exchangers** for especially difficult environments where there is no external air circuit available but a stable cold-water circuit can be supplied.

Exchangers that tackle highly polluted environments

PB502606-30

Many mounting options give you the right fit

Air-water exchangers offer roof and side mounting options.

Extended ratings to meet any challenge

Provide options for up to 15 kW of cooling power, among the world's highest power ratings for air-water exchangers.

PB502655-32

New material options adapt to any application

Air-water exchangers can be provided in the same material as electrical enclosures for (for example stainless steel) a homogeneous appearance and thermal performance.

DE123116-26

New certifications and declarations

- UL,
- CE.

PB502607-13

Protection

All side-mounting models are IP55 type protected internally and externally according EN 60529. Top-mounting models are IP54.

New

> Choose **cooling units** for harsh environments, where ambient temperatures can reach up to 55°C. The unit's integrated alarm system will signal you in the event of any operational anomaly.

Cooling units for extremely hot environments

Many mounting options give you the right fit

Cooling units range offer roof and side mounting options as well as slim models for efficient and space-saving installation on control panel doors.

Extended ratings to meet any challenge

Provide options for up to 15 kW of cooling power.

Protection through improved design

A new internal grill design protects components and personnel during operation, while also making ClimaSys products **easier to clean and maintain**.

Fast access to settings and status

A new HMI screen enables quick viewing to all configuration parameters and sensor readings within the enclosures (not on outdoor Heavy Duty models).

New material options adapt to any application

ClimaSys cooling units offer new outdoor and stainless steel versions, ideal for clean, hygienic environments such as food and beverage plants.

Accurate thermal control

To keep motor drives and controls running within safe thermal boundaries, all ClimaSys cooling units offer a precise **electronic thermostat control**. This ensures high cooling precision (+/- 1.5°C).

Extended ratings to meet any challenge

ClimaSys CU outdoor Heavy Duty version can withstand extreme environments, with **operating temperature** ratings from -20° to +55°C.

New certifications and declarations

- UL,
- CE.

Simplicity

No tools needed to replace the filter. It just takes a few seconds.

➤ Ultra thin resistance heaters have been designed to resolve condensation problems in the most complex installations. Is your enclosure short of space? Does your mounting plate make it impossible to install a conventional resistor? Do you not want to take out the equipment? Discover the benefits of this new offer and its numerous mounting solutions.

PF502437-32

Minimum thickness

They are extremely slim: 1.6 mm. As a result the usable space in the cabinet has been optimised for installing equipment. This can increase the usable space by up to 30 %!

Heat and safety

The heat is distributed over the whole surface and does not exceed 70°C. This temperature allows devices next to the heater to be handled safely.

PF502046-22

Multiple options for mounting

Innovative quick-mounting system using Velcro pads (no need for a tool!) or with basic mounting accessories (screw + spacer). These systems make it easy to move the heater if necessary.

PF502522-16

Numerous positions for installation

These heaters are so slim and flexible they can be installed in a variety of positions:

- Vertically on side panels
- On the mounting plate.

Low starting current: Energy Efficiency

Ultra thin resistance heaters are ohmic: they therefore have a low starting current.

No interference emissions

These resistors can be installed near electronic equipment to guarantee optimum heat without the risk of electromagnetic interference.

Thermal management system

Characteristics and selection guide

Ultra thin resistance heaters	
Description	Flexible, ultra thin resistance heaters to be installed inside the enclosure
Material	Silicon reinforced with fibreglass
Colour	Red (heaters), black (wires)
Certifications	VDE, LR

* Ultra thin resistance heaters can be manufactured with different dimensions and power ratings than those indicated above. Please contact us.

➤ The resistance heaters prevent the formation of condensation and guarantee the ideal temperature for the correct operation of the electronic components in the enclosure.

Insulated PTC heaters

Large range of power levels

- 2 versions: by natural convection and with fan.
- AC or DC power supply.
- 7 power levels, from 10 W to 550 W.

Innovating design

Covered with plastic to prevent direct contact with the aluminium radiator.

Easy installation and connection

- Reduced dimensions.
- Quick electric connection by terminal board.
- No maintenance required.
- Direct clipping onto a 35 mm DIN rail.

Safety

- The protection prevents direct contact with the aluminium radiator.
- Electric protection device with terminal block cover.
- Equipped with a PTC-type heater.
- Surface temperature lower than 70°C.

High thermal efficiency

- The configuration of the aluminium profile produces a "chimney" effect: high natural convection.
- Low power consumption thanks to self-control of the PTC-type heater.

Models with fan

- The heaters equipped with a fan ensure circulation of the air and a uniform temperature inside the enclosure.
- High-flow, silent fan.

Certifications

- CE marking.
- Range compliant with UL and VDE.

PB501146-67

Aluminium PTC heaters

PB501146-28

Resistance heaters equipped with a PTC-type sensor

The resistance heaters for electrical and electronic enclosures are equipped with PTC-type heating devices (Positive Temperature Coefficient).

Thanks to these heaters:

- The surface temperature stabilises at 75°C when the ambient temperature is -5°C.
- Power consumption is reduced.

Improved convection

The design of the profile of the resistance heaters produces a "chimney" effect, leading to increased natural convection and maintaining an even temperature inside the enclosure.

PB501147-111

Quick mounting

The resistance heaters are fixed by means of mounting clips to a 35 mm DIN rail.

PB501146-21

Connection cables

The 10 and 20 W heaters are equipped with a 2 x 0.75 x 300 mm power cord.

PB501149-28

Connection terminal boards

Heaters with a power of more than 20 W are equipped with a connection terminal board.

Large range of power levels

8 power levels, from 10 W to 400 W.

PB501025-28

Models with fan

Models of 250 to 400 W with fan.

Thermal control

Enclosures Monitor

- The enclosure monitor checks and protects all the equipment in the distribution, network and server racks as well as their environment.
- Ambient parameters and operating states can be measured using various sensors and several inputs.
- Signalling and display: on the unit, serial interface, Ethernet network.
- Digital inputs and switching outputs enable permanent monitoring and adapted actions.

Reference

NSY11950

Possibilities for connection to the enclosure monitor:

- 4 sensors ref. **NSY11951**, **NSY11952** and/or **NSY11953**.
- 4 sensors ref. **NSY11954** or **NSY11956**.
- 8 insulated digital inputs (free potential).
- 2 digital inputs.
- 1 series input used for monitoring devices with a communication protocol.

Connections and cabling diagram

- 1 Contact pin circuit breaker.
- 2 Connection to the network.
- 3 Connection of phase surveillance.
- 4 Digital switching outputs.
- 5 Digital inputs (ref. **NSY11955** and **NSY11958**).
- 6 Alarm inputs (ref. **NSY11954** and **NSY11956**).
- 7 Connection of a sensor, references **NSY11951**, **NSY11952** and **NSY11953**.
- 8 Connection of uninterruptible power supply.
- 9 Connection to Ethernet network RJ45.
- 10 Series interface for external devices.
- 11 Series interface for connection to a terminal.

PE801178

Door contact

Monitors door access by means of a magnetic sensor that reacts to any material conducting magnetic flow.

- **Length of cable supplied:** 4 m.
- **Maximum cable length:** 20 m.
- **Supply:** with mountings.

Reference

NSY11955

The miniaturisation of components, the generalisation of electronics and the appearance of new electronically powered products have made temperature management into a need which must necessarily be considered when designing electrical and/or electronic switchboards, in the same way as the protection rating. Reliability and the search for lower breakdown rates are two determining factors in process industries, where the cost per hour is extremely high. The smallest failure can instantly result in considerable losses. The service life of the components also depends on the temperature and humidity conditions inside the enclosure. The ideal values are +25...+35°C for the temperature and 60 % for the relative humidity (RH).

Various solutions to these problems have been put forward. They will be chosen according to environmental conditions, the type of components in the industrial control panel, and their cost.

In certain cases, all it takes it to oversize the enclosures or use fans. In other cases, when the temperature is higher, it becomes necessary to install air-water exchangers or air coolers operating according to the principle of refrigeration (cooling units). We offer you a range of solutions that adapt to every possible scenario: from the enclosure itself to ventilation systems, resistances or exchangers, and even cooling units.

Natural dissipation

Through the walls of the enclosure

The use of a larger enclosure can, in certain cases, solve your heating problem.

Airing

Natural ventilation

The addition of fresh air from the outside through ventilation louvres improves the dissipation of heat by natural convection. However, this solution can only be used to dissipate small power levels and in environments with a small amount of dust.

Ventilating

Circulation

Air circulation inside the enclosure with the help of a fan makes it possible to guarantee an even temperature, avoiding hot spots that can damage certain components.

Forced ventilation

The fans are designed to evacuate a considerable amount of heat coming from the components of the industrial control panels. The service life of the latter is considerably extended, thus guaranteeing the long life and correct operation of the installation.

The fans can only be used if the ambient temperature is at least 5°C lower than the desired temperature inside the enclosure.

They offer an efficient solution, one that is easy to implement and maintain, which is also inexpensive, to the problem of temperature increases in the industrial control panels. Thanks to their standard IP54 (IP55 with accessories) they are suitable for use in industrial and tertiary sectors.

Heating

Resistance heaters

Resistance heaters can be used for two reasons:

- To reheat the industrial control panel when the ambient temperature is too low for the correct operation of the components.
- To prevent the formation of condensation.

The second phenomenon can cause short-circuits, premature oxidation of the contacts, corrosion of metal parts and, in particular, of the enclosure, a considerable reduction in the service life of the electrical and electronic components.

Condensation occurs when the temperature suddenly drops below the dew point temperature. To avoid this, it is simply necessary to maintain the temperature inside the enclosure at a few degrees above the ambient temperature of the environment. Thanks to their design, the heaters encourage natural convection and guarantee quick and even heating within the enclosure.

Cooling

Air-air exchangers

Air-air exchangers are devices that combine efficiency and simplicity. The hot air flows of the enclosure and the cold of the surrounding environment, created by two fans, circulate on either side of hermetic separation walls, preventing the penetration of dust or moisture in the enclosure. The hot air from the switchboard reheats these walls, which in turn are cooled by the fresh air from outside. The transfer always takes place from the hotter side to the cooler side. This is why these devices can only be used if the ambient temperature is at least 5°C lower than the desired temperature inside the enclosure.

The aluminium exchange cassette forms the core of the system. This element can be cleaned easily by simply removing it. In addition, the permanent operation of the internal fan prevents the appearance of hot spots in the industrial control panel. The temperature regulation system integrated in the unit turns the external circuit fan on and off.

Air-water exchangers

Air-water exchangers operate on the same principle as air-air exchangers. Fresh air from the outside is replaced with cold water supplied by a network installed on the industrial site. This change of fluid makes it possible to evacuate much larger amounts of heat and, possibly, to reduce the temperature in the enclosure below the temperature of the ambient air.

Temperature control in the enclosure is carried out by modulating the water flow. The water circuit is protected by a shut-off device: your electrical installation is safe.

Cooling units

Cooling units can be used in the harshest environments, where the temperature can reach 55°C. These devices are especially recommended when the desired temperature inside the enclosure must be lower than the ambient temperature or when a large amount of heat needs to be evacuated. As in the case of the exchangers, they do not affect the IP of the switchboard.

The filter, placed at the inlet of the external air circuit, allows it to operate even when the ambient air is charged with dust or oil particles. Easily replaceable and quite inexpensive, this device guarantees the efficiency of the device throughout its service life. These devices control the temperature inside the enclosure and include an alarm function for signalling operational anomalies.

The ambient temperature is higher than the desired temperature inside the enclosure.

The ambient temperature is lower than the desired temperature inside the enclosure.

The ProClima calculation software, available on our website, is an indispensable tool for the selection of a thermal auxiliary.

Method of determining the thermal solution

The heat balance, which consists of comparing the power released by the devices with the power exchanged spontaneously through the wall of the enclosure, allows us to calculate the internal temperature obtained in the enclosure, with no thermal accessories, and thus to determine whether it is necessary to install any, bearing in mind the desired internal and external temperatures.

Below we have presented a simple method for implementing this choice.

1 - Characteristics of the enclosure

Position of the enclosure	Location according to IEC 890 ratio	Formula for calculating S (m ²)
	Accessible from every side	$S = 1.8 \times H \times (W + D) + 1.4 \times W \times D$
	Placed against a wall	$S = 1.4 \times W \times (H + D) + 1.8 \times D \times H$
	On the end when suited	$S = 1.4 \times D \times (H + W) + 1.8 \times W \times H$
	On the end when suited, placed against a wall	$S = 1.4 \times H \times (W + D) + 1.4 \times W \times D$
	In the middle when suited	$S = 1.8 \times W \times H + 1.4 \times W \times D + D \times H$
	In the middle when suited, placed against a wall	$S = 1.4 \times W \times (H + D) + D \times H$
	In the middle when suited, placed against a wall with the top covered	$S = 1.4 \times W \times H + 0.7 \times W \times D + D \times H$
		S = <input type="text" value=""/> m²

H = Height - W = Width - D = Depth

Example
 Spatial reference NSYSF20840
 H = 2000
 W = 800
 D = 400
 Installation method:
 Suitable enclosure placed against a wall.

S = 4.43 m²

2 - Thermal power dissipated by the operational components

Calculated as the sum of the power dissipated by each of the installed components. If these are not known, use the ProClima software and page 472, which shows the average values.

Pd = **W**

Assume that the switchgear dissipates 800 W.

Pd = 800 W

3 - Characteristics of the environment air

Maximum ambient temperature. **Te_{max} =** **°C**
 Minimum ambient temperature. **Te_{min} =** **°C**
 Average relative humidity. **RH =** **%**
 Dew point temperature. Useful to avoid condensation and to calculate resistance heater power. **Dp =** **°C**

The temperature conditions are as follows:

Te_{max} = 35°C
Te_{min} = 15°C
RH = 70 %
Dp = 29°C

4 - Average desired internal temperatures

They are defined by the nature of the components and the characteristics of the environment air

Maximum internal temperature **Tid_{max} =** **°C**
 Minimum internal temperature (maximum value between the dew point temperature and the minimum operating temperature of the devices) **Tid_{min} =** **°C**

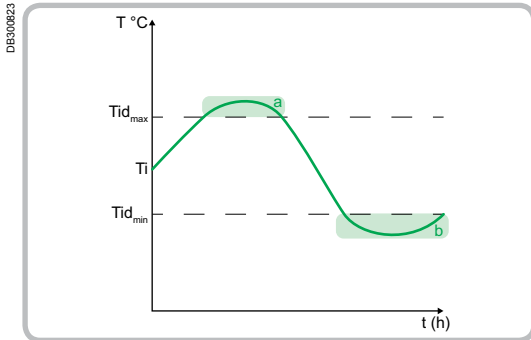

Tid_{max} = 40°C
Tid_{min} = 29°C

5 - Final temperature inside the enclosure with no thermal system

Max. internal temperature: $T_{fi_{max}} = \frac{Pd}{K \times S} + Te_{max}$ **Tfi_{max} =** **°C**
 Min. internal temperature: $T_{fi_{min}} = \frac{Pd}{K \times S} + Te_{min}$ **Tfi_{min} =** **°C**
 or K = 5.5 W/m²/°C for an enclosure made of painted sheet steel
 K = 3.5 W/m²/°C for a polyester enclosure
 K = 3.7 W/m²/°C for a stainless-steel enclosure
 K = 12 W/m²/°C for an aluminium enclosure

Tfi_{max} = 70°C
Tfi_{min} = 50°C

6 - Determining the type of thermal device and its power: Psyst

- a:**
 $Tid_{max} < Ti_{max}$
 $\Delta T_{min} = (Tid_{max} - Te_{max})$
 ■ $\Delta T_{min} = +5^{\circ}C$: Ventilation
 ■ $\Delta T_{min} = +10^{\circ}C$: Exchanger air-air
 ■ $\Delta T_{min} = -5^{\circ}C$: Cooling unit
 ■ Not depending on (ΔT_{min}) : Exchanger air-water
- b:**
 $Tid_{min} > Ti_{min}$: Heaters

If $Tid_{min} < Tfl_{min}$	If $Tid_{min} > Tfl_{min}$	If $Tid_{max} < Tfl_{max}$	If $Tid_{max} > Tfl_{max}$
▼	▼	▼	▼
No need for a thermal system; a circulation fan may be used to even out the temperature.	Need for a thermal system: resistance heater 1- Permanent operation of the switchboard Psyst = K x S (Tid_{min} - Te_{min}) - Pd 2- Discontinuous operation Psyst = K x S (Tid_{min} - Te_{min})	Need for a thermal system: ventilation, fan, exchanger, cooling unit. Psyst = Pd - K x S (Tid_{max} - Te_{max}) Psyst = 800 - 5.5 x 4.13 x (40 - 35) ~ 690 W	No need for a thermal system; a circulation fan may be used to even out the temperature.

Temperature conditions	Solution	Advantages	Constraints
Circulating			
Avoid hot spots.	Install circulation fans in the enclosure.	Highly economical solution requiring no maintenance, easy to install; Installation IP conserved.	The amount of heat evacuated is relatively low.
Cooling			
Final temperature Tid_{max} desired in the enclosure at least $5^{\circ}C$ higher than the ambient temperature Te_{max} . $Tid_{max} \geq Te_{max} + 5^{\circ}C$	Oversize the enclosure or the wall-mounting enclosure. Install ventilation louvres. Install fans for introducing fresh air. $\varnothing = \frac{Psyst}{(Tid_{max} - Te_{max})} \times 3.1 \text{ (m}^3\text{/h)}$ Use an air-air exchanger. $\varnothing = \frac{Psyst}{(Tid_{max} - Te_{max})} \text{ (W/K)}$	Economical solution requiring no maintenance, easy to install; Installation IP conserved. Highly economical solution requiring no maintenance, easy to install. Economical solution, easy to install; large amount of heat evacuated; possible temperature control. Easy to install; IP conserved during installation; temperature control as standard; easy maintenance.	The amount of heat evacuated is relatively low, larger dimensions. The amount of heat evacuated is low, it depends on the layout of the components, reduced IP (entry of dust). Regular filter maintenance. IP slightly reduced.
Final temperature Tid_{max} desired in the enclosure lower than the ambient temperature $Te_{max} + 5^{\circ}C$. $Tid_{max} \geq Te_{max} + 5^{\circ}C$	Use a cooling unit. Use an air-water exchanger.	Easy to install; allows the evacuation of large amounts of heat, even when the ambient temperature is high, IP conserved during installation, temperature control. Easy to install; allows the evacuation of large amounts of heat, even when the ambient temperature is high, IP conserved during installation, temperature control, no filter to maintain.	Regular filter maintenance, cannot be used beyond an ambient temperature of $55^{\circ}C$. Needs a water circuit; consumption if supplied by the water mains.
Heating			
Outside temperature lower than the lowest acceptable ambient temperature for the switchgear. Risk of condensation.	Heat using a resistance heater. Heat using a resistance heater in order to maintain the temperature beyond the dew point temperature.	Economical, reliable; see temperature in the table. Economical, reliable; the humidity in the switchboard can be regulated.	Energy consumption; space taken up in the enclosure. Energy consumption; space taken up in the enclosure.

ProClima

New ProClima software

- Software package for calculating and selecting the thermal accessories required for enclosures containing electrical and electronic equipment.
- Performs the calculations as well as the corrected surfaces, according to the dimensions of the enclosure and its position in relation to the walls.
- Available for download on our homepage.

Data entry

The following steps must be followed to conduct this study:

➤ **1** - Enter the project and customer data (optional).

➤ **2** - Enter the internal and external temperature data for the enclosure (compulsory).

➤ **3** - Enter the electrical data for the installation (voltage, rating, etc.) (compulsory).

➤ **4** - Determine the power dissipated by the electrical equipment inside the enclosure (compulsory).
 If this value is not known, the software can calculate it:

- Based on the electrical or electronic switchgear that make up the switchboard (type and number),
- Based on a temperature reading.

ProClima

Results

Summary of the heat balance

The software offers to print the project summary containing the calculation values, the results obtained and the thermal accessories recommended for maintaining the internal temperature of the enclosure in the specified conditions. In addition, the summary specifies the power, characteristics and reference of the device, as well as any related accessories.

5 - Select the enclosure and the installation method (compulsory).

6 - Select the thermal management system (fans, exchangers, etc.) (compulsory).

7 - View and print the project summary.

Data

■ **Enclosure data**

- Height: 2000 mm
- Width: 800 mm
- Depth: 500 mm

■ **Location:** placed on the wall

■ **Material:** painted sheet-steel enclosure

■ **Thermal power dissipated by the operational components** Pd: 950 W

■ **Information on temperature and the environment:**

Maximum desired temperature inside the enclosure $T_{e_{max}}$: 25°C

Minimum desired temperature inside the enclosure $T_{e_{min}}$: 25°C

Maximum temperature dissipated in the enclosure $T_{e_{max}}$: 35°C

Minimum temperature dissipated in the enclosure $T_{e_{min}}$: 25°C

■ **Environment:** low pollution and low dust level

Selection and calculation

The desired maximum temperature inside ($T_{s_{max}}$) the enclosure is 10°C higher than the maximum value expected for the outside ($T_{i_{max}}$).

It is possible to cool the enclosure using the filtered ventilation systems.

Calculation of the required fan (1)

Usage formulas:

$$P_{syst} = Pd - K \times S \times (T_{s_{max}} - T_{e_{max}})$$

$$Flow = f \times P_{syst} / (T_{s_{max}} - T_{e_{max}})$$

In order to make the calculation, it is necessary to know the height above sea level of the installation location:

Height above sea level: 800 m

(1) Pd = Thermal power dissipated by the operational components

$$S = 1.4 \times W \times (H + D) + 1.8 \times D \times H = 4.6 \text{ m}^2.$$

According to standard IEC 890

K = Constant defined by the material used to manufacture the enclosure

$K = 5.5 \text{ W/m}^2 \times \text{°C}$ for a solid sheet-steel enclosure

$K = 3.5 \text{ W/m}^2 \times \text{°C}$ for a polyester enclosure

$K = 3.7 \text{ W/m}^2 \times \text{°C}$ for a stainless-steel enclosure

f = Coefficient relating to the height above sea level (value)

0 to 100 m: $f = 3.1$

100 to 250 m: $f = 3.2$

250 to 500 m: $f = 3.3$

500 to 750 m: $f = 3.4$

750 to 1000 m: $f = 3.5$

...

Our example

$$P_{syst} = 950 - 5.5 \times 4.6 \times (35 - 25) = 697 \text{ W}$$

$$Flow \text{ rate} = 3.5 \times 697 / (35 - 25) = 244 \text{ m}^3/\text{h}$$

Selection from the fan quick-selection table:

1 fan with standard filter ref. NSYCVF300M230PF

+ 1 grille with standard filter ref. NSYCAG223LPPF

+ 1 thermostat ref. NSYCCOTHO enable a flow rate of 302 m³/h

The minimum outside temperature is lower than the desired minimum temperature inside the enclosure.

It is necessary to install resistance heaters:

Calculation of the useful resistance heater

Usage formula: $W = K \times S \times (T_{s_{min}} - T_{e_{min}})$

Our example: $W = 5.5 \times 4.6 (15 - 10) = 127 \text{ W}$

Selection from the selection guide of the resistance heaters:

1 resistance heater ref. NSYCR150WU2C

+ 1 thermostat ref. NSYCCOTHC

PB60066-57

Empty enclosures for low-voltage switchgear and controlgear assemblies. General rules.

Application

For empty enclosures before adding the user's switchgear, in the condition as supplied by the manufacturer.

Field of application

Demands for testing the enclosures to be used as part of the switchgear assemblies for voltages of less than 1000 V alternating current and 1500 V direct current.

Information supplied by the manufacturer

- Commercial trademark of the manufacturer: Schneider Electric.
- Mechanical characteristics, materials, conditions for use.
- Conditions for use:
 - Ambient air temperature for outdoor installations: -25 to +40°C.
 - Atmospheric conditions for outdoor installations: the humidity can temporarily reach 100% at a temperature of 25°C.
 - Transport and storage conditions: from -25 to +55°C; for limited periods not exceeding 24 h: up to +70°C.

** European standard EN 62208 is identical to IEC 62208. European countries publish this standard according to the body in each country (for example BS EN 62208 in the UK).*

PB60067-57

Standard tests of standard IEC 62208

- Static loads: test 1.25 x maximum admissible load during 1 hour.
- Lifting: applicable to enclosures with lifting accessories.
- Axial loads of metal inserts: 500 N for 10 seconds for M8 inserts.
- IK code: test according to standard IEC 62262 with pendulum impact tester. After testing, the enclosure keeps its IP rating.
- IP rating: test according to standard IEC 60529. Degree of protection against access to dangerous parts and the penetration of solid bodies and against the penetration of water.
- Thermal stability at a temperature of 70 °C: 7 days.
- Resistance to heat: ball test at 70 °C (1).
- Resistance to abnormal heat and to fire: glow wire test according to IEC 60695-2-10 and IEC 60695-2-11 (1).
- Dielectric strength: 5000 V (1).
- Protection circuit continuity (2): resistance not to exceed 0.1 ohm.
- Weather resistance: duration 500 h (cycle: rain 5 minutes + UV lamp 25 minutes).
- Corrosion resistance:
 - For indoor enclosures:
 - 6 cycles of 24 hours of the damp heat test at 40 °C and relative humidity of 95%.
 - 2 cycles of 24 hours of the salt mist test at 35 °C.
 - For outdoor enclosures:
 - 12 cycles of 24 hours of the damp heat test at 40 °C and relative humidity of 95%.
 - 14 cycles of 24 hours of the salt mist test at 35 °C.

Our empty enclosures are marked CE according to the Low-Voltage Directive (LVD). It is the responsibility of the final equipment manufacturer to respect regulations in force.

(1) Information required for enclosures made from insulating material.
 (2) For metal enclosures.

Selection according to the IP protection degrees

The degrees of protection, explained on the next page, is an important element when selecting the enclosures.

The following table shows the protection degrees of the enclosures.

Name	Range	IP40	IP41	IP42	IP43	IP44	IP54	IP55	IP65	IP66
Metal industrial boxes	Spacial SBM							● (4)		● (4)
Metal derivation boxes	Spacial SDB							●

Steel

Stainless-steel

Plastic & Polyester

Selection according to the environment

The location of the enclosures and the physical, chemical and climatic conditions to which they are exposed will determine the model to be used.

- Steel enclosures are particularly well suited to indoor use in industrial environments.
- Stainless-steel enclosures are particularly well suited to corrosive environments or areas where specific hygiene demands are applicable.
- Polyester enclosures are particularly well suited to severe corrosive atmospheres, indoors or outdoors.

Enclosures made from insulating materials guarantee total insulation, reducing electric hazards for persons.

The main characteristics of the plastic materials of our enclosures and their chemical strength are given on page 486.

Further help for making the selection is given by the NEMA or UL classification of the enclosure, see page 483.

Degrees of protection provided by enclosures

- The degrees of protection provided by the enclosures are defined by standards IEC 60529 (IP) and IEC 62262 (IK).
- Degrees of protection are indicated by the letters IP followed by two characteristic numerals. The numerals show the degree of protection offered by the enclosure against access to dangerous parts, the penetration of solid bodies (1st numeral), and against the penetration of liquids (2nd numeral).
- The protection against external mechanical impact is indicated by the letters IK followed by a characteristic group numeral.

Note: Many EN European standards are harmonised with international IEC standards.
 This is the case with enclosure protection standards:
 - EN 60529 = IEC 60529.
 - EN 62262 = IEC 62262.

	IP	IK
First numeral Protection against solid bodies	Second numeral Protection against liquids	Mechanical protection
0 No protection 	0 No protection 	0 No protection 
1 Protected against solid bodies larger than 50 mm (e.g.: incidental contact with the hand) 	1 Protected against vertically falling water droplets (condensation) 	1 Impact energy: 0.150 Joules 200 g 7.5 cm 
2 Protected against solid bodies larger than 12 mm (e.g.: finger contact) 	2 Protected against water droplets deflected at up to 15° from vertical 	2 Impact energy: 0.200 Joules 200 g 10 cm 
3 Protected against solid bodies larger than 2.5 mm (tools, wires) 	3 Protected against rainwater at up to 60° from vertical 	3 Impact energy: 0.350 Joules 200 g 17.5 cm 
4 Protected against solid bodies larger than 1 mm (fine tools, small wires) 	4 Protection against water spray from all directions 	4 Impact energy: 0.500 Joules 200 g 25 cm 
5 Protected against dust (no harmful deposits) 	5 Protection against low-pressure water jets from all directions 	5 Impact energy: 0.700 Joules 200 g 35 cm 
6 Totally dust tight 	6 Protection against powerful water jets from all directions 	6 Impact energy: 1.00 Joules 500 g 20 cm 
	7 Protected against the effects of immersion 	7 Impact energy: 2.00 Joules 500 g 40 cm 
	8 Protected against prolonged effects of immersion under pressure 	8 Impact energy: 5.00 Joules 1,7 kg 29.5 cm 
		9 Impact energy: 10.00 Joules 5 kg 20 cm 
		10 Impact energy: 20.00 Joules 5 kg 40 cm 

Classification of electrical equipment enclosures according to NEMA and UL

NEMA and UL are standardisation bodies, commonly recognised in North America, which have issued classifications of enclosures according to the protection offered in various environments.

These classifications are similar.

The 1st table below summarises this classification, which does not include potentially explosive areas. The detailed recommendations of this classification are given on the next page.

The 2nd table indicates the classification of our enclosures.

These classifications appear in our UL certifications (see Certification technical annex on page 478).

Certification according to the UL classification guarantees the corresponding NEMA classification by equivalence.

(4) In some ranges the classification depends on the model and version. The detailed protection types are indicated in the UL certifications.

Classification of electrical equipment enclosures according to NEMA and UL

PS600063-55

PS600064-55

The enclosures must protect the equipment against environmental conditions and protect the personnel against the risk of incidental contact with the equipment. The following classifications (Type) are required according to the required uses and prescriptions:

Type	Use	Prescription
1	Indoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt.
2	Indoor use	It provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, drips and gentle splashes of non-corrosive liquids.
3	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow, windblown and resists the formation of ice on the outside.
3R	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow and resists the formation of ice on the outside.
3S	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow and windblown dust. The external mechanism must continue to work even when layers of ice are formed.
4	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow, windblown dust, splashes and hose-directed water and resists the formation of frost on the outside.
4x	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow, windblown dust, splashes, hose-directed water and resists corrosion and the formation of ice on the outside.
5	Indoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, settling airborne dust, lint, fibres, flyings, drips and gentle splashes of non-corrosive liquids.
6	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow, hose-directed water, the entry of water during occasional temporary submersion to a limited depth and resists the formation of ice on the outside.
6P	Indoor and outdoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, rain, sleet, snow, hose-directed water, the entry of water during prolonged submersion to a limited depth and resists corrosion and the formation of ice on the outside.
12	Indoor use (without knockouts)	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, dust, fluff, fibres, particles in suspension, drips and gentle splashes of non-corrosive liquids as well as gentle splashes or leaks of oil and non-corrosive coolants.
12K	Indoor use (enclosures with pre-routing)	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, dust, lint, fibres flyings drips and gentle splashes of non-corrosive liquids as well as gentle splashes or leaks of oil and non-corrosive coolants.
13	Indoor use	The enclosure provides protection for the personnel against incidental contact with the internal equipment and protects said equipment against dirt, dust, lint, fibres flyings and the spraying, splashing, and seepage leaks of water, oil or non-corrosive coolants.

Note: The above recommendations aim to explain the NEMA and UL classifications, but are not the official texts of NEMA or UL. The exact definitions provided by the Organisations are those of standards NEMA 250 and UL 50E.

Polyester base coating properties

PB50008-96

Product type

Thermosetting polyester resins based powder coating modified by epoxy resins and designed for decoration and to prevent corrosion.

The performance of this coating is superior to conventional epoxy powders in terms of: colour stability, temperature resistance and weather resistance.

Grey RAL 7035; appearance: structured.

Mechanical properties

Test conditions: steel samples with a thickness of 10/10^e mm.

Degreasing using biodegradable surface-active agents.

Film thickness: 60 microns.

Bonding (scratching and adhesive tape)	ISO 2409	Class 1
Ericksen stamping	ISO 1520	≥ 7 mm
Direct impact resistance	ISO 6272	> 1 kg/70 cm
Indirect impact resistance	ISO 6272	> 1 kg/20 cm
Bending around conical mandrel	ISO 6860 - ASTM D 522-88	Maximum cracking of 70 mm, without the paint coming loose

Chemical properties

Tests conducted at ambient temperature on phosphated samples covered with a 150 to 200 micron film:

■ Film intact.

■ Film attacked (blistering, yellowing, loss of gloss).

Number of months			2	4	6	8	10	12

Solvents	Petrol		[Blue bar]		[Red bar]					
	Higher alcohols		[Blue bar]				[Red bar]			
	Aliphatics		[Blue bar]		[Red bar]					
	Aromatics		[Blue bar]				[Red bar]			
	Ketones-esters		[Red bar]							
	Tri-perchloroethylene		[Red bar]							

Physical properties

Temperature resistance: -40°C and 100 hours at +150°C (colour: white).

Gloss retention: good.

Resistance to corrosion

Compliance with standard IEC 62208 for outdoor installations: 288 h of humid heat and 336 h of salt mist.

Polyester base coating properties

Nuclear decontamination

Applicable to colours RAL 7035 and AFNOR A550.
Standard NFT 30901. Percentage of decontamination for contamination by fission products. Please consult us for further details.

Accelerated aging

Standard IEC 62208: 500 h UV according to ISO 4892 (method A) (adherence of the coating with minimum retention of 50% on the grid according to ISO 2409).

Fire behaviour

Class M1 (self-extinguishing material).
Class M0 (for coating on a metal base).

Manufacturing process

Properties of the plastic materials

Mechanical, electrical, physical and fire-resistance properties

Plastic materials generally used to manufacture our products:

- ABS.
- Polycarbonate.
- PVC (polyvinyl chloride).
- Bayblend® = PC + ABS.
- Polyester reinforced with fibreglass.
- Altuglas.
- Polypropylene.
- Polystyrene.
- Polyamide 6 and 12.
- SBS.

How to select your enclosures & accessories?

Environment	
In what type of environment will you be installing your products?	<ul style="list-style-type: none"> ■ Indoor industrial environments, use steel. ■ Indoor corrosive environments or with specific hygienic demands, use stainless-steel. ■ Severe corrosive environments, indoor or outdoor, use polyester enclosures. ■ Always think about the thermal issue. We have the right solution.
Is a canopy required?	A canopy is mandatory when liquid can fall on an enclosure. Our polyester enclosures (PLM and PLAT) are pre-equipped.
Technical requirements	
Are tightness and resistance to external mechanical impact needed in your case?	Each enclosure specifies its: <ul style="list-style-type: none"> ■ Tightness: IP. ■ Resistance to external mechanical impact: IK.
Have you any size-related installation constraints?	Check the dimensions of the enclosure: Height (H) x Width (W) x Depth (D) in mm.
What colours are available?	RAL 7035 is our standard on steel enclosures. Other colours are available on demand.
How do you install your enclosures?	Installation possible: <ul style="list-style-type: none"> ■ On a wall. ■ On the floor. ■ On a post. Available accessories: <ul style="list-style-type: none"> ■ Mounting brackets. ■ Plinths. ■ Post mounting devices. ■ Reinforcement for heavy load.
Door	
Need to see inside the enclosure?	Choice of: <ul style="list-style-type: none"> ■ Glazed doors. ■ Acrylic windows. ■ Control protection frames.
What type of lock do you want?	The type of lock is to be specified: <ul style="list-style-type: none"> ■ Inserts. ■ Keys. ■ Padlocks.
Do you need an earth connection?	Electrical continuity by earthing braids or leads available as accessories.
How will you mount your raceways to the door? On the uprights? On the rails?	They can be fixed thanks to: <ul style="list-style-type: none"> ■ Cable-duct supports. ■ Door cross-rails. ■ Cable ties.
Are doors opened for maintenance?	You may need: <ul style="list-style-type: none"> ■ Door stops. ■ Door switches.
Body or frame	
Where do the cables enter the enclosure from?	A large variety of cable entries available.
What functions should this cable-entry provide?	Our cable glands or membranes provide: <ul style="list-style-type: none"> ■ Tightness. ■ Cable supports.
Mounting accessories	
How will the equipment be installed inside your enclosure?	Several mounting plates according to your application: <ul style="list-style-type: none"> ■ Plain. ■ Micro-perforated (Telequick System). ■ Perforated (Telequick System). ■ Modular. ■ 19".
Do you require cable accessories?	<ul style="list-style-type: none"> ■ Cable ducts. ■ Cable cross rails. ■ Cable supports... ... are available, see our catalogue for more details.
Thermal	
Do you need to cool? Heat? Dry?	<ul style="list-style-type: none"> ■ Ventilation louvers. ■ Ventilation grilles. ■ Forced ventilations. ■ Resistance heaters. ■ Thermostats. ■ Calculations with ClimaSys software. Refer to our Thermal Control section.
Logistics and handling	
How do you handle the enclosures?	Thanks to eyebolts and lifting brackets.
