

RITOCO ADVANCED RETOUCHING TOOL FOR 3D PRINTS

Product Description

Ritocco is the most advanced heated interchangeable tool for cleaning up 3D printed objects. It can easily cut through support material "like a hot knife cutting through butter" or use a blending tip to even-out rough areas.

Ritocco has an easy and advanced mode. The Easy mode has preset temperatures for PLA and ABS Mode for fast setup. The advanced mode allows the user to select their own temperatures based on their experience.

Key Features

- 4 interchangeable tips included for Blending, Refining, Cutting and Carving
- Easily hot swap tips during process with heat resistant pad.
- Sleep Function
- Switchable temperature scale between °F and °C
- Includes Holder for tips and the Ritocco tool
