Subject: End of Life (EOL) Notification

Dear Valued Customer,

ERP is making significant investments to optimize our current production capacity due to dramatically increasing demand for our next generation LED drivers. During this expansion, we remain committed to existing products with appreciable volume. We are also evaluating old product families that do not have sufficient demand to warrant continued production. Part numbers/SKUs with very low volume are being eliminated through an End of Life [EOL] process.

The list of products affected is located in **Appendix A**. Please review **Appendix A** and the list of products thoroughly to prevent disruptions in your future supply chain.

For product model numbers listed in **Appendix A**, ERP requires the placement and receipt of a **lifetime-time-buy purchase order by December 31, 2022** through your normal purchasing channels.

Purchase orders must be received by December 31, 2022 to qualify for delivery before March 31, 2023, the last possible date of shipment of each and every product on the EOL list in Appendix A. Minimum order quantities (MOQ) may apply through ERP or its licensed distributors. Lifetime buy purchase orders placed with ERP or its licensed distributors carry Non-cancellable, Non-returnable (NCNR) terms. These products will comply with ERP's standard warranty terms and conditions.

For questions or concerns regarding this EOL notification, please contact the appropriate ERP sales representative, customer service representative, or distributor.

Sincerely,

A handwritten signature in black ink, appearing to read 'Marc McAndrew', written over a light blue horizontal line.

Marc McAndrew
Product Line Manager
ERP Power, LLC
